LEGAL NOTICE
EXETER PLANNING BOARD
AGENDA

The Exeter Planning Board will meet on Thursday, September 11, 2025 at 7:00 P.M. in the Nowak Room of the Town Office Building located at 10 Front Street, Exeter, New Hampshire, to consider the following:

APPROVAL OF MINUTES: August 14 and August 28, 2025

NEW BUSINESS: PUBLIC HEARINGS

The continued public hearing on the application of Caley Associates for site plan review and a Shoreland Conditional Use Permit for the proposed redevelopment of the property at 97 Portsmouth Avenue. The developer is proposing to demolish the existing Blue Ribbon Dry Cleaners building on the site and construct a multi-use building to include commercial space, amenities, and 14 residential units with parking and associated site improvements. The property is located in the C-2, Highway Commercial zoning district and is identified as Tax Map Parcel #65-125. PB Case #25-3.

The application of the Exeter Presbyterian Church for site plan review of the proposed construction of an additional building, parking and associated site improvements on the property located at 73 Winter Street. The subject property is located in the C-1, Central Area Commercial zoning district. Tax Map Parcel #73-143. PB Case #25-6.

OTHER BUSINESS

- Master Plan Discussion
- Land Use Regulations Review
- Field Modifications
- Bond and/or Letter of Credit Reductions and Releases

EXETER PLANNING BOARD
Langdon J. Plumer, Chairman

Posted 08/29/25: Exeter Town Office and Town of Exeter website

TOWN OF EXETER
PLANNING BOARD
NOWAK ROOM
10 FRONT STREET
AUGUST 14, 2025
DRAFT MINUTES
7:00 PM

I. PRELIMINARIES:

BOARD MEMBERS PRESENT BY ROLL CALL: Chair Langdon Plumer, Gwen English, Nancy Belanger, Select Board Representative, Alternate Marty Kennedy, Alternate Dean Hubbard, and Alternate Sam MacLeod.

STAFF PRESENT: Interim Town Planner Carol Ogilvie, Assistant Town Manager Melissa Roy

II. CALL TO ORDER: Chair Plumer called the meeting to order at 7:00 PM, introduced the members, and activated the three Alternates.

III. NEW BUSINESS:

1. Public hearing on the 2026-2030 Capital Improvements Program (CIP) projects as presented by the Town Departments. Copies of the proposed document(s) will be available at the Planning Department Office prior to the meeting.

Library Building Fund $75,000 (page 5)

Library Director Judy Lanter presented the request for $75,000 to establish the building fund. She indicated there were anticipated plumbing repairs to replace the pipe to the main line which frequently backs up, the elevator is 38 years old and began leaking oil, there are eight original custom doors with casings that need to be replaced, the HVAC unit has four pumps that need replacing. She will talk to the elevator company about getting estimates for replacement due to the age of the unit, however the current issues are fixable. The doors are approximately $8,000. Ms. Roy noted these are not part of the maintenance budget.

Mr. Kennedy asked the process to ask for more when the fund needed to be replenished. Ms. Roy noted the funds would be replenished with a warrant article through the CIP process and the Library Trustees would be the agents to expend.

Pairpoint Park $35,000 (page 10)

Steven Jones, Chair of the Pairpoint Park Committee, presented the request for $35,000 of the anticipated $40,000 cost of the engineering design for Pairpoint Park. He noted plans to raise $5,000. Mr. Jones noted the Committee consists of 9-12 people and Jen Martel, who is a landscape architect, is a

member of the Committee and the Planning Board. He explained that the park parcel on Water Street was donated and originally had buildings that burned down and there are concerns about what is under the turf. The parcel is unimproved. Surveys were sent out to the residents and the first received 750 responses and three designs were proposed. The second survey yielded 500 responses, and the Select Board approved the design concept. He noted these funds would be applied to the design only and they are looking for grants, donations and other fundraising to offset the cost. Ms. Martel looked at other similar projects and estimated the cost.

Parks & Recreation

Parks & Recreation Director Greg Bisson presented the CIP requests for Parks & Recreation.

Parks & Recreation Improvement Fund – pg. 6

Mr. Bisson noted the fund was established six years ago and helped with several projects.

