Re: Capital Improvement Program 2022-2027

Honorable members of the Select Board:

On August 12, 2021 and August 26, 2021, the Planning Board held public hearings on the Capital Improvement Program 2022-2027. At the hearings, department heads presented their requests followed by an open discussion and dialogue between the board and the various Town departments submitting requests. After review, the Planning Board endorses the proposed plan as presented.

Respectively submitted,

Langdon Plumer

Planning Board Chair

enc (1)

Town of Exeter
2022 -2027 Capital Improvement Program

Background

The Town of Exeter Capital Improvement Program (CIP) identifies the significant capital needs of the town and indicates how these improvements might be funded over a six-year period. It describes long-term capital needs for all municipal departments including highway, police, fire, parks and recreation, water, sewer, public library and other departments.

The Capital Improvement Program is a planning level document. It identifies and sequences projects, but does not provide for funding. Under the Town's form of government, the deliberative session and the voters make final decisions on the funding of recommended capital improvements.

The Capital Improvement Program is updated annually and projects change as circumstances change. Adjustments are made for new mandates, regulations, growth in population, transportation alternatives, changes in priorities, or other needs. One effective use of the CIP is that it provides for considerable advance project identification, public discussion, project design and definition of scope, cost estimating, and financial planning.

Purpose

The goal of the CIP is to establish a system of procedures and priorities by which to evaluate public improvement projects in terms of public safety, public need, project continuity, financial resources, and the strategic goals for the Town. The CIP allows town departments to establish a methodology and priority system to providing efficient and effective services. It also provides an opportunity for citizens and interested parties to voice their requests for community improvement projects.

Process

The Capital Improvement Program is coordinated annually by the Town's Planning Department. Municipal departments submit a 6-year listing of proposed CIP projects, including vehicle and equipment needs that are in excess of $25,000. The requests are then reviewed and updated by the Town Manager and Town Planner and after some revision, presented to the Planning Board. The Planning Board provides recommendations at a working meeting in August and later in September, adopts the CIP, forwarding it to the Selectmen. Both the Budget Committee and Board of Selectmen review the CIP, with the latter determining the final list of projects to be presented at the Town Meeting each year. Under SB2, selected projects are then voted on by the voters at the March elections.

Guiding Principles

The guiding principles used to develop the Capital Improvement Program (CIP) are as follows:

- To preserve and improve town owned infrastructure through proper public facility planning, construction, rehabilitation and maintenance;
- To maximize the useful life of capital investments by scheduling major renovations and modifications at the appropriate time in the life-cycle of the facility;
- To identify and examine current and future infrastructure needs and establish priorities among projects so that available resources are used to the town's best advantage;
- To improve financial planning by comparing needs with resources, estimating future bond issues as required, and identifying potential fiscal implications to Exeter taxpayers and ratepayers;
- To provide a forward looking planning tool for the purpose of contributing to the creation of a stable property tax rate;
- To aid the Town's elected officials, appointed committees, and department heads in the prioritization, coordination, and sequencing of various municipal improvements;
- To inform residents, business owners and developers of needed and planned improvements.

About This Document:

This report is divided into multiple sections which are as follows:

Section 1: Facilities

Section 2: General Fund Projects

Section 3: Water Fund Projects

Section 4: Sewer Fund Projects

Section 5: Vehicles and Equipment – All Funds (General, Water, Sewer, Revolving)

Section 6: Financial Schedules

- Project Listing – General Fund
- Project Listing – Water Fund
- Project Listing – Sewer Fund
- Project Listing – Vehicles & Equipment
- Existing Debt Service – All Funds
- Proposed Debt Service – All Funds

2022-2027 CIP TABLE OF CONTENTS

Town of Exeter, New Hampshire

2022- 2027 CIP Project Request Form

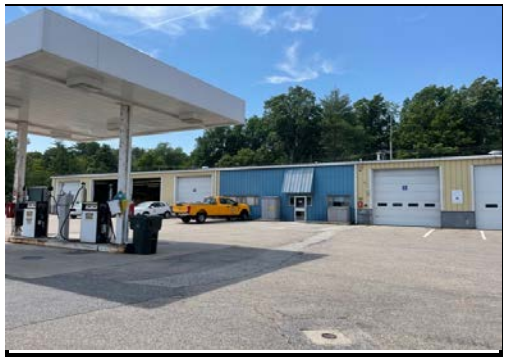
Date Submitted: 6/18/2021

First Year Funding is Requested: 2022

Project Title: DPW Complex
Project Type: Highway - Facilities
Project Cost: $75,000

Department: Public Works
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 50
Master Plan (Y/N): Y
Growth Related (Y/N): Y
Service Related (Y/N): Y
Externally Mandated (Y/N): N



Project Description

General Project Description:
In FY19 and FY20 the architect conducted an analysis of the existing facility and performed the programming for a new facility. In FY21 a survey of the recently obtained parcel next to the DPW site will be undertaken. At the same time any wetlands will be delineated. This work is expected to be complete by Sept 2021. The fuel island is in poor condition and is in need of replacement prior to a new garage complex being constructed. The FY22 request is for $75,000 so that the architect and site engineer can collaborate on locating facilities and fuel islands with site circulation in mind. Investigations into above ground fuel tanks vs above ground will be explored. A preliminary site layout will be the result of this task. A conceptual development budget will be prepared for site considerations and facility. Depending on any remaining funds, geotechnical investigations could be started for new structures.

FY23
A new fuel island will be designed and constructed with future site conditions considered.

FY24 / FY25
The new public works facility will be designed and constructed.

Project Description

1. General project description:
Conduct a facilities condition assessment (FCA) of town-owned bulidings.

2. Rationale:
The Town of Exeter has completed facilities studies on multiple properties over the last ten years. Each of these studies did not establish a baseline or a rating system that would enable the town to manage the properties, establish maintenance, renovation and replacement priorities, and track facilities conditions over time. They did not specifically identify maintenance and the overall condition of the building and did not distinguish between facilities needs and programming. The information in these studies may be useful for documenting the building's history and current condition at the beginning time of the FCA in this project.

Since the time of the last study, the town has formed a Facilities Advisory Committee to create a database tool designed to be used on an ongoing basis to support capital and facilities planning of the Town Manager, Department of Public Works, the Planning Board, and the Budget Recommendations Committee. The tool is intended to use the information collected under this RFP and other sources, in conjunction with available proven technology, to create a different methodology for integrated facilities management. The goal of this RFP is to create a database and reporting structure that is easy to update and maintain, and can be integrated with Exeter's existing asset inventory system, PeopleSoft GIS, and work order system PeopleSoft GIS. Going forward, completed projects will be seamlessly integrated into a living data base.

This tool will be a key part of Exeter's initiative leading to a Facilities Master Plan and Policy that will enable Town leadership and taxpayers to make fully informed decisions whether to repair, renovate or replace existing Town facilities as they age and as requirements for responsive and reasonably costed Town services change over time. Prior to the commencement of that planning process, a complete Facilities Condition Assessment is necessary. Obtaining an understanding of the condition and backlog of work for each facility will inform decision making in the development of the master plan and policy.

3. Budget Impact:
A preliminary estimate to conduct the evaluation is approximately $45,000.

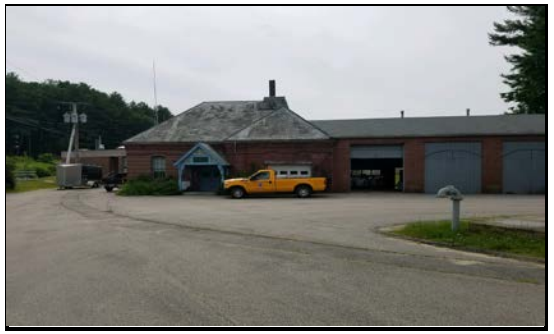
Date Submitted: 5/15/2021

Year Funding is Requested: 2023

Project Title: New Surface Water Treatment Plant
Project Ranking: _____ of _____

Project Type: Utility-Water
Project Cost: 2023-$250,000; 2025-$1,500,000; 2027-TBD
Department: Department of Public Works
Contact Name: Jennifer Perry

Useful Life (Years): 50
Master Plan (Y/N): N
Growth Related (Y/N): Y
Service Related (Y/N): Y
Externally Mandated (Y/N): N



Project Description

Rationale: Both surface water (SW) and groundwater (GW) supplies are required to meet the Town's total water supply needs in accordance with our Integrated Management approach to water supply. The need for SW supply has become more apparent since testing in 2020 has shown that three of the existing groundwater supplies have less sustainable capacity than originally estimated, about 1.0 million gallons per day (MGD) while current peak demand is about 1.6 MGD. The Town is moving forward with development of additional groundwater supply capacity, but we must also address upgrading or replacing the surface water treatment plant (SWTP) which is currently providing 50-60% of the Town's water. The SWTP was initially constructed in 1905, and upgraded in 1924, 1972 and most recently, 1992 or 28 years ago. Based on the age of the facilities, limitations of the process, the constrained site, and the location in a flood zone that has resulted in two major flood events at the existing SWTP, rebuilding on this site is not recommended. It is noted that the potential for flooding is only expected to increase with climate change and predicted sea level rise. Therefore, construction of a new SWTP at a new site is recommended. The goal is for this new SWTP to supplement the GW supplies and provide closer to 30% of the Town's water. An early estimate of the required capacity is 1.3 to 1.5 MGD, about half of the capacity of the SWTP proposed and designed in the early 2000's. Options for a new site are limited. The Town-owned "Sportsmans Club" parcel has been previously identified due to its higher elevation and proximity to the Exeter Reservoir and should be evaluated, including the need for lead shot remediation, and compared to other potential sites. A planning/preliminary design effort is necessary to evaluate potential sites, establish the required capacity, the most appropriate treatment process and refine projected costs. This evaluation would include looking at options to utilize existing infrastructure such as the existing reservoir intake and repurposing of the existing SWTP site.

Description:
A Planning and Preliminary Design effort is required to do the following:
- Confirm design flow for SWTP, depending on GW supplies
- Site alternatives investigations
- Refine water main connections to new plant
- Collect seasonal water quality data for final design
- Piloting of treatment alternatives
- Refine treatment processes and plant configuration
- Develop opinions of costs
- Evaluate repurposing of existing site

Project Cost:
The projected cost for the preliminary planning and preliminary design effort is $250,000. Final design and construction costs will be determined as part of this effort,

Schedule and Phases: Planning and Site investigations, Preliminary Design (2023); Permitting and Final Design (2025); Start Construction (2027); Substantial Completion (2028); Decommission Existing Plant (2029)

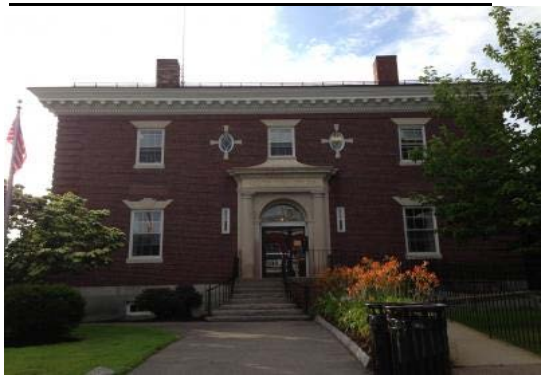
Service Related (Y/N): YES
Externally Mandated (Y/N): NO



Project Description

1. General project description:
Conduct a geotechnical and structural evaluation of the Town Offices building at 10 Front Street.

2. Rationale:
The Town Offices building at 10 Front Street is a brick structure built in 1892. Originally constructed for the County as the Probate and Registry of Deeds office, the Town acquired the building in 1966 and converted it to municipal offices. Numerous building expansions and modifications have been completed over the years.
The original building is the front of the building facing Front Street; it is delineated on the first floor from the main entrance to the restroom and elevator). The building was expanded in 1927. The addition is located at the back of the building toward the employee parking lot; it is delineated on the first floor by the Town Clerk's offices and lobby and on the second floor by the Building Inspector's office, the Nowak Room and IT office. The building foundations and the construcion methods vary between the original building and the addition. Differential settlement is apparent with cracks visible in exterior and interior north-side walls.

