

DRAFT

Minutes of the April 24, 2023 meeting of the Exeter Community Power Aggregation Committee

Members Present: Cliff Sinnott, Lew Hitzrot, Stephanie Marshal

Attending remotely: Nick Devonshire

- Minutes of the April 3, 2023 meeting were approved
- Exeter Community Power Aggregation Committee will share a table with the Exeter Energy Committee at the Alewife Festival on Saturday, May 13 from 10 am to 1pm. Lew and Stephanie will staff the table.
- We discussed whether we should draft a letter to the PUC expressing our concern over the delay in data transfer to CPCNH for net metered customers. We agreed that the letter should express our appreciation for the timely transfer of data for the majority of Until customers transitioning to community power while stating our hope that we might cooperate in finding a solution to the net metered data impasse. Stephanie will draft the letter and we will share it with Henry Herndon and Russ Dean for their approval.
- We agreed that we should encourage community power customers enrolled in Granite Basic to opt up to supply options with greater amounts of renewables. We also should remind those on third party supply of the advantages of switching to community power. We agreed that we should wait until July to launch a campaign to promote those changes.
- We should plan to update the Select Board on the roll out of Exeter Community Power. Lew will check with Henry Herndon to find out when we might have access to data (number of Exeter residents and businesses enrolled in ECP, opt up and opt out numbers, etc,) to share with the SB.