Brickyard Park

Mr. Bisson noted the irrigation system needs to be modified for the green space that currently serves soccer and field hockey. It used to serve baseball, so the system is not down deep enough.

Skate Park - Guardrail Replacement

Mr. Bisson noted this project would make the park more ADA accessible and update the path.

Ms. Belanger recommended a water fountain in the future.

Pool Building Restoration

Mr. Bisson noted this would be the third phase of the restoration and include replacing the floor, ADA accessibility, repainting, a new roof, and windows.

Park Street Common – Gilman Park

Mr. Bisson noted benches would be replaced with plastic benches on cement pads. The electricity would be updated to allow for use by the robot mowers.

Ms. Belanger recommended if digging for the electricity, to consider installing a conduit for future electric vehicle charging stations.

Hampton Road

Mr. Bisson noted the ADA pathway from 4 Hampton Road to 10 Hampton Road would be extended.

DPW Director Steve Cronin and Water/Sewer Supervisor Stephen Dalton presented the requests for:

Surface Water Treatment Plant $2 million (pg. 23)

Mr. Cronin noted the funding in 2024 and the drinking water SRF application was submitted. The current plant is outdated, and they are identifying other properties in the general vicinity. The existing plant is in the 100-year flood plain and downstream from the dam. He noted this is for design work.

Ms. English noted there is a program in Colorado which recharges the groundwater supply by re-using water. Mr. Cronin noted this had been discussed at the conceptual level.

Great Bay Total Nitrogen (pg. 21)

Mr. Cronin explained the five-year permit and reduction of non-source point pollution. In the past they looked at septic systems and fertilizer. They are proposing enhanced street sweeping and would like to replace the street sweeper at a cost of $400,000. It has a 6–8-year life cycle. He explained the percentage of Clean Water SRF funding and that this was a less expensive way to keep the permit rather then costly upgrades to the treatment plant. The Enhanced Sweeping Program, estimated at $12,000, would be 100% funded if approved.

High Street Cross City Sewer Rehab (pg. 30) $4.3 million

Mr. Cronin noted sewer capacity issues from High Street to Gilman to Drinkwater Road. He indicated 2,600' of pipe would be rehabilitated and $2,500' of pipe replaced. He applied to the Clean Water SRF and hasn't heard yet. He showed the location of the pipes on the plan and a section where 12" pipe would be upgraded to 15."

Lead Service Line Inventory (pg. 33) $173,000

Mr. Cronin explained the EPA regulations and compliance date of 2034 to identify locations. They will do 149 customer side visual inspections and 69 system side inspections with pothole excavations annually.

Chair Plumer asked if the inspections would be done by the department or contractors and Mr. Cronin indicated a hybrid of both.

Surface Water Treatment Plant Residual Disposal (pg. 34) $500,000

Mr. Cronin explained the by-product of treatment that needs to be trucked away until the plant is replaced.

Vehicle Replacement – Dump Truck #52 (pg. 58) - $85,000

Mr. Cronin showed a photo of the truck to be replaced with a Ford F550. He noted an equipment schedule on page 60.

ADA Improvement Capital Reserve Fund (pg. 8) $25,000

Ms. Roy presented the request for funding the reserve fund. She indicated there is work around town to improve accessibility. There was a study done to identify potential improvements She noted that Planet Playground has ADA accessible spaces. Ms. Belanger noted that Pairpoint Park will have them as well.

Pedestrian Improvement (pg. 12) $266,000

Ms. Roy presented the request for matching funds for the proposed $1 million improvements to sidewalks and crosswalks. She noted there is a Transportation Alternative Program grant which would cover 80%. The project would only move forward if the grant is approved.

Space Needs Assessment (pg. 11) $50,000

Ms. Roy explained assessment of town building functionality. The assessment would require a $50,000 warrant article. The assessment would consult on how to best use spaces. She noted the move to 10 Hampton Road from Court Street as one example and the Police Fire Substation as another. She noted that police and fire had held off on any requests this year to thank residents for support of the substation.