3. Budget Impact:
A preliminary estimate to conduct the evaluation is less than $50,000. Some remediation work may be accommodated within this cost.

2022 - 2027 CIP Project Request Form

Date Submitted: 6/11/2021

First Year Funding is Requested: 2023

Project Title: Court St Design/Engineering
Project Type: Multiple
Project Cost: $75,000.00

Department: Parks and Recreation
Contact Name: Greg Bisson

Useful Life (Years): 30
Master Plan (Y/N): Y
Growth Related (Y/N): Y
Service Related (Y/N): Y
Externally Mandated (Y/N): N

Project Description

The design and engineering would be contingent on the Facility Advisory Committee's facility assessement. This project is designed to estimate the cost of renovating the 30/32 Court St property to make it more functional. There are several deficiencies on this property along with the unknown structural integrity of both buildings. 32 Court St, Parks and Recreation office, was built in 1848 serving as a school for the community until 1959 when it became the community center for the Parks and Recreation Director.This building was renovated in the 1990's without addressing multiple issues. 30 Court St, the Senior Center, was built in the early 1900's serving as the fire department from 1927-1979. A fire to the building caused a removal of the 2nd floor while leaving charred remains hidden throughout the building. The senior center does not have adequate space for both Meals on Wheels and our senior population. Several other factors need to be taken into consideration of the use of the building- 1) accessibility, 2) lack of parking, 3) lack of space programming space, 4) lack of a gym, 5) lack of storage, 6) lack of sustainable energy, and 7) structural integrity. Renovation of the current properties would also require the relocation of both Parks and Recreation and Meal on Wheels until construction is completed. Construction cost for this project would be determined after the design and engineering.

Service Related (Y/N): Y
Externally Mandated (Y/N): N

Project Description

The Parks and Recreation office and Senior center no longer meets the needs of the community. The town needs space that can accommodate multiple programs and demographics. A preliminary program analysis completed in 2019 during the design and engineering of the recreation park indicated a 26,000 sq. ft building would meet the department's needs and the town. This facility is needed whether it is at the Recreation Park or another location in the city.
For planning purposes, the National Parks and Recreation Association did an analysis for publicly owned indoor recreation facilities. The planning benchmark is typically 1-2 square feet per resident for indoor recreation space. This is the standard used nationally by architects, engineers, and consultants when considering an indoor recreation facility. If we examine indoor publicly owned recreation facilities in Dover, Rochester, Portsmouth, Meredith, Newmarket, and Seabrook, the average indoor space is about 1.5 square feet per resident. Based on the 2020 population of 15,361 the following calculations can be used for the space needed in a potential community center
15,361 square feet on the low end
23,042 square feet for the middle
30,722 square feet on the high end
The proposed community center in 2019 was not far off in size, with an equivalent of 1.7 square feet per resident or 26,000 sq foot building.

Project Description

The Recreation Park parking and field constraints are still prevalent. We are going to shift the park renovation into a phased approach by expand the parking and athletic field at the Recreation Park. The 2019 Recreation Park engineering and design gave us a plan to follow in developing the property. Building the infrastructure allows us to eventually build a facility that meets the needs of the department and the community. This project would be eligble for the use of the Land, Water Conservation Fund grant.

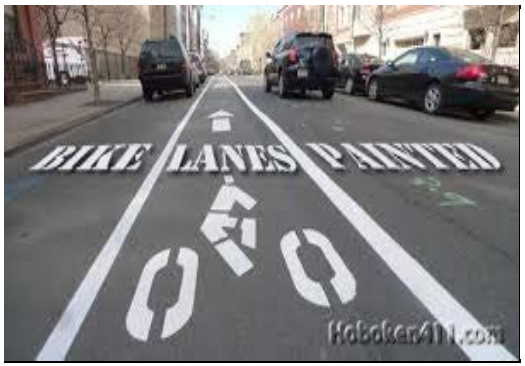
Externally Mandated (Y/N): No



Project Description

General Project Description:
Exeter has shown a commitment to bicyclists and pedestrians by several past projects involving establishing bicycle paths on Hampton Road, adding sidewalk connections on Winter St, Spring St, Epping Road, and continuing the sidewalk out Kingston Road, for example. However, the Town has no formal plan nor has it had any formal assessment on the whole as to which roads should be prioritized for cyclists and which streets should be targeted for future sidewalk connections or extensions for this purpose. This study would have as its deliverable a Bike & Pedestrain Master Plan that examines both walking and biking as modes of transportation beyond recreation. The plan would identify improvements to existing amenities and areas where new amenities could be feasibly installed to promote walking and biking as a viable alternative to automobile use. The plan would also develop a 10-year schedule for implementation. This plan is supported by the Town's Master Plan and is listed as a project under the action "Connect". This project was previously scheduled for 2020 but was deferred.

Project Ranking: _____ of _____
Useful Life (Years): TBD
Master Plan (Y/N): Yes
Growth Related (Y/N): Yes
Service Related (Y/N): No
Externally Mandated (Y/N): No

Project Description

This project would provide funding for a consultant to conduct an evaluation of Town and State roads in Exeter that could qualify to fall under a complete streets program. The concept of complete streets takes into account all manner in which a road/right of way can be used: pedestrians, bicyclists, automobiles, and other transportation needs (ie buses or other modes). A complete street may include sidewalks, bike lanes, special bus lanes, etc.. Currently the Town has no standing policy or a basis to adopt a policy regarding complete streets in Exeter. This study would review the potential to apply complete streets concepts in key areas of the Town that are known to be well traveled by bicyclists, important pedestrian areas, etc.. A strategic plan would then be devised around these concepts to give the Select Board, Planning Board, and Public Works Department guidance when large scale projects are being designed, such as the Portsmouth Avenue reconstruction. See www.completestreets.org for a review by the National Complete Streets Coalition, Washington DC.

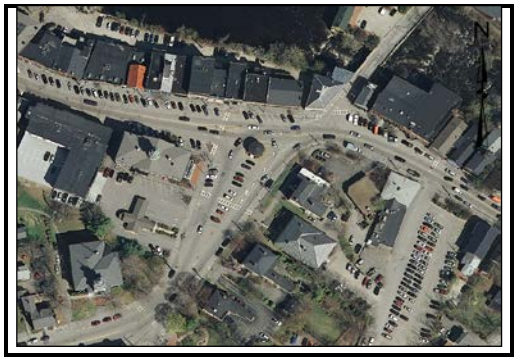
Service Related (Y/N): No

Contact Name: Dave Sharples

Externally Mandated (Y/N): No



Project Description

General Project Description:

Contract a qualified consultant to perform a comprehensive traffic and parking analysis of Exeter's Downtown District.
The consultant will provide a comprehensive review of all existing parking, public and private in our downtown. This will assess who uses the parking (residents, business customers, etc.), and what time of day the parking is being used. The consultant will also assess current downtown traffic patterns, use, congestion times, choke points and any identifiable stimuli that affect flow.

As a first step to the analysis, the consultant will review and consider all previous studies available regarding parking, traffic and pedestrian use patterns in the downtown. The consultant will provide potential solutions to improve traffic, parking and pedesrian flow challenges and the likely impact on our community should the solutions be implemented. The consultant wll create a dowtown parking management plan as one of the deliverables that will identify viable solutions that can be implemented over time.

Rationale:

To allow and inspire responsible commercial growth of downtown, Exeter must analyze and consider traffic, parking, and pedestrian use patterns. Existing businesses have consistently identified traffic flow/congestion and parking as major obstacles to their current operations and expansion opportunities. Potential businesses seeking to locate in downtown express traffic and parking as their key roadblock.
With recent public investment in the downtown (new sidewalks, infrastructure, bridges, etc.), Exeter has seen increased vibrancy and interest in the downtown.
This project is also listed in the 2018 Master Plan that states "Conduct traffic and parking studies for the Downtown and prioritize recommendations. Evaluate traffic flow and pedestrian movement to and through Downtown to understand final destinations and impacts on local businesses. Develop a parking management plan with a 6-year schedule for implementation."

Date Submitted: 7/16/2021

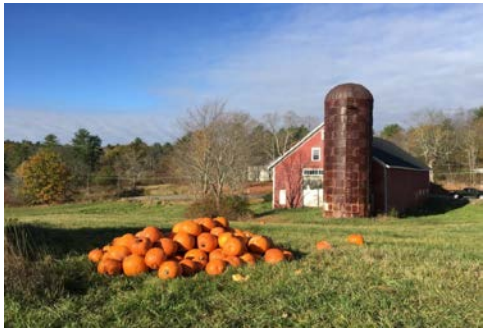
First Year Funding is Requested: 2022

Project Title: Raynes Barn Improvements
Project Type: Building Maintenance
Project Cost: $249,600

Department: Conservation Commission
Contact Name: Kristen Murphy

Project Ranking: ____ of _____

Useful Life (Years): 50+
Master Plan (Y/N): Yes
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

On behalf of the Town, the Conservation Commission acquired and maintains the 50 acre Raynes Farm property on Newfields Road. The property includes an active agricultural field, wooded streamside trail and Raynes Barn which is the largest remaining barn in Exeter. This historic structure, listed on the State Register of Historic Places, provides a tangible link for modern day Exeter to its agricultural past. The Conservation Commission and Raynes Farm Stewardship Committee has put considerable effort to expand public use of the site, now referred to as the Conservation Center at Raynes Farm.

Frequent visitors enjoy passive recreation opportunities such as hiking, bird watching, sledding and even bird dog training in the fields and on the trail. We have held numerous events on the property and in the barn such as full moon snowshoe and cocoa, fall festival and pumpkin toss, disc golf weekend, meetings and workshops. We consistently receive feedback about the potential this property has to further serve the public as a facility for use. Currently we are limited in our ability to expand use based on the physical condition of the barn itself.

At the time of acquisition it was known that long term maintenance would be a fiscal challenge yet through ongoing community support and funding we have made strides at addressing some key repairs. It is hoped that seeking costs for what is seen as the remaining list of major repairs in a single request will not only be a more efficient approach, lends easily to a single grant application for potential funding support and also brings the barn to a condition that could beter support community events. We have submittd an application for Land Community Heritage Investment Program (LCHIP) Grant Round in 2021 and have been given positive feedback about funding potential for the barn repairs given LCHIP's deeded interest in the land surrounding the barn.

**NOTE: We have applied for $100,000 LCHIP grant, and the Conservation Commission has committeed an up to $50,000 from the Conservation fund to reduce the town's warrant article request to to $100,000. The town requests are contingent on receiving the LCHIP grant.

2022 - 2027 CIP Project Request Form

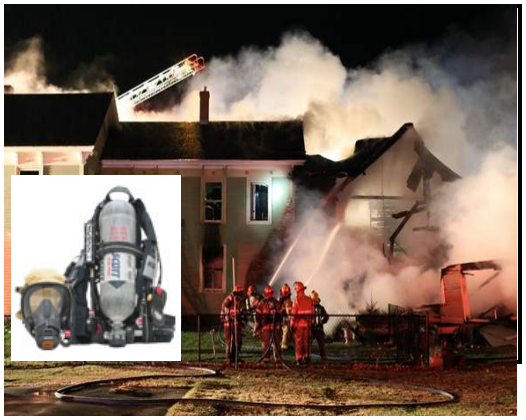
Date Submitted: 5/15/2021

First Year Funding is Requested: 2022

Project Title: Self-Contained Breathing Apparartus
Project Type: Equipment
Project Cost: $348,344

Department: Fire
Contact Name: Chief Eric Wilking

Useful Life (Years): 10
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): Yes



Project Description

1. General Project Description? This purchase would be a total replacement of the department's Self Contained Breathing Apparatus (SCBA). The projected cost is $348,344 or about $9,523 per unit. This money would be used to purchase 36 new SCBA units, with face mask, spare cylinder, a Rapid Intervention Team (RIT), Rescue Pack used during firefighter rescue/emergencies, and necessary SEMS gateway to allow software integration with our laptop computers to monitor our firefighters for safety while operating.

