

Town of Exeter

Downtown Parking, Traffic, and Pedestrian Flow Analysis

Survey Results and Draft Recommendations to be Shared

For the past several months, the Town of Exeter has been conducting a parking study Downtown to better understand:

- Do we need more parking?
- Can we better use the parking we have?
- Can finding parking become easier?
- Can traffic flow be improved?
- Can driving be safer?
- How can walking be made safer?

The draft recommendations resulting from the analysis have been developed and this is your chance to weigh in!

Once finalized in early 2024, the recommendations will be shared with the Town as a tool to address some of the key existing parking challenges and to potentially make improvements in the near future.

DECEMBER 13TH

6:30-7:30pm (Presentation)

7:30-8:30pm (Drop-in Open house)

Exeter Town Hall, 9 Front Street

This meeting is open to the public and will also be livestreamed for those unable to attend the presentation.

We look forward to seeing you for this important discussion!