IV. OLD BUSINESS

APPROVAL OF MINUTES

June 12, 2025 – ***Tabled***

Mr. Kennedy recommended having Vice-Chair Brown review the conditions of approval to make sure the approval letter that went out matched.

Ms. English motioned to table approval of the June 12, 2025 minutes. Ms. Belanger seconded the motion. A vote was taken, all were in favor, the motion passed unanimously.

July 10, 2025

Ms. English and Ms. Belanger recommended edits.

Mr. Kennedy motioned to approve the July 10, 2025 minutes, as amended. Ms. Belanger seconded the motion. A vote was taken, all were in favor, the motion passed unanimously.

V. OTHER BUSINESS

- Master Plan Discussion
- Field Modifications
- Bond and/or Letter of Credit Reductions and Release

VI. TOWN PLANNER'S ITEMS

VII. CHAIRPERSON'S ITEMS

VIII. PB REPRESENTATIVE'S REPORT ON "OTHER COMMITTEE ACTIVITY"

IX. ADJOURN

Ms. English motioned to adjourn the meeting at 8:30 PM. Ms. Belanger seconded the motion. A vote was taken, all were in favor, the motion passed unanimously.

Respectfully submitted.

Daniel Hoijer,
Recording Secretary (Via Exeter TV)

TOWN OF EXETER
PLANNING BOARD
NOWAK ROOM
10 FRONT STREET
AUGUST 28, 2025
DRAFT MINUTES
6:30 PM

I. PRELIMINARIES:

BOARD MEMBERS PRESENT BY ROLL CALL: Acting Chair Aaron Brown, Gwen English, John Grueter, Nancy Belanger, Select Board Representative, Alternate Marty Kennedy, Alternate Dean Hubbard, and Alternate Sam MacLeod.

STAFF PRESENT: Interim Town Planner Carol Ogilvie, Assistant Town Manager Melissa Roy

II. CALL TO ORDER: Acting Chair Brown called the meeting to order at 6:30 PM, introduced the members, and activated the three Alternates.

III. NEW BUSINESS:

1. Second Public hearing on the 2026-2031 Capital Improvements Program (CIP) projects as presented by the Town Departments. Copies of the proposed document(s) will be available at the Planning Department Office prior to the meeting.

Interim Town Manager Mellisa Roy noted that the Board could ask additional questions or vote to move the CIP forward to the final phase.

Ms. English motioned to recommend the draft CIP for fiscal 2026-2031, as drafted, without any changes, be moved to the Budget Recommendations Committee and Select Board. Mr. Grueter seconded the motion. A vote was taken, Ms. Belanger abstained, the motion passed 6-0-1.

2. The continued public hearing on the application of Caley Associates for site plan review and a Shoreland Conditional Use Permit for the proposed redevelopment of the property at 97 Portsmouth Avenue. The developer is proposing to demolish the existing Blue Ribbon Dry Cleaners building on the site and construct a multi-use building to include commercial space, amenities, and 14 residential units with parking and associated site improvements.
C-2, Highway Commercial zoning district
Tax Map Parcel #65-125
Planning Board Case #25-3

Acting Chair Brown read the public hearing notice out loud.

Interim Town Planner Carol Ogilvie submitted a memo dated August 20, 2025 in which she noted the applicant submitted new plans on August 18, 2025 relevant to the handicap parking space and another additional space added, moving the sidewalk, sewer line to the proposed coffee bar, lighting plan, planting plan. She noted one of the 14 proposed residential units would be required to be affordable and will require a condition of approval. The applicant is requesting two waivers as outlined in their June 24, 2025 letter. The applicant presented their Shoreland CUP to the Conservation Commission on July 8, 2025 (see Memo dated 7/10/25).

Attorney Josh Lanzetta indicated that Christian Smith was on his way up.

Vice-Chair Brown opened public comment.