2. Rational? Only 33 of the 40 SCBA's purchased in 2011 are in service today. We require 34 units to provide breathing apparatus for each seated position on our apparatus, so as you can see we are already 1 SCBA short, and during the next 9 months until town meeting in March, we do anticipate more units be removed from service due to parts not being available, and honestly too costly to repair at approximately $3,500 each. The current air-packs had a 3 year full parts and labor warranty and a 7 to 10 year commitment from the manufacturer to have parts available. (NFPA) National Fire Protection Association standards, and industry best practices recommend replacement of these important life saving devices every 10 years. After that point NFPA compliance issues and technology changes make the units obsolete and very difficult to maintain, as well as subjecting the firefighters to additional safety concerns and an increased liability to the town. We sought to replace the units in 2021 and the project was deferred, again we are seeking to replace the units as they will be nearly 12 years old, if replaced in 2022. 7 units of the 40 SCBAs originally purchased have been taken out-of-service or used for parts to keep the remaining 33 in service. New lifetime factory warranties will help level or reduce the breathing apparatus maintenance line in the operating budget and provide the most up-to-date equipment to protect our firefighters and residents of Exeter.

3. Operating Budget Impact? The parts and service costs of our existing SCBA's have totaled $52,303 over the past 4 years, and as of June 17, 2021, we have already spent $9,100 of the $11,245 budgeted for repairs. This trend of annual service and repair costs can be predicted to only rise as the units continue to age. We have consulted with our current supplier and they feel confident that using $9,500 per unit replacement cost is a good CIP number looking ahead to 2022. We recommend exploring a 5 to 7 year lease purchase program, as was done with the units purchased in 2011, to help level out the expense over a longer period of time.

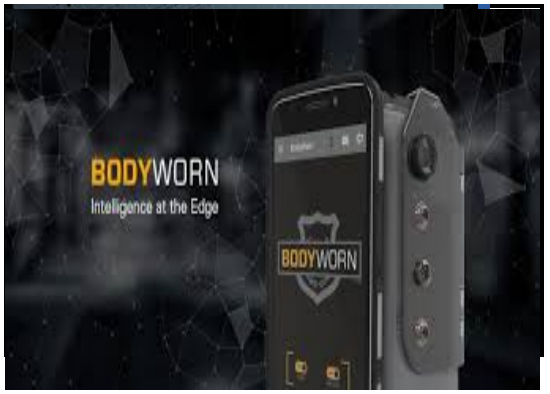
Date Submitted: 6/11/2021

First Year Funding is Requested: 2022

Project Title: Body Worn body Camera Implementatic
Project Type: Public Safety
Project Cost: $233,000

Department: Police
Contact Name: Chief Stephan Poulin

Useful Life (Years): 10 years
Master Plan (Y/N): No
Growth Related (Y/N): Yes
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

The Exeter Police Department is seeking to outfit all of its sworn officers (26 in total) with "Body Worn" cameras by Utility. Body cameras, once implemented, will help hold officers more accountable and make the Exeter Police more transparent in our proactive approach to preventing crime. The use of body cameras by the Exeter Police will result in several potential areas of benefit to include: quicker resolutions of citizen complaints, documenting the occurence and natrue of certain crimes, and offer training opportunities to enhance our policies and procedures for crime prevention and control. Body cameras in policing today have been successful as a way to help rebuild trust wihtin commjnities and have also been found to reduce citizen complaints. A 2014 study funded by the Offcie of Justice Porgaram Diagnostic Center found that the use of body-worn cameras: "led to increases in arrests, prosecutions, and guilty pleas. From an efficiency standpoint, the use of the techonology reportedly enabled officers to resolve criminal cases faster and spend less time preparing paperwork, and it resulted in fewer people choosing to go to trial (White, 2014). Total cost is $232,870 which includes a 5 year agreement, which requires a minimum of 30% upfront (year one) followed by 4 equal annual payments for the remaining contract. This is for 26 body cameras, 4 Rockets (the Rocket is the modem that goes into the trunk).

The cost is for 5 years, (all in, turn-key), which includes all uniform retros, plus $200 per officer, training, install and unlimited data and no licenses.

Source of funding may cause the price to decrease and fluctuate downward. Currently, the State of NH legislature is pursuing the establishment of a body-worn and in-car camera fund to offset some of the costs. The Town of Exeter/Exeter Police have also applied for Congressional Funding for this project and will be attempting to seek the assistance of a Federal grant as well.

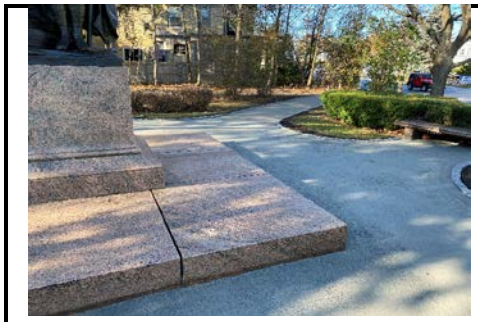
Project Title: Park Improvement Fund
Project Type: Multiple
Project Cost: $150,000.00

Department: Parks and Recreation
Contact Name: Greg Bisson

Useful Life (Years): 30
Master Plan (Y/N): Y
Growth Related (Y/N): Y
Service Related (Y/N): Y
Externally Mandated (Y/N): N



Project Description

The Park Improvement fund is important in the revitalization of our parks system. The following projects for 2022 would be examples of projects on the horizon that could be accomplished if funded.

Project 1: Pool Painting- The pool has not been painted in 7 years. The line markings are now fading and the paint is chipping. The chlorine in the pool takes a toll on the paint. It is imperative to keep the paint in good condition or it will lead to the deterioration of the pool wall.
Project 2: Pool Slide rehab- The pool slide is in need of some rehab. The structure is showing signs of rust and those parts will need to be replaced. The chlorine take a toll on the metal parts since they are not stainless steel.
Project 3: Gilman Park Playground- A small playground to compliment the pavilion will make Gilman Park a desired location for the residents to enjoy the beautiful summer days.
Project 4: Trees at Brickyard Park- Brickyard Park has no shade except for 1 tree. We would like to plant several trees inside the fence along the Kingston Rd. side of the park.
Project 5: Irrigation of Park St Common- With the playground planning on going adding irrigation to the park will create a healthy turf for the residents to enjoy.
Project 6: Picnic Tables- The pandemic taught people the value of being outdoors. To encourage more people to eat in our park system, we would look to place several recycled plastic picnic tables in the various parks such as park street common and founders park.

We have multiple park improvements not listed to accomplish in the parks due to the backlog of maintenance items. The items listed above are only a small fraction of the needed renovations and improvements.

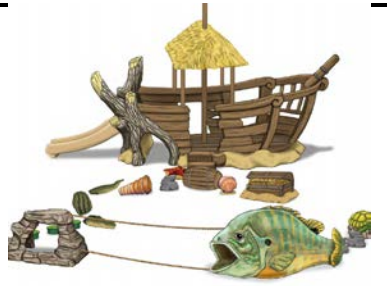
Externally Mandated (Y/N): N



Project Description

Planet Playground is an iconic park in Exeter that has become the destination park for the community. The playground is 25 years old and needs to be replaced. The playground property has been sold yet again but we are working with the landowner to adjust the lease or agree to a purchase and sale. The new lease/purchase make the property eligible for the grants such as Land, Water Conservation Funds. Securing a longterm solution for the playground to rebuild the playground on the same location is our long term goal. This project would entail removal of the entire structure and subsurfaceas well as construction of a new accessible playground.

Date Submitted: 6/18/2021

First Year Funding is Requested: 2022

Project Title: Great Bay Total Nitrogen General Permit
Project Type: Environmental
Project Cost: $424,600

Department: Public Works - Highway & Sewer
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 35
Master Plan (Y/N): YES
Growth Related (Y/N): NO
Service Related (Y/N): YES
Externally Mandated (Y/N): NO

Project Description

A new NPDES permit has been issued to NH communities with wastewater treatment facilities whose discharges reach Great Bay. The permit is for five years and includes an adaptive management process for possible nutrient reductions in non-point source (NPS) stormwater runoff. This voluntary NPS nitrogen reduction was included as a way to stem more stringent WWTF effluent restrictions at the end of the permit.

The NPS adaptive management framework consists of five categories:
- Water Quality Monitoring
- Nitrogen Tracking
- Nitrogen Source Reduction Plan
- Threshold Study
- TMDL - Total Maximum Daily Load timeline development

The Town entered into an Intermunicipal Agreement with other Great Bay communities to partner in this adaptive management framework including cost sharing resposibilities. The Town is required to submit to EPA an adaptive management plan for the permit term by July 30, 2021. Funding for these programs is anticpated to be funded partially through the capital improvement program, the highway stormwater budget and sewer budget. Discussions will need to take place for funding responsibility and allocations. Although the permit is necessitated by wastewater discharges, the NPS stormwater discharge improvements are generally paid from the general fund.

Elements of the Adaptive Management Plan that are included here in the capital improvement program include:
- Nitrogen tracking - annual software and upgrades $22,500 per year, plus $6,000 in projects for FY22 & FY23
- Nitrogen source reduction efforts
  - Advanced Septic System Program - $13,000 in FY22 to develop incentive program, then $90,000/yr starting in FY24
  - Stormwater nutrient removal - ID & prioritze locations for treatment (similar to Winter St mitigation) - $30,000/yr in FY22 & FY23
  - Fertilizer reduction eduction programs - $19,000 in FY22, $2,000 in FY23, $9,000 in FY24; $2,000 in FY25
- Threshold Study and TMDL timeline - $9,400/yr

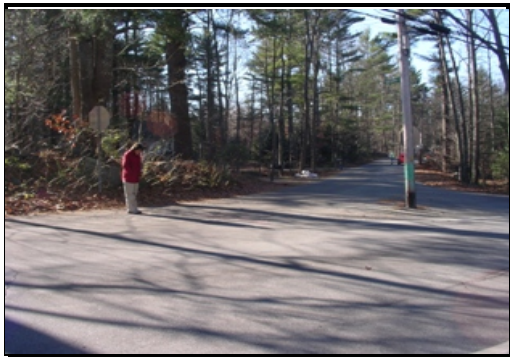
Externally Mandated (Y/N): NO



Project Description

General Project Description: Numerous unsignalized intersections within the Town of Exeter roadway system are poorly configured and are safety concerns. Increased traffic volumes, including bicycle and pedestrian use, lead to congestion and inefficiency and exacerbate problems. The first year of the program, FY 2019, established criteria to assess problem intersections and develop a prioritized improvement plan. Criteria include traffic counts, vehicle speeds, number of points of conflict, crash data, collision history, complexity of turning movements, and intersection geometry (sightlines). However, traffic congestion review was on hold because of reduced traffic flows during the COVID-19 pandemic. Work will continue in FY 2022 with the preliminary concept suggestions of needed improvements for additional intersections. As of the time for submission of this worksheet, a report has not been generated. FY22 will be utilized to review the reports findings. Funds are projected to FY23 to prepare a second round of intersection reviews. FY23 costs may include design and construction of intersection(s) that make it to the Master Plan for improvement.

For more information, see the "Unsignalized Intersection Improvement Guide" at www.ite.org/uiig/process.asp

The estimate of cost for this work is based on an engineering proposal for the intersection improvement program contract in FY19.

2022 - 2027 CIP Project Request Form

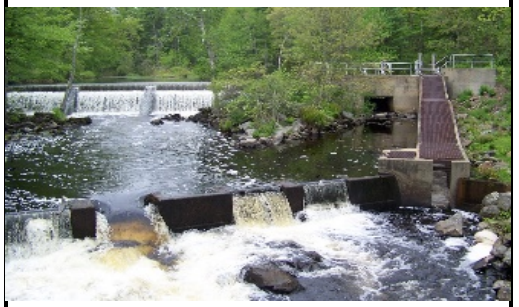
Date Submitted: 6/18/2021

First Year Funding is Requested: 2022

Project Title: Pickpocket Dam Modification
Project Type: Highway
Project Cost: TBD

Department: Public Works - Engineering
Contact Name: Paul Vlasich

Project Ranking: of
Useful Life (Years): 50
Master Plan (Y/N): YES
Growth Related (Y/N): NO
Service Related (Y/N): NO
Externally Mandated (Y/N): YES



Project Description

A Letter of Deficiency (LOD) was issued to the Town in March 2011 by the NHDES Dam Bureau. The LOD required a breach analysis to be performed and submitted to the Bureau. In January 2018, the Town submitted the breach analysis and survey performed by consultants. In March 2018, the Dam Bureau reclassified the dam from low-hazard to high-hazard because of the downstream impacts that would result if the dam failed. The high-hazard classification now requires additional planning, analysis and dam modifications. In FY19 CIP, $40,000 was approved for an update to the Emergency Action Plan (EAP) and to address breach analysis comments by NHDES. In FY20, $110,000 was approved to begin the analysis work. However, because of COVID-19 projected impacts on town revenues the consultant contract had been delayed. The design storm event was developed and the dam cannot accomodate the river flows at this flow rate and still meet NHDES dam discharge capacity requirements. This year's request is for $300,000 which when combined with FY20 funds will take the project to the end of the feasibility study.
The LOD requires a modification decision and dam modification application by June 2022, and construction completed by Dec 2025. These milestones cannot be met. An extension request of these deadlines by an additional two years was sent to the NHDES Dam Bureau.

