

# Past and Future Hazards Map Exeter, New Hampshire

Spring 2018

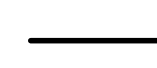

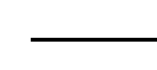

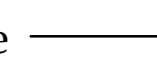

## Past/Future Hazard Areas (Defined by Community)

type

-  Flood Hazard Areas
-  Wind Hazard Areas
-  Fire Concern Area

## FEMA Flood Hazard Zones

-  1% Annual Chance Flood Hazard (100 Year Flood)
-  0.2% Annual Chance Flood Hazard (500 Year Flood)
-  Open Water

-  Shoreline; Stream
-  Apparent Wetland Limit
-  Intermittent Stream
-  Other Surface Water Feature
-  Surface Water
-  Interstate
-  US Route
-  State Route
-  Local
-  Town Boundaries
-  Town of Exeter

Past and future hazards were identified by the Hazard Mitigation Planning Committee from the Town of Exeter and subsequently revised. Information was gathered to accompany the development of a Hazard Mitigation Plan under the guidance and funding of the NH Office of Emergency Management.

Flood Hazard Zones on this map are from the Digital Flood Insurance Rate Map (DFIRM) Database. The Digital Flood Insurance Rate Map (DFIRM) Database depicts flood risk information and supporting data used to develop the risk data. The primary risk classifications used are the 1-percent-annual-chance flood event, the 0.2-percent-annual-chance flood event, and areas of minimal flood risk. The DFIRM Database is derived from Flood Insurance Studies (FISs), previously published Flood Insurance Rate Maps (FIRMs), flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available. The FISs and FIRMs are published by the Federal Emergency Management Agency (FEMA). This was provided by GRANIT, Complex Systems Research Center, UNH latest revision in 2013.

Base Features (transportation, political and hydrographic) were automated from the USGS Digital Line Graph data, 1:24,000, as archived in the GRANIT database at Complex Systems Research Center, Institute for the Study of Earth, Oceans and Space, University of New Hampshire, Durham, NH, 1992-2012. The roads are supplied by NH Department of Transportation updated December 2017.