Attorney Chris Hilson of DTC Lawyers noted he represented REL and had a number of concerns. He stated that the intensity of use proposed for the undersized lot, traffic flow, pedestrian flow, and traffic as proposed would require offsite parking at BankProv and REL's strip mall. There is a cross-parking easement from 1964. He noted this parcel had been chopped up after being one lot, putting a lot in between so that it is not adjoining. He argued that the intent of the easement was not for permanent or overnight parking and that people are not going to walk down Portsmouth Avenue, they're going to drive. He argued that they were not going to create a neighborhood on this lot and that it will overburden the easement. He noted his client's rights under the easement and argued it would render his rights under the easement useless. He argued that not having enough parking would harm someone elses's property rights and asked the Board to deny approval. He argued that a small undersized lot was grabbing a bunch of parking spots for its exclusive use and that is not what the cross easement is designed to do. Attorney Hilson argued that as configured, it doesn't create a walkable, cyclable neighborhood.

Acting Chair Brown asked the Board if everyone got the letter from BankProv and noted it was challenging for the Board to get a letter like this less than 24 hours before the hearing.

Attorney Todd Fahey of Upton and Hatfield stated that he wrote the letter and questioned the regulations of site plan review. He stated that he shared in Attorney Hilson's view on behalf of the bank relate to the scope and size of the project. He argued there would be traffic and pedestrian safety issues with too much on a very small lot. He argued there would be 28 cars for 14 residential units and that common sense couldn't be checked about what's really going to happen. He argued there would be snow issues which will leave parking spaces unusable. He noted BankProv joined on the views on the easement and would like an explanation of traffic flow and parking once the plan is presented.

Jeff Gilbert noted he was an attorney and one of the owners of the REL plaza for 20 years and felt that 6-7 parking spaces were being stolen and expressed concerns with safety. He expressed concerns with intensity and utilizing his parking spaces. He recommended ten units so that parking could be on site and that no use of reciprocal easements be allowed to satisfy parking requirements. He noted public safety issues are very real. Mr. Gilbert stated that the spaces are for occasional use and not intended to be permanent or become the property of the development. He stated that they will park in our lots and cross drive lanes. Mr. Grueter asked if the intent was written in the easement. Attorney Hillson read

"adjoining premises of the grantor" and noted the drycleaner was created in 1965 and DOT wants shared entrances. In 1971 it was taken from his client and put back on record in 1993. Acting Chair Brown asked if his client could deny the applicants from utilizing the parking and he indicated it was overburdening the easement and not for overnight parking but for mobilized patrons.

Mr. Kennedy asked about the document and whether the bank could put signs up. Ms. English noted there would be issues monitoring with signs. Ms. Belanger noted she had not seen the document and Mr. Smith noted it was sent in June after the Technical Review Committee meeting.

Ms. Belanger noted the parking lot is not municipal, but private.

Mr. McLeod noted the number of spaces used by Margaritas on a Friday/Saturday night.

Acting Chair Brown asked the applicant to address the easement. Attorney Josh Lanzetta noted he submitted the easement language in the packet and questioned if Margaritas redeveloped it violates the rights of the other parcel. He noted the easement language is intentionally broad and the benefit works both ways as a property right that runs with the land. He noted the easement was re-established and re-asserted and the title chain. He noted the condition of the BankProv property which has a mulch bed and is not utilizing parking they could be using on their lot. He felt that there should have been an access and maintenance agreement. He noted the footprint was not changing, it is the same as the drycleaners. He noted the hours of the coffee bar would be complimentary to Margarita's lunch and dinner and have a morning crowd. He noted there is plenty of unused parking at both Margaritas and BankProv.

Attorney Josh Lanzetta noted that he was unsure how the intensity argument is going to quash any parking right in New Hampshire. The easement allows parking for all of these properties. BankProv customers can park at the drycleaners, Margartias can park on the BankProv property, it is reciprocal. There is nothing in the easement that says that it can't. He noted he worked with the Planning Department to utilize MUND specifically and that the town is trying to make the area more walkable and that it is only 2-3 blocks to the hospital. He stated that occasional use isn't in the easement language, temporary use isn't in the easement language. He noted safety is a word that gets batted around a lot in order to stop action in his experience. There is a way to stripe and sign the three lots to create pedestrian ingress and egress in a safe manner. He did not think blending parking and safety go together, they are separate issues. He noted all assigned parking is on site, on the property. There is nothing stopping patrons from Margaritas from parking overnight. The idea of temporary or occasional does not exist and if the owners wanted that to exist, they should have negotiated it or written a new easement and have had chances to do that. The document is recorded at the Registry of Deeds. He noted the smaller residences NH is trying to develop and in the Town. One car per unit is the new standard and there is no case law challenging that yet so talking about another standard just as asserting they have a property right, we are asserting that we have a property right and are able to use this easement as it has been established. Just because it wasn't utilized in this way before, over time, means nothing. Things do change and the law would allow this to happen. He noted 14 residential units all have designated spots in the rear of the property with four more temporary spots for business/commercial spaces out front. He noted they will reduce the seat count of the coffee bar to 18