While the solution to the Pickpocket Dam in unknown and will be solved by the feasibility study, the following costs are included based on the Great Dam Removal project in 2016. Using these figures does not suggest that the ultimate solution is dam removal. The Great Dam design and permitting = $400,000; Construction = $1,200,000. The town will apply for appropriate grants throughout this project as they become available. As of July 2021, an application for a SRF loan with the potential of $75,000 principal forgiveness and a $40,000 Coastal Resilience Grant have been submitted.

Project Description

1. General Project Description: To correct drainage utility, traffic flow, signal, roadway, stormwater, sidewalk and streetscape deficiencies in Portsmouth Avenue. The project timing allows for the planning studies of bike lanes, complete streets and downtown circulation to occur prior to developing improvement concepts.

2. Rationale: The project extends from High St to the vicinity of the Provident Bank. Phase I included sewer and watermain improvements and was approved for construction in 2013. Water and sewer improvements were finished in 2014 and the pavement overlaid in 2015. The drain lines are in a state of deterioration and will be corrected in Phase II. Traffic flow will be improved by adjusting lane configurations and coordinating traffic signals throughout the corridor.

3. Cost Estimate: Phase II costs were established by a consultant in 2012. The phases were originally proposed to be concurrent. However, through the 2013 CIP process it was decided to delay Phase II for later years. The 2012 estimates are as shown and the costs were adjusted 3% annually. $275,000 is recommended in FY24 to allow project development discussions to restart with stakeholders and to fine tune the draft plans that were prepared to date.

Phase II	2012 Estimate	2026 Projected	
Drainage Improvements	$ 525,000.00	$ 772,000	
Traffic Signals	$ 100,000.00	$ 295,000	
Road and Sidewalk	$ 1,945,000.00	$ 2,859,000	
Legal and Bonds	$ -	$ 35,000	
Construction Admin & Inspection	$ 265,000.00	$ 471,000	(12% of construction cost)
Total	$ 2,835,000.00	$ 4,432,000

Project Description

This project includes Garfield St, Kossuth St, School St, and Union St (including former Garfield Ct) where water, sewer, drainage, roads, and sidewalks have all been identified as deficient. The water mains in this area are 4-inch and 6-inch cast iron (CI) which have insufficient capacity for fire flows which were identified in the 2015 asset management plan as being a high priority. The sewer mains are 8-inch and 10-inch vitrified clay pipe (VCP) in poor condition and/or undersized. The drainage system has been identified as being in poor condition with the potential for flooding. The roads and sidewalks in this neighborhood are inadequate size and in poor condition. A portion of the annual paving budget could be used to offset some general fund construction costs.

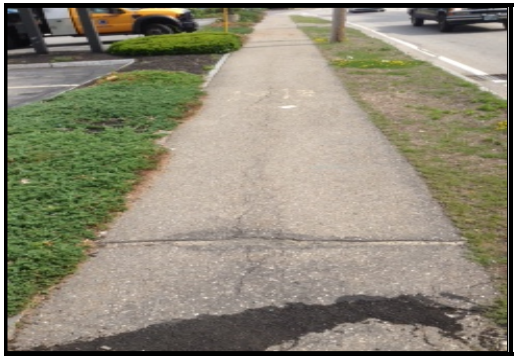
Externally Mandated (Y/N): NO



Project Description

This asset management program identifies the level of funding needed to reconstruct and repair deteriorated sidewalks. The sidewalk network in town consists of about 32 miles of sidewalk and had little to no funding for years preceding 2014. The Department inventoried and inspected the sidewalks in 2011; approximately 27% of sidewalks were in good condition, 41% in fair condition, 27% in poor condition and 5% in very poor condition. A sidewalk management program was developed using these data and linked to the Town's GIS for infrastructure management. The attached figure indicates areas of potential sidewalk projects. Future projects will be developed based on sidewalk condition, use and proximity to pedestrian-centric facilities and concurrent roadway paving projects. Sidewalk material will be concrete along arterial roadways within the urban compact areas and urban connectors; the remainder, and majority, will be asphalt.

In 2022 Linden Street will be reclaimed and paved (in the 2022 paving budget). The adjacent Linden Street sidewalk, approximately 1.2 miles in length from Gill Street to Sir Lancelot Drive, is in poor condition and needs to be reconstructed and paved next year. This sidewalk project has been submitted to the federal Community Projects list for NH, and is one of 10 projects from NH that are in consideration for funding. The federal program could contribute up to $240,000 (60%) of the total $400,000 project cost, with the Town responsible for $160,000 (40%). Subsequent annual expenditures continue to be recommended at $120,000 per year.

For more information, see the Sidewalk Presentation provided in 2014 at
https://www.exeternh.gov/sites/default/files/fileattachments/public_works/page/14771/sw14_presentation_june_30.pdf

Following is a summary of recent sidewalk improvements funded via the Sidewalk Repair and Replacement Capital Reserve Fund (CRF), project specific warrant article or SB 38 (2017) additional Highway Block Grant alotment.
2014: $80,000 added to Capital Reserve Fund (1st year established); High Street (from Great Bridge to Portsmouth Ave)
2015: $580,000 Warrant Article for Water St (Great Bridge to Swasey Parkway) and Front St (Water St to Spring St) constructed 2016
2017: $108,252 Warrant Article for Epping Rd, Spring St, Winter St NHDOT TAP Grant (Plan Dept managed, non CRF) construction 2020
2017: State issued $254,066 in additional Highway Block Grant (SB 38); $160,000 used for Lincoln St sidewalks in 2019
2018: $20,000 added to Capital Reserve Fund
2019: $60,000 added to Capital Reserve Fund
2020: $60,000 added to Capital Reserve Fund; current CRF balance $144,000

Project Description

A storm drainage system replacement or rehabilitation program was identified as a need based on the asset management plan was developed in Dececmber 2020.

Based on 2020 costs the average annual expenditure to renew the storm drainage system is $1,213,000 per year.

The rehabilitation funds are requested in FY25 after the School St Area addresses utility upgrades.

Project Ranking: _____ of _____
Useful Life (Years): Indefinite
Master Plan (Y/N): YES
Growth Related (Y/N): YES
Service Related (Y/N): YES
Externally Mandated (Y/N): NO

Project Description

1. General project description:
The construction of a granite seawall, with sidewalk, to form a full length walkway along the Squamscott River from Stewart Park to the end of the wooden "Riverwalk". The new seawall will provide the ability to expand waterfront access for recreation. Similar seawall construction at Stewart Park consists of dry laid granite blocks with brick walkway, and landscaping in keeping with the original waterfront construction as seen at String Bridge, and along the roadway behind the Water Street stores. The new granite seawall will replace the wooden walkway known as the "Riverwalk". The 1990's era wooden walkway is in deteriorated condition with worn uneven deck planks and checked and cupped railings. The wood walkway construction is approaching the end of useful lifespan of 25 years and will eventually need a full replacement if current use is to continue. The cost of replacement of the wooden walkway is yet to be determined and will include disposal, permitting, design submittals, and construction. The lifespan will remain at 25 years for a new replacement wood structure. Due to the short lifespan it is recommended that the investment in a granite seawall, with an indefinite lifespan, and full riverfront access will bring opportunities that do not exist with the wooden structure. A granite wall with either brick or concrete sidewalk will cost roughly $TBD per linear foot. The distance from Stewart Park to the String Bridge (southeasterly) end of the wooden walkway is 500 feet. Additional costs include wetlands survey, engineering, and permitting, for a budget of $TBDk.

2. Rationale:
Recent inspections have determined the wooden walkway planks and handrails can be spot repaired to extend the useful life of the structure for several years. The wooden structure will be evaluated annually to determine if spot repair or replacement is recommended.

3. Budget Impact:
To be determined

Total Capital Cost by Fiscal Year

Externally Mandated (Y/N): YES

Project Description

The Westside Drive area has significant sewer inflow/infiltration (I/I) issues and asbestos cement (AC) water mains that are nearing their useful lifespan. The I/I comes mostly from the private portion of the sewer system. Homeowners have a difficult time removing the flows from the sewer service because of the high groundwater, low permeability soils, and lack of available drainage systems. In FY20, the town approved $100,000 for the planning and concept design for this project. Included in that $100,000 is a $75,000 NHDES SRF loan with 100% forgiveness.
The roadways are wider than necessary which contributes excess stormwater due to impervious surfaces. The pavement will soon deteriorate to an unacceptable level, and the sidewalks need repair.
This area has high groundwater elevations which reduces the expected lifespan of AC water mains. Many areas of town where AC pipe is in use have had issues with electrolysis that corrodes the service saddle that connects to the main causing water main leaks. These water mains were installed in the mid-1960s and have experienced 10 water main breaks over the last 15 years.
This project will reduce I/I, improve water system reliability, and repair the roadway and sidewalks.

Project Description

General Project Description:

1. General Project Description?

This project started out as the Kimmins Brook Stormwater Mitigation project with the location near the Lincoln St school. The town applied for a FY21 Watershed Assistance Grant and was chosen to make a full proposal after a little more exploration. After conducting test pits to gather additional groundwater elevations, it was determined that the intended treatment system would not work in this location. The grant administrator allowed an alternate site to be used for the grant. This new site is located on Winter St and Kid's Park will be utilized for the stormwater treatment. This location is within the largest watershed within the town. This drainage area was studied by Waterstone Engineering under two grants that produced a report entitled, "Phase 1 and Phase 2: Lincoln Street Subwatershed Nutrient Control Strategies, Incentivizing Resiliency Through Implementation Plans in One of Coastal New Hampshire's Fastest Growing Communities, Final Report", dated March 2018. In the report, this stormwater mitigation improvement is referred to as BMP1. The grant selection team likes the opportunity to participate with the town on a regional stormwater treatement project that manages runoff from a large area of impervious cover.

2. Rationale?

This specific project will credit the town's nitrogen reduction for the non-point source nutrient reduction in the Great Bay Total Nitrogen General Permit. The intention of the structural Winter St BMP (Best Management Practice) is to infiltrate stormwater and nutrients into the ground. This project is expected to reduce nitrogen by 76% (68 lbs/yr) at this location.

3. Budget?

The following are the anticipated costs for this project:

Consultant design ($ 38,000) + Construction ($129,000) = $167,000 Total; 60% Grant = $100,200, 40% Town = $66,800

Project Description

Rationale: Additional groundwater sources are necessary to supplement the existing three groundwater sources (Stadium, Gilman and Lary Lane Wells) and the surface water sources (Exeter River & Exeter Reservoir) in accordance with the Town's Integrated Management Plan for water supply and to meet projected demands. The existing groundwater sources were developed in the 1950's and 1960's and are treated for iron, manganese and arsenic removal at the Lary Lane Groundwater Treatment Plant (GWTP) constructed in 2015, which has a capacity of 1.6 million gallons per day (MGD). Testing of the three existing wells in 2020 has indicated a total sustainable capacity of about 1 MGD, which is significantly less than originally projected. New groundwater supplies will allow more flexible rotation of the wells, allowing rest and recovery of all wells. If treatment is required, they can be piped to the GWTP to use the available capacity which the Town has already invested in. This will reduce the volume of water which must be treated at the Surface Water Treatment Plant which has a higher per-gallon treatment cost. Hydrogeologists and engineers working for the Town have identified 3 groundwater development zones where geophysical testing has been done and where test well work will be conducted in 2020 to identify the most favorable option to pursue. Once a site has been selected, next steps include well development and testing, permitting, production well installation, design and construction of a pumping station, access, electrical extension and piping to connect it to the existing system.

The project, which began with initial identification and evaluation of GW development zones in 2019, then geophysical and test well investigations in 2020, will be phased from 2021 to 2025 as follows:
2021 – Additional test well work and preliminary pump testing, preliminary hydrogeological report and production well drilling. PASSED
2022 – Safe yield, water quality testing, extended pump testing, environmental assessments and submission of final hydrogeological report.
2023 – Land acquisition and design of all required infrastructure.
2024 & 2025 – Construction of access road, electrical, pump station and water main connections.

Project Cost:
Budget estimates were prepared by hydrogeologic and engineering consultant team of Underwood Engineers and Emery & Garrett/GZA.

Item Cost:

Well development, testing, env. assessments, permitting & installation -	$1,000,000 approved in March 2021
Land acquisition, legal, administration-	$ 838,000
Pump station, access, electrical, sitework, water main to ex. system* -	$4,671,000*
Total-	$6,509,000

*Includes engineering and contingencies. To be conservative, costs are based on most distant potential well site in highest priority zone being pumped to Lary Lane GWTP. Actual costs will depend on the well location(s) and level of treatment required.

Project Description

A watermain replacement or rehabilitation program was established in FY10. The program suggested an expenditure of $1,400,000 every other year. The FY10 program was based upon known problem watermain areas at the time.

In May 2015, a Public Water System Asset Management Plan was prepared with the help of a NHDES grant. The following is an excerpt from Section 6.1 Recommendations and Conclusions section (page 44) of that report.

"Replacement of 1% of a system each year (a 100-YR replacement cycle) is a reasonable guideline, based on industry experience and analysis, for water systems that have historically maintained a regular replacement schedule. Although the Town has recently adopted a regular water main replacement program, a large backlog of work remains due to a historical lapse in regular replacement. In this case it is not unreasonable to expect replacement of up to 2% of the system per year. This would equate to approximately 6,900 linear feet of water main replacement each year as a guideline. Regular rehabilitation of water mains reduces main failures, leakage, and water quality issues."

2% annual = 6,900LF x $335/LF (avg) = $2,312,000
1.5% annual = $1,734,000
1% annual = $1,156,000

The department suggests less than a 2% annual replacement program because of the large costs involved. This program is proposed after the completion of the School St area reconstruction project.

Project Description

Description: The Court Street sewage pump station pumps sewage from the Linden and Court Street areas to the higher elevation gravity sewers located on High Street and the Pine Street and Court Street intersection. The station pumps use an older 6 inch 870 foot long force main (FM) to Pine Street and a newer 5,000 foot long 10 inch FM to the High Street and Gilman Lane manhole. During the April 2017 High Street sewer collapse, the 6 inch FM was used versus the regularly used 10 inch FM. This was very beneficial as it reduced the sanitary sewer overflow (SSO) at Gilman Lane, and the sewage volume pumped to the damaged High Street gravity sewer. However, the older 6 inch pipe was very restrictive and the three pumps strained to keep up with flow due to the restricted 6 inch size with a SSO nearly occurring. This proposed project would increase the FM size to Pine Street to either 8 inches or 10 inches. A process known as pipe bursting could be used to enlarge the existing line in place, or a new 8 inch or 10 inch directional bored pipeline could be installed. The 10 inch directional bore option, while more costly, is preferable as it entails less risk than pipe bursting and provides a desirable larger diameter FM pipe. Recent sewage collection system events, such as the High Street sewer collapse, have shown that proactive upgrades of infrastructure are less costly than reactive projects.

Rationale: In addition to the force main upgrades, new pumps should be installed due to the current pumps having exhausted their useful life. Parts are no longer readily available, and new parts have to be built and machined from scratch. New pumps would be more energy efficient and sized properly to handle current and future sanitary sewer flows

Project Description

Description: The Town of Exeter has about 12,525 feet of cross country sewer main that travels by gravity through the woods from Phinney Lane to High Street at the Gilman Lane Intersection. The project would consist of permitting in areas of wetlands, donnage installation for remote access the pipe and manhole locations, cleaning and inspection of the pipe conditions, reline and rehabilitate sewer main and manholes.

Rationale: The Town needs to make sure there is proper capacity and structural integrity to the sewer mains that are difficult to clean, inspect and repair. Expansion requests from commercial properties on the East Side of Exeter have been received. We are trying to confirm capacity and conditions of infrastucture before granting expansions. Need to develop a plan with consulting assistance for permitting, coordination, rehabilitation, new installation. To gain capacity through relining and rehab, the projects would be geared toward reducing any Inflow and Infiltration (I & I), or through manhole rehabilitation. If additional capacity is necessary more than rehabilitation can provide, then a new sewer main will need to be designed and constructed.

Additional the pipe condition needs to be checked. It is the same type of pipe, reinforced concrete (RCP), that failed on High St and caused a massive sewer collapse. Inspections from that event showed the concrete had deteriorated and broke away showing the rebar that's used when making the pipe. The pipe essentially grew 3 inches in diameter from 15 inches to 18 inches. Another failure could potentially occur on this cross country pipe in the woods with very limited access to make repairs.

This sheet was developed after reviewing the benchtop sewer capacity analysis done in 2020. This cross country line was shown to have capacity issues. In 2021, verification of the sewer capacities within the actual sewer mains are being done at the locations called out in the intiral study.

Costs:
12,525 feet of sewer main @ $115 per foot(?) = $1,440,375
10 Manhole rehabs @$15,000 per structure = $150,000
Engineer Services =$200,000
Construction =$350,000
Contingency =$359,625

Project Description

A sewer line replacement or rehabilitation program was established in FY10. The program suggested an expenditure of $850,000 every other year. The FY10 program was based upon known problem sewer main areas at the time.

A sanitary sewer asset management plan was developed in Dec 2020. Based on 2020 costs the average annual expenditure to renew the sewer mains is $1,284,000 per year.

The rehabilitation funds are requested in FY25 after the School St Area addresses utility upgrades.

Project Description

The Squamscott sewer siphon project was previously funded in FY20 along with the Webster Ave pumpstation design for $1,600,000. Siphon design and construction was expected to be $1,400,000. During investigations of the existing siphons, the current pipes were in failure mode. The solution was to replace these existing siphons along with an additional barrel for future flow accomodations and heavy rainfall (I & I) situations. Possible funding mechanisms for these replacements are potential Federal recovery funds or sewer reserve funds. If these funding mechanisms are possible then substantial savings are possible by not phasing the project. However, if these funding mechanisms cannot delivered the needed investment then the less desirable phased project would be required. This represents a funding shortfall of $1,500,000 for the phased and less desirable approach.

Project Description

Description: This project would be to install a new biosolids drying unit to reduce the amount of water within the biosolids that are hauled off site to a landfillor other sludge processing location. By drying the sludge, it reduces the water weight that is trucked, expands the usefulness of the biosolids so it can be hauled to more locations, reduce the hauling charges, etc.

Rationale:

Project Description

Description: The Webster Avenue sewer pump station pumps sewage from the Portsmouth Avenue sewer-shed over Jady Hill to the sewer collection system to the two 8-inch siphons under the Squamscott River which in turn flow to the Main Pump Station on Water Street. This project would upgrade and increase the current flow capacity at the Webster Avenue sewage pump station from 800 gallons per minute gpm) up to 1,200 gpm. Improvement modifications would include deepening the wet well that the three station pumps draw from. The current existing wet well restricts pumping capacity as it is too small in volume and too shallow in depth. The pumps can be damaged due to cavitation (air forming in the pipes). To avoid this, the flow rates currently must be reduced decreasing overall pump station capacity and efficiency. A second new 10 inch or larger force main at 1,940 feet in length would be installed from the station to parallel the existing 8-inch pipe which terminates at 55 Jady Hill Avenue. Other maintenance/upgrade tasks include a flow meter and force main shut-off valves with drain-back piping which would allow improved maintenance and emergency repair response.

Rationale: This project would be done in conjunction with, or following, the increased flow capacity Squamscott River siphon project. Between this proposed pump station and siphon projects, increased future sewer user capacity such as a sewer extension to Holland Way, Hospital expansion, or development along Portsmouth Avenue would be possible. In addition, these projects generally reduce the probability of sanitary sewer overflows (SSO).

Design of the Webster Pump Station rehabilitation is underway in 2020. This $5.2 million cost is for design completion and construction in 2022.

An application has been submitted to NHDES Clean Water State Revolving Fund for consideration to assist with project funding.

Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No

VIN #:1FDXE4FS8GDC37933

Project Description

1. General Project Description? Replace 2016 Ambulance with new.

2. Rationale? This vehicle is in service today. With the ever increasing EMS call volume, over 2,100 calls per year, it is very important to keep on a regular vehicle replacement schedule. This is necessary to have reliable ambulance service for the residents and visitors of Exeter. This vehicle is a primary response vehicle and we have seen an increase in out-of-service time and increased maintenance cost as the vehicle ages. **This vehicle receives a Mercury Fleet Study score of 29, which is indicated as "Qualifies for Replacement" with 3,792 engine hours and equivalent road mileage of 125,136 miles.** The vehicle after 6 years could provide a quality "reserve" ambulance if space was available, and still has moderate trade-in value (+/- $15,000) creating the best value for the Town of Exeter, should we decide to apply the trade value to the vehicle purchase.

3. Operating Budget Impact? This vehicle will be funded from the Ambulance Revolving Fund. The BOS needs to approve the use of funds from this account, and if approved the purchase of this vehicle would have no impact on the tax rate. It would be paid for by the users of the ambulance. A new vehicle would likely reduce the expenses from the Ambulance Revolving Fund, as new vehicle warranties and reduced maintenance costs would be realized. Improvements in vehicle engines and emissions have reduced fuel consumption and lessoned the carbon output as compared with existing older vehicles.

Externally Mandated (Y/N): No

Project Description

1. General Project Description? Replace a 2014 Ford Explorer with a new Hybrid Ford Explorer. We have explored the use of electric and/or hybrid vehicles and believe the vehicle that serves as Department Head Transportation, command & control at emergency incidents, and is occasionally used to move personnel and equipment to emergencies, practical training exercises and classes, is an ideal candidate for an hybrid vehicle replacement. The new vehicle will be large enough to fit 4 personnel with all associated protective equipment & turnout gear.

2. Rationale? The 10 year old vehicle will is become more difficult to predict service & maintenance needs. **This vehicle receives a Mercury Fleet Study score of 23 with 2,508 engine hours and equivalent road mileage of 82,764 miles**. With any older vehicle unexpected costs in addition to routine maintenance always has the potential to be higher than budgeted in the operating portion of the budget.

3. Operating Budget Impact? A new hybrid vehicle will reduce operating costs, fuel consumption and provide for a more sustainable future for the Town of Exeter. Vehicle, Hybrid Ford Explorer - $34,750; Radio - $6,500

2022 - 2027 CIP Project Request Form

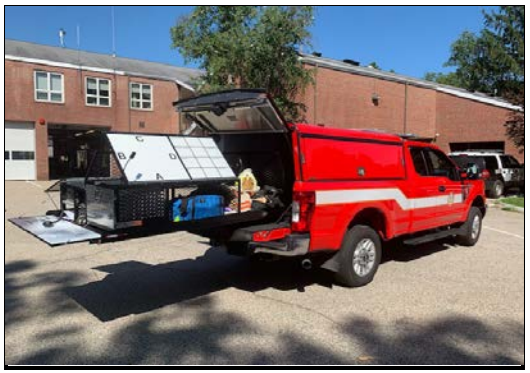
Date Submitted: 5/15/2021

First Year Funding is Requested: 2022

Project Title: Car 3 Replacement
Project Type: Vehicles & Heavy Equipment
Project Cost: $47,969

Department: Fire
Contact Name: Chief Eric Wilking

Useful Life (Years): 10
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description? Replace a 2010 Ford Expedition with a new Ford F250 Pickup, a more standard and versatile vehicle. While we have explored the use of electric and/or hybrid vehicles, they currently do not meet the department needs for a vehicle larger enough to transport necessary personnel and equipment, as well as serve as a tow vehicle for department trailers and boat. We have also looked at vehicles with increased fuel mileage and reduced fuel consumption, as compared with existing older vehicles. The current vehicle currently serves as the command post at emergency incidents and is used to move personnel to emergencies, practical training exercises and classes. The new vehicle will be large enough to fit 4 personnel with all associated protective equipment & turnout gear, serve as a command post at emergency scenes, and transport response trailers and boat to training and emergency incidents

2. Rationale? With increased awareness of cancer and the known carcinogens associated with fire and our turnout gear, the enclosed bed of a pickup truck helps reduce the likely contamination of the interior of an SUV style vehicle. A pickup truck style vehicle is far more versatile and could be used for many different assignments while still being available for use as a command vehicle at emergency incidents.