to remove the need for four temporary spots or offsite parking. Mr. Kennedy asked if the spots in back will be posted and Mr. Smith noted no signs are planned.

Mr. Smith explained the variance from the Zoning Board of Adjustment for encroachment on building setbacks. He noted the residential parking requirements in the Mixed-Use Neighborhood Development are for one space per unit. He couldn't envision the residents parking in the REL parking lot overnight. Ms. English noted MUND must facilitate comfortable pedestrian travel and accommodate safety for pedestrians and bicycles. Mr. Smith noted the rear of the building has all the parkin and then in front of the dry cleaner 7 perpendicular stalls, 14 spaces are designated to residents and there are additional spaces that one should anticipate should be open overnight.

Ms. Belanger noted that it was brought up at the site walk (August 13, 2025) that the coffee bar might be an office. Mr. Smith noted it was unknown; it would probably be retail.

Mr. Grueter asked if the coffee bar could be eliminated for more parking. Mr. Smith noted it would be up to the developer and noted he received a review letter from Underwood Engineering the town's reviewing consultant and submitted his response at the end of the day today. The catch basin may need to be vacuumed out at the end of the project and added a note. He discussed tying into the sewer and line to the existing catch basin. He conferred with the Sater and Sewer Superintendent and there is no capacity issue. He noted some minor spill over of lumens in the lighting plan which would be washed by the other lights in the parking lot that are not dark sky compliant on other properties. Ms. English asked If he could work to reduce that to zero.

Ms. English questioned the traffic flow in the back and questioned if the Manor blocked that. Mr. Smith noted traffic could go around the bank or through the Manor property. Mr. Grueter asked if that were part of the easement. Mr. Smith noted Manor traffic goes through the subject property. Mr. Kennedy questioned if the easement prohibited the Manor from blocking it off and Attorney Josh L. indicated it cannot be obstructed and has been used for a long time.

Mr. Smith presented the plan revisions. He noted that a stall was added in front, the sidewalk was eliminated on the north side of the property, a retaining wall now extends around and there is a new sidewalk along the parking and access/exit tying into Portsmouth Avenue with handicapped access. He noted sidewalk along Portsmouth Avenue providing a connection to that parking near the sidewalk and to the other easement using that sidewalk.

Mr. Smith reviewed the CUP in the Shoreland zone and reduction in impervious surface which is another reason for lack of pavement out front.

Attorney Fahey stated that the easements require reasonable use and pointed to a property line encroachment on the plan. Mr. Smith noted it was landscaping in the painted pedestrian walkway adjacent to the drycleaner on the bank's property. Attorney Fahey stated that treated snow cannot be in the shoreland protection area and four spaces are not available for housing snow. He argued that more snow equals less parking, and they can't plow into the Manor or BankProv lots.

Leann Corning, Senior VP of Client Experience at BankProv questioned signs not being followed and noted that while they don't currently use their back lot, they have an agreement to be acquired at the end of the year so there is no guarantee the new owner won't use those spots for employees. She noted the flow of traffic concerns with the drive through and stop sign. Ms. English asked where most people entered the bank on Margarita's side or the dry cleaner and Acting Chair Brown stated that he always enters closer to Margartias.

Janet Spinelli stated that the Manor is no longer part of the easement and referenced the July 10 minutes.

Attorney Hillson questioned if it would be in the condominium by-laws to confine parking to that lot. Acting Chair Brown stated that they did not say that at all, they were not going to utilize their rights but on a temporary basis.

Acting Chair Brown closed public comment at 8:28 PM.