3. Operating Budget Impact? The 12 year old vehicle is becoming more difficult to predict service & maintenance needs. This vehicle receives a Mercury Fleet Study score of 33, which is indicated as "Needs Immediate Consideration" with an odometer reading of 104,228 miles. With any older vehicle unexpected costs in addition to routine maintenance always has the potential to be higher than budgeted in the operating portion of the budget. In May, 2021 we received information from the public works mechanic that the vehicle will require new suspension and sway bars, replacement of both side rocker panels ($4,000), and significant frame and undercarriage work to remove corrosion if it is not replaced soon. A new vehicle has the potential of reducing the operating budget while the new vehicle warranty is in effect and reduced maintenance costs with a new vehicle should be realized. Vehicle, F250 Pick-up - $31,640; Cap with lighting $4,675; Lights/Siren/Lettering - $9,300; Slide out tray with space for command & control equipment & radio - $2,353.60 **The cost of the vehicle was reduced from our 2020 request of over $53,000 due to utilizing existing equipment. We will re-use existing radio & equipment from the 2010 Ford Expedition. This is not ideal however, the equipment is in fair condition and will be re-used to reduce the overall cost of the vehicle.

2022 - 2027 CIP Project Request Form

Date Submitted: 5/15/2021

First Year Funding is Requested: **2027**

Project Title: **Engine 3 Replacement**
Project Type: Vehicles & Heavy Equipment
Project Cost: $575,000

Department: Fire
Contact Name: Chief Eric Wilking

Useful Life (Years): **15/20**
Master Plan (Y/N): **No**
Growth Related (Y/N): **No**
Service Related (Y/N): **Yes**
Externally Mandated (Y/N): **No**

Project Description

1. General Project Description? Replace the 2007 Crimson Pumper (Engine 3) with a new 1500 GPM engine.

2. Rationale? This vehicle was placed in service in April, 2007. The cost of the engine in 2007 was $420,189. Over $70,000 has been spent on the engine since 2007. **This vehicle receives a Mercury Fleet Study score of 37, which is indicated as "Needs Immediate Consideration" with 3,063 engine hours and equivalent road mileage of 101,079 miles.** This vehicle is in service today. The vehicle has already had corrosion repairs and re-paint in 2015, and is starting to show more signs of electrical system and HVAC system The recent CPSM study recommends the EFD consider, budget permitting, a change to a 15-year replacement schedule for engine apparatus, with an additional 5 years of service in "reserve". Apparatus over 15 years of age often include only a few of the safety upgrades required by the most recent editions of NFPA 1901 (NFPA 1901 is generally updated every five years).

3. Operating Budget Impact? A new vehicle would likely reduce the operating budget as new vehicle warranties and reduced maintenance costs would be realized. Improvements in vehicle engines and emissions have reduced fuel consumption as compared with existing older vehicles. We would recommend a 5 year lease/purchase as with previous engines to keep a level debt service, and follow the CPSM recommended 15 years replacement schedule with an additional 5 years of service in "Reserve Status" for engine/pumpers.

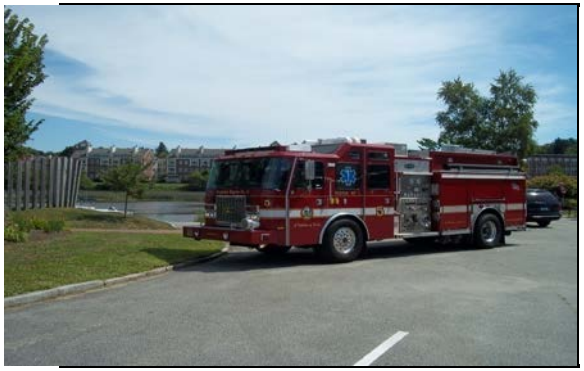
2022 - 2027 CIP Project Request Form

Date Submitted: 5/15/2021

First Year Funding is Requested: 2022



Project Title: Engine 5 Replacement
Project Type: Vehicles & Heavy Equipment
Project Cost: $650,000

Department: Fire
Contact Name: Chief Eric Wilking

Useful Life (Years): 15/20
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No

Project Description

1. General Project Description? Replace the 2002 E-ONE Pumper (Engine 5) with a new 2000 gallon Tanker/Pumper.

2. Rationale? This vehicle was placed in service in May, 2002. The cost of the engine in 2002 was $371,620. Over $100,000 has been spent on the engine from 2002-2020, with over $55,000 in 2019 and 2020. The light tower and alternator have needed repairs and pump packing/valves replaced at a cost of over $20,000. Many of these repairs are designed to keep the unit in service, but are not total replacements or meant to last a significant length of time. In May, 2021 we received information from the public works mechanic that the engine will require a new radiator ($8,000-$10,000), and significant frame and undercarriage work to remove corrosion if it is not replaced soon. This vehicle receives a Mercury Fleet Study score of 51, which is indicated as "Needs Immediate Consideration" with 4,778 engine hours and equivalent road mileage of 157,674 miles. This vehicle is in service today but is starting to show significant signs of corrosion, wiring decay, pump inefficiency, and age. The recent CPSM study recommends the EFD consider, budget permitting, a change to a 15-year replacement schedule for engine apparatus, with an additional 5 years of service in "reserve". Apparatus over 15 years of age often include only a few of the safety upgrades required by the most recent editions of NFPA 1901 (NFPA 1901 is generally updated every five years). The CPSM study also indicates that we consider the purchase of a Tanker/Water Tender, to provide more water during a fire in the rural areas of town without municipal water supplies. The replacement of the current engine with a tanker/pumper can fulfill the intent of both recommendations.

3. Operating Budget Impact? A new vehicle would likely reduce the operating budget as new vehicle warranties and reduced maintenance costs would be realized. Improvements in vehicle engines and emissions have reduced fuel consumption as compared with existing older vehicles. We would recommend a 5 year lease/purchase as with previous engines to keep a level debt service, and follow the CPSM recommended 15 years replacement schedule with an additional 5 years of service in "Reserve Status" for engine/pumpers. Our hope is to have the warrant article before the voters in March, 2022 as the vehicle will have a 300-360 day build time and be delivered in early 2023.

Project Description

1. General Project Description? Replace a 2012 Jeep Patriot with a new Hybrid Ford Explorer. We have explored the use of electric and/or hybrid vehicles and believe the vehicle used by the fire inspector to be an ideal candidate for our first hybrid. The current vehicle currently serves as the vehicle for the fire inspector and is used occasionally to transport firefighters and equipment to emergency incidents and training activities. The Ford Explorer, the same as used by the Exeter Police as a patrol car, should provide enough space to fit 4 personnel with all associated protective equipment & turnout gear.

2. Rationale? The 10 year old vehicle is too small to accommodate necessary equipment and turnout gear used by the fire inspector. It is also becoming more difficult to predict service & maintenance needs. **This vehicle receives a Mercury Fleet Study score of 24, which is indicated as "Qualifies for Replacement" with an odometer reading of 50,616 miles.** With any older vehicle unexpected costs in addition to routine maintenance always has the potential to be higher than budgeted in the operating portion of the budget.

3. Operating Budget Impact? A new hybrid vehicle will reduce operating costs, fuel consumption and provide for a more sustainable future for the Town of Exeter. Vehicle, Hybrid Ford Explorer - $34,750; Radio - $6,500

Project Description

1. General Project Description? Replace a 2008 Ford F350 Pick-up with a new Ford F350 Pickup with plow package. While we have explored the use of electric and/or hybrid vehicles, they currently do not meet the department needs for a vehicle larger enough to transport necessary personnel and equipment, plow snow and serve as a tow vehicle for department trailers and boat. We have looked at vehicles with increased fuel mileage and reduced fuel consumption, as compared with existing older vehicles. The current vehicle currently serves as a utility vehicle with snow plow and is used to pull both emergency and non-emergency trailers to incidents scenes and projects around town, as well as pick up used equipment after fires and other incidents.

2. Rationale? The 15 year old vehicle will become more difficult to predict service & maintenance needs. We had Exeter Public Works Mechanics replace the corroded body mounts and cross members in 2018 and they feel it will be serviceable for 3-4 mores years. **This vehicle currently receives a Mercury Fleet Study score of 35, which is indicated as "Needs Immediate Consideration" with 3,007 engine hours and equivalent road mileage of 99,231 miles** With any older vehicle unexpected costs in addition to routine maintenance always has the potential to be higher than budgeted in the operating portion of the budget. A Ford F350 pickup truck will help standardize both our fleet and the town's vehicle inventory. Service needs, parts and inventory at the DPW service area can be better managed and less potential inventory or common items could be bulk purchased for additional savings.

3. Operating Budget Impact? A new vehicle has the potential of reducing the operating budget while the new vehicle warranty is in effect and reduced maintenance costs with a new vehicle should be realized. Vehicle, F350 Pick-up - $38,222; Plow package - $6,200; Radio - $6,500; and Lights/Siren/Lettering - $6,326.

EVT conversion from engine hours to miles is 33 mph — 3,007 — **99,231**

Type of Service: 1, 3, or 5 points are assigned based on type of service

1 point for Department Heads & Commuter use

3 points for meduim duty, ambulances, parks & rec, service vehicles

5 points for rough duty, plows, fire engines,etc…

Reliability: Points are assigned depending on the frequency that a vehicle is in the shop for repair

1 point for a vehicle in the shop once every 3 months for Preventive Maint

2 points for a vehicle in the shop once every 2 or 3 months

3 points for a vehicle in the shop each month for repairs

4 points for a vehicle in the shop twice a month for repairs

5 points for a vehicle in the shop 3 or more times a month

Maintenance & Repair Costs: Points are assigned based on total life Maintenance & Repair costs

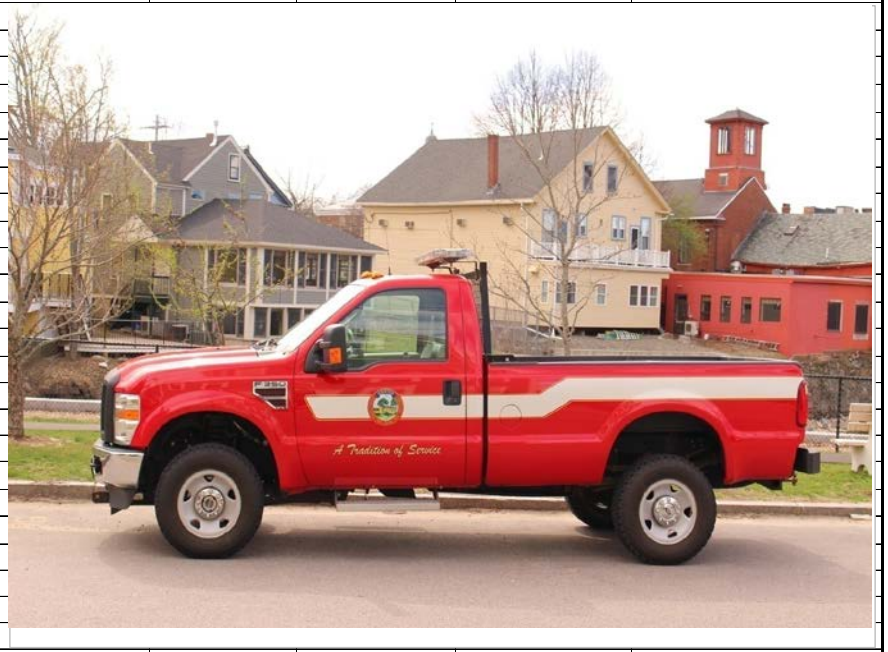
1 point for maintenance & repair costs less than 20% of original purchase cost

2 points for maintenance & repair costs totalling 20-40% of original purchase cost

3 points for maintenance & repair costs totalling 40-60% of original purchase cost

4 points for maintenance & repair costs totalling 60-80% of original purchase cost

5 points for maintenance & repair costs totalling 80-100% of original purchase cost



Condition: This category takes into consideration body condition, rust, interior condition, accident history, anticipated repairs, etc…

1 point for like new condition

2 points for excellent condition

3 points for good condition

4 points for fair/average condition

5 points for poor condition (Not Inspectable)

2022 - 2027 CIP Project Request Form

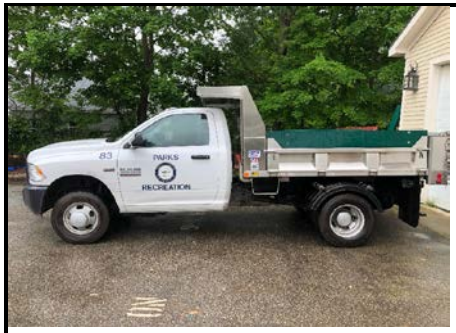
Date Submitted: 6/11/2021

First Year Funding is Requested: 2026

Project Title: Replace Dump Truck #83
Project Type: Parks Vehicles
Project Cost: $50,000

Department: Parks and Recreation
Contact Name: Greg Bisson

Project Ranking: 1 of 4
Useful Life (Years): 8
Master Plan (Y/N): no
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

General Project Description- Truck #83 was replaced in 2018. This truck will not be used for any plowing operations as it is not equiped for it.

Rationale- This vehicle is the on of the primary trucks for the Departments.

Operating Budget Impact- The price was developed from the NH State bid from 2018 + 4.5% (1yr) + costs of strobe lights, miscellaneous parts, stainless steel body (Donovon Equip), and radio; Current vehicle has **35,422 miles**; This price does not reflect a trade at this time.

2022 - 2027 CIP Project Request Form

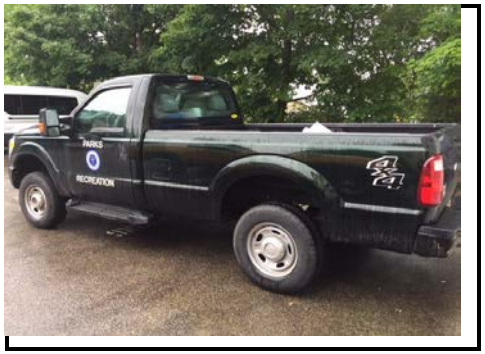
Date Submitted: 6/11/2021

First Year Funding is Requested: 2024

Project Title: Replace Truck #84
Project Type: Parks Vehicles
Project Cost: $60,000

Department: Parks and Recreation
Contact Name: Greg Bisson

Project Ranking: 3 of 4
Useful Life (Years): 12
Master Plan (Y/N): no
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description- Replace the existing Parks & Recreation vehicle Truck #84 with 1 ton truck 4x4 with a dump body and plow package. The truck was purchased in 2012. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS). The truck repairs have been routine maintenance.

2. Rationale- This vehicle is the on of the primary trucks for the Departments. Adding dump body enables us to do more things such as transport loam, mulch, rocks, grass clippings and more. The plow package would enable us to continue to assist in plowing town facilities.

3. Operating Budget Impact- The price was developed from the NH State bid + 4.5% inflation rate (8 yrs) + costs for strobe lights, miscelaneous parts, Plow and equipment ($5,000), and radio ($2,000); Current vehicle has 24,250 miles; This price does not reflect a trade.

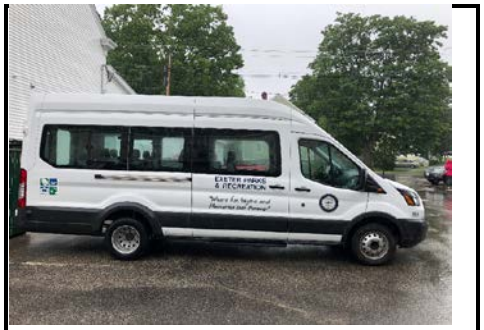
Externally Mandated (Y/N): No



Project Description

1. General Project Description- Replace the existing Parks & Recreation vehicle Van #85 to purchase an ADA accessible van. The current van was purchased in 2010. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS). The van repairs have been routine maintenance.

2. Rationale- This vehicle is used during everyday activities, travelling to events, and used to transport residents. Adding an ADA van . Entering into a vehicle purchase lease with a yearly payment would pay for itself after 5 years.

3. Operating Budget Impact- The price was an estimated price; Current vehicle has 42,769 miles; This price does not reflect a trade which the current van has no value except for internal use.

2022 - 2027 CIP Project Request Form

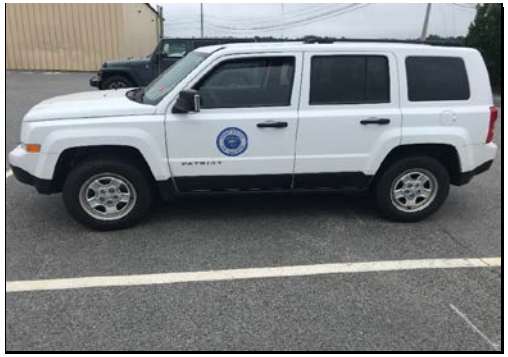
Date Submitted: 5/15/2021

Year Funding is Requested: 2022

Project Title: Replace #65 Jeep Patriot w/Ford Explorer Hybrid AWD
Project Type: Vehicles & Heavy Equipment
Project Cost: $44,750

Department: Highway
Contact Name: Jay Perkins

Project Ranking: _____ of _____
Useful Life (Years): 8
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: SUV #65 is a 2013 Jeep Patriot 4x4 utility vehicle and is used by the highway superintendent daily including nights and weekends for emergency calls. This vehicle is a 24/7 first response vehicle . The department requests a larger vehicle, the Ford Explorer Hybrid AWD because of the jeeps age, limited space and lack of electrical power. Because this is a first response vehicle it is equipped with the following : Cold weather & Rain gear, Emergency spill kit , Traffic signal tools & testing equipment, Chain saw , First aid kit , Fire extinguisher, Tow strap/chain, booster battery pack, Traffic cones, Hand tools , Road watch temperature system , Computer, Radio equipment and other equipment depending on the season. The miles are mostly in town stop & go miles so the engine and drive train have many more engine hours than miles.

2. Rationale: This vehicle is starting to show its age with problems for example the 4WD stops working at times and the charging system is not capable to keep up with all the electronics in the vehicle including emergency strobe lights so had to be boosted many times in colder weather. The radio emergency strobe lights and all electronic equipment will be swapped from the old vehicle because its in good working order. This vehicle responds directly to any event without going to the DPW for gear .

3. Operating Budget Impact: SUV #65 will be swapped for Sedan #13 for the WWTF vehicle.

Is this vehicle assigned to or used by more than one department? If so, list additional department: No

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.) 7 days/week

Assigned to Single Operator? (Y/N): Yes Highway Superintendant

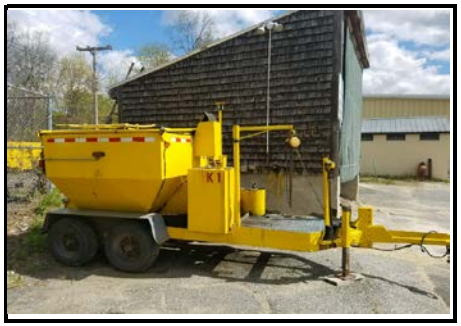
Project Title: Replace Pavement Hot Box #60
Project Type: Vehicles & Heavy Equipment
Project Cost: $59,481

Department: Public Works
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 20
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: Replace the existing Highway Hot Box #60 with Falcon Hook Body or Trailer

2. Rationale:

3. Operating Budget Impact: The price was developed from the 2005 purchase price + 4.5% inflation rate (20 yr) + costs for strobe lights, miscellaneous parts, stainless dump body (Donovan Equip), new lifting crane, and radio. This price does not reflect a trade at this time.

Is this vehicle assigned to or used by more than one department?

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.)

Assigned to Single Operator? (Y/N):

Vehicle Category	*Recommended Replacement Years/Miles*	*Age*	*Miles/Hours Nearest 10,000*	*Type of Service*	*Reliability*	*Maintenace & Repairs Costs*	*Condition Interior/Exterior*	*Total Points*
Misc. Equipment **Chippers, Welders, Trailers**	15 years	16	0	3	2	1	3	25

Age: 1 point for each year of chronlogical age, based on in-service date

Miles/Hours: 1 point for each 10,000 miles or 750 hours

Type of Service: 1, 3, or 5 points are assigned based on type of service
1 point for Department Heads & Commuter use
3 points for meduim duty, ambulances, parks & rec, service vehicles
5 points for rough duty, plows, fire engines,etc…

Reliability: Points are assigned depending on the frequency that a vehicle is in the shop for repair
1 point for a vehicle in the shop once every 3 months for Preventive Maint
2 points for a vehicle in the shop once every 2 or 3 months
3 points for a vehicle in the shop each month for repairs
4 points for a vehicle in the shop twice a month for repairs
5 points for a vehicle in the shop 3 or more times a month

Maintenance & Repair Costs: Points are assigned based on total life Maintenance & Repair costs
1 point for maintenance & repair costs totalling 20% of original purchase cost
2 points for maintenance & repair costs totalling 40% of original purchase cost
3 points for maintenance & repair costs totalling 60% of original purchase cost
4 points for maintenance & repair costs totalling 80% of original purchase cost
5 points for maintenance & repair costs totalling 100% or greater of original purchase cost

Condition: This category takes into consideration body condition, rust, interior condition, accident history, anticipated repairs, etc…
1 point for like new condition
2 points for excellent condition
3 points for good condition
4 points for fair/average condition
5 points for poor condition (Not Inspectable)

Date Submitted: 5/15/2021

Year Funding is Requested: 2022

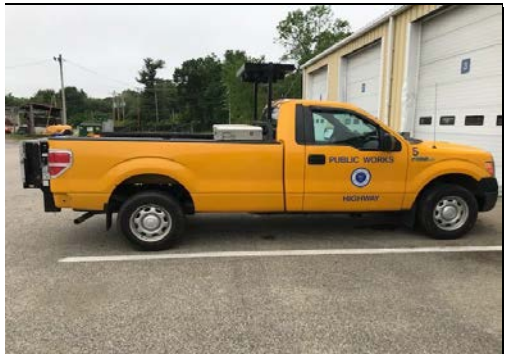
Project Title: Replace 1/2-Ton Truck #5 with 1/2-Ton Hybrid
Project Type: Vehicles & Heavy Equipment
Project Cost: $51,252

Department: Public Works
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 8
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: Replace the existing Highway Ford F150 4x2 Truck #5 with a F150 Hybrid AWD with plow package if available. The truck was originally purchased in 2011 for $16,925. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS), and is currently delayed by 3 years for replacement. The truck repairs have been routine maintenance.

2. Rationale: This vehicle is one of the Highway Department vehicles used during everyday activities, and one of the departments on-call trucks. Used with vehicle-mounted arrow board during traffic control operations. It is also used to transport manually operated snow blowers to clear cross walks, building approaches, ramps, train station and Lincoln Street.

3. Operating Budget Impact: The price was developed from the 2019 NH State bid list + 4.5% inflation rate (3 yr) + costs for strobe lights, miscellaneous parts ($1,000), plow frame and plow equipment ($7,500), and radio ($3,000). This price does not reflect a trade.

Is this vehicle assigned to or used by more than one department? No. If so, list additional department:

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.) 7 days/week

Assigned to Single Operator? (Y/N): No

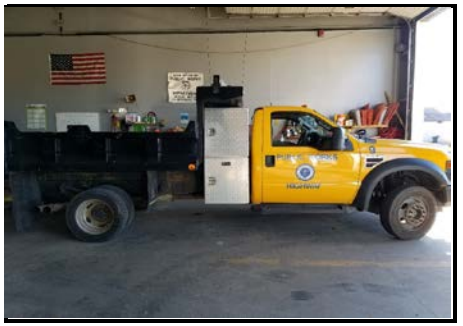
Project Ranking: _____ of _____
Useful Life (Years): 8
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: Replace the existing Highway 1-ton Truck #9 with a 1.5-ton "Switch and Go" Hook truck F-550. This truck was originally purchased in 2007 for $47,167. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS), and is currently delayed by 7 years for replacement. The vehicle repairs have been routine maintenance plus major work including dump body replaced and diesel particulate filter and emissions have required frequent repairs. The current engine is a diesel; the replacement truck will be gasoline.

2. Rationale: This vehicle is one of the main Highway vehicles used daily for light-duty hauling, landscaping, asphalt work, tool and personnel transport. Lift used for drainage and catch basin maintenance and rebuilding with pavement saw, compactor and pallets of materials.

3. Operating Budget Impact: The price was developed from a 2018 purchase price + 4.5% inflation rate (4 yr) + costs for strobe lights, miscellaneous parts, stainless dump body (Donovan Equip), new lifting crane, and radio. This price does not reflect a trade at this time.

Is this vehicle assigned to or used by more than one department? No. If so, list additional department:

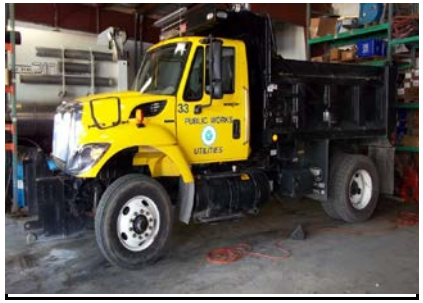
Project Title: Replace 6-Wheel w/ Dump and Plow Truck #33
Project Type: Vehicles & Heavy Equipment
Project Cost: $75,032

Department: Public Works
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 10
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: Truck #33 was originally assigned to the Water/Sewer Department, then was rotated to Highway Dept in the fall of 2018. This truck was originally purchased in 2008 for $98,607. The recommended useful life is 10 years according to the Town of Exeter Vehicle Replacement Schedule (VRS), and is currently delayed by 5 years for replacement. It is now a first response salt/sand/plow truck that is under-powered. The truck repairs have been routine maintenance. This replacement will be a hook-lift truck on an F550 chassis with a smaller wing and plow.

2. Rationale: This vehicle is a first response unit in the winter months and used for heavy hauling the rest of the year.

3. Operating Budget Impact: This price is from 2019 Liberty International & Donovan Equipment purchase + 4.5% inflation rate (4 yrs) + costs for strobe lights, miscellaneous parts, and radio ($5,000).

Is this vehicle assigned to or used by more than one department? No. If so, list additional department:

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.) Up to 7 days/week in winter.

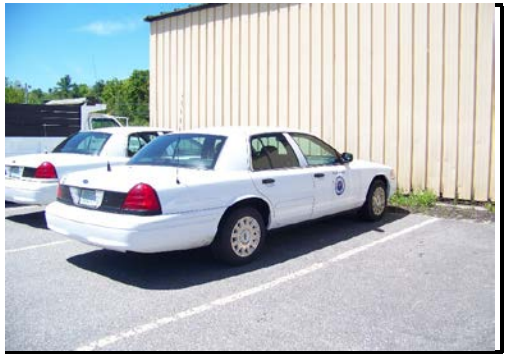
Project Title: Replace Sedan #24
Project Type: Vehicles & Heavy Equipment
Project Cost: $24,000

Department: Public Works
Contact Name: Jennifer Perry

Project Ranking: _____ of _____
Useful Life (Years): 6
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: This 2008 Ford Crown Victoria sedan is an older retired police vehicle that the Maintenance Custodian uses during the work day, or other employees take to required classes. Vehicle #24 is being traded in 2022 for a new small working van that is better suited to safely transporting supplies and cleaning equipment to multiple Town properties and sites to perform daily cleaning duties. This vehicle was originally purchased for Police Department use and served as a front line police cruiser and a detective's car. The recommended useful life for DPW use is 6 years according to the Town of Exeter Vehicle Replacement Schedule (VRS). DPW acquired the vehicle in 2012 and it was scheduled for replacement in 2020. Issues of concern with the existing sedan include weak transmission, rusty floorboards, tired suspension, body rust and high mileage.

2. Rationale: Replacement due to condition and wear; reduce repair and maintenance costs, improve efficiency and obtain right vehicle for the job. Continued deterioration of the body and other major components.

3. Operating Budget Impact: The replacement cost was developed from NH State bid list pricing plus lights, seals, etc. This price does not reflect a trade due to high mileage and low trade value.

Is this vehicle assigned to or used by more than one department? No. If so, list additional department:

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.): 5 days/week

Assigned to Single Operator? (Y/N): Yes, custodian

Mileage/date taken: Broken odometer/May 2021

Project Description

1. General Project Description: Replace the existing Maintenance Van 1/2 ton with 1/2 ton. The van was originally purchased in 2013 for $22,600. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS), and it was scheduled for replacement in 2021. The truck repairs have been routine maintenance.

2. Rationale: Replacement due to condition and wear; reduce repair and maintenance costs, improve efficiency and obtain right vehicle for the job. Continued deterioration of the body and other major components.

3. Operating Budget Impact: The price was developed from the original purchase price + 4.5% inflation rate (9 yrs) + costs for strobe lights, miscelaneous parts ($1,000), and radio ($3,000); This price does not reflect a trade.

Is this vehicle assigned to or used by more than one department? No. If so, list additional department:

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.): 5 days/week

Assigned to Single Operator? (Y/N): Yes, plumber

Externally Mandated (Y/N): No

Project Description

1. General Project Description: This car is an older retired Public Works Director vehicle that the W/S Utility Clerks use during the work day, or other employees take to required classes. SUV #51 will be replaced w/ a Ford Escape Hybrid or equivalent. The recommended useful life for DPW use is 6 years according to the Town of Exeter Vehicle Replacement Schedule (VRS). W/S acquired the vehicle in 2017, and is scheduled for replacement in 2022.

2. Rationale: Replacement due to age and wear; lower repair costs; DPW has a scheduled replacement in 2022

3. Operating Budget Impact: The replacement cost was developed from discussion with Public Works Maintenance Superintendent. This price does not reflect a trade.

Is this vehicle assigned to or used by more than one department? If so, list additional department: Water & Sewer Department

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.): 5 days/week

2022 - 2027 CIP Project Request Form

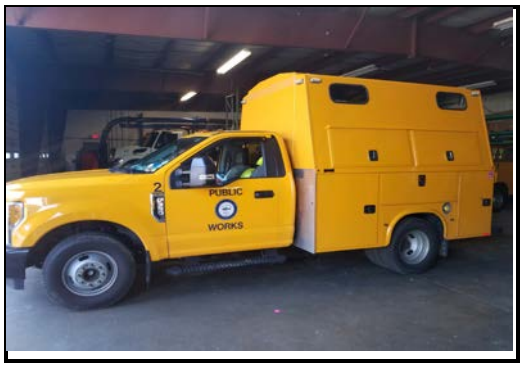
Date Submitted: 5/15/2021

Year Funding is Requested: 2025

Project Title: Replace Truck #2 w/Enclosed Util.Serv.Body
Project Type: Vehicles & Heavy Equipment
Project Cost: $63,659

Department: Public Works
Contact Name: Jennifery Perry

Project Ranking: _____ of _____
Useful Life (Years): 8
Master Plan (Y/N): No
Growth Related (Y/N): No
Service Related (Y/N): Yes
Externally Mandated (Y/N): No



Project Description

1. General Project Description: Replace the existing Water & Sewer vehicle Truck #2. The truck was originally purchased in 2017 for $43,358. The recommended useful life is 8 years according to the Town of Exeter Vehicle Replacement Schedule (VRS). The truck repairs have been routine maintenance.

2. Rationale: This vehicle is one of the Water & Sewer vehicles used during everyday activities, water & sewer breaks

3. Operating Budget Impact: The price was developed from the original purchae price 2017 + 4.5% inflation rate (8 yrs) + costs for strobe lights, miscelaneous parts, and radio ($2,000); This price does not reflect a trade.

Is this vehicle assigned to or used by more than one department? If so, list additional department: Water & Sewer Department

Approximate Weekly Use in Days (5 days per week, less than 5, seven days per week, etc.) 5 days per week

Assigned to Single Operator? (Y/N): Yes, but used by others if necessary

Mileage/date taken: 20,579/June 2021

Vehicle Replacement Guidelines

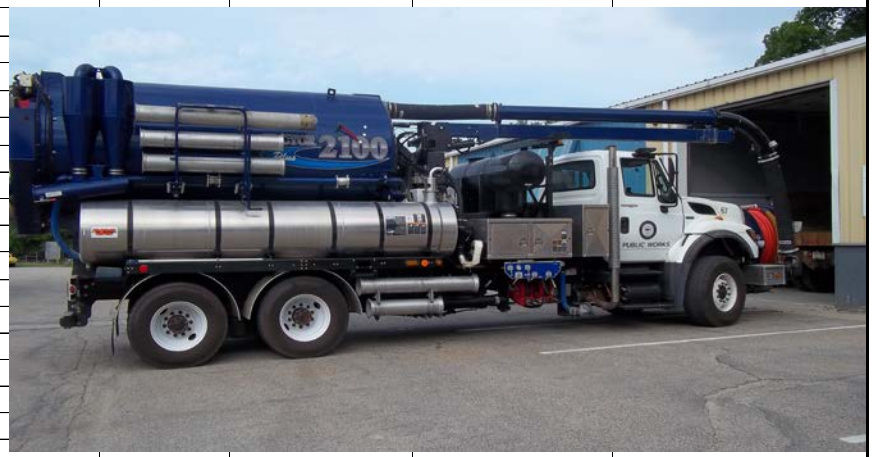
Department:	Water & Sewer						Date:	June 21, 2021
Vehicle Name or Number:	Truck #67						Fuel Type:	DIESEL
Vehicle Registration:			2013 International Vactor 2100					
VIN #	1HTWGAZT3H039122							

Vehicle Category	*Recommended Replacement Years/Miles*	*Age*	*Miles/Hours Nearest 10,000*	*Type of Service*	*Reliability*	*Maintenace & Repairs Costs*	*Condition Interior/Exterior*	*Total Points*
Heavy Equipment Loaders, Sweepers, Snow Blowers	12 or 100,000	8	3	5	2	2	3	23



Age: 1 point for each year of chronlogical age, based on in-service date

Miles/Hours: 1 point for each 10,000 miles or 750 hours

Type of Service: 1, 3, or 5 points are assigned based on type of service
1 point for Department Heads & Commuter use
3 points for meduim duty, ambulances, parks & rec, service vehicles
5 points for rough duty, plows, fire engines,etc…

Reliability: Points are assigned depending on the frequency that a vehicle is in the shop for repair
1 point for a vehicle in the shop once every 3 months for Preventive Maint
2 points for a vehicle in the shop once every 2 or 3 months
3 points for a vehicle in the shop each month for repairs
4 points for a vehicle in the shop twice a month for repairs
5 points for a vehicle in the shop 3 or more times a month

Maintenance & Repair Costs: Points are assigned based on total life Maintenance & Repair costs
1 point for maintenance & repair costs totalling 20% of original purchase cost
2 points for maintenance & repair costs totalling 40% of original purchase cost
3 points for maintenance & repair costs totalling 60% of original purchase cost
4 points for maintenance & repair costs totalling 80% of original purchase cost
5 points for maintenance & repair costs totalling 100% or greater of original purchase cost

Condition: This category takes into consideration body condition, rust, interior condition, accident history, anticipated repairs, etc…
1 point for like new condition
2 points for excellent condition
3 points for good condition
4 points for fair/average condition
5 points for poor condition (Not Inspectable)