Ms. Belanger noted she would like to see the UEI memo and response, discuss sidewalks and traffic flow.

Ms. English expressed concerns with overflow of light, correcting the landscape plan and tree on Portsmouth Avenue frontage, making sure to use native species and wanted to know more about the easement with the Manor. She asked about the trees coming out when the building is demolished and indicated no replacement is proposed now.

Mr. Mcleod noted that someone who doesn't drive could have a real need filled with access to restaurants and shopping. He was not fully comfortable with pedestrian traffic.

Mr. Hubbard noted there are seven spaces in front and 13 in back.

Mr. Kennedy questioned snow removal/plowing.

Acting Chair Brown understood the coffee shop is someone's vision and if it works it works. More time on access would be helpful and clarification with the Manor easement. Mr. Smith noted the easement includes all four parcels and will forward it to Barbara McEvoy.

Ms. Belanger moved to continue Planning Board Case #25-3 to the Planning Board's September 11, 2025 meeting at 7 PM at the Nowak Room. Ms. English seconded the motion. A vote was taken, all were in favor, the motion passed 7-0-0.

Ms. Ogilvie indicated 65 days were up on the 13th so if continued make an agreeable extension.

3. The application of Sonny Iannacone for a Wetlands Conditional Use Permit (CUP) for the proposed construction of a 25' x 30' addition to the rear of the existing residence located at 18 Ashbrook Road. R R-2, Single Family Residential zoning district

Tax Map Parcel #90-30
Planning Board Case #25-5.

Acting Chair Brown read the public hearing notice out loud and asked Ms. Ogilvie if the case were ready to be heard and she indicated yes.

Ms. Belanger motioned to open Planning Board Case #25-5. Ms. English seconded the motion. A vote was taken, all were in favor, the motion passed 7-0-0.

Mr. Iannacone indicated he purchased his small home in 2023 and has a narrow hall to a small bathroom and wanted a 25'x30' addition.

Acting Chair Brown noted he has been to the Conservation Commission and referenced Ms. Murphy's memo recommending approval with conditions that the temporary disturbance area be reseeded and to stabilize soils. He noted the fertilizer requirements. Ms. English noted fertilizer could be used to get started but he should reach out to Kristen Murphy.

Ms. Belanger motioned after reviewing the criteria for a wetlands conditional use permit that the request of Mr. Iannacone, Planning Board Case #25-5 be approved with the conditions in the Conservation Commission memo of Kristen Murphy dated August 4, 2025 to reseed disturbed areas and stabilize the soil. Mr. Hubbard seconded the motion. A vote was taken, all were in favor, the motion passed 7-0-0.

IV. OLD BUSINESS

APPROVAL OF MINUTES

June 12, 2025 – ***Tabled***

August 14, 2025 - ***Tabled***

Ms. Belanger motioned to table approval of the minutes of June 12, 2025 and August 14, 2025 to the Planning Board's next meeting on September 11, 2025. Ms. English seconded the motion. A vote was taken, all were in favor, the motion passed 7-0-0.

V. OTHER BUSINESS

- Master Plan Discussion

Acting Chair Brown urged members of the Oversight Committee to get back on schedule with meetings. He noted connectivity is one of the items on the to do list and referenced the Bike & Pedestrian Master Plan.

Acting Chair Brown noted that typically Mr. Sharples would guide the Board with vetting potential changes to the ordinance.

- Field Modifications

- Bond and/or Letter of Credit Reductions and Release

Ms. Ogilvie noted she would have more information on a request for $14,000 bond reduction from the HOA at 78 Linden Street for three items which the developer never did.

VI. TOWN PLANNER'S ITEMS

VII. CHAIRPERSON'S ITEMS

VIII. PB REPRESENTATIVE'S REPORT ON "OTHER COMMITTEE ACTIVITY"

IX. ADJOURN

Mr. Grueter motioned to adjourn the meeting at 9:16 PM. Acting Chair Brown seconded the motion. A vote was taken, all were in favor, the motion passed unanimously.

Respectfully submitted.

Date: **September 4, 2025**

To: **Planning Board**

From: **Carol Ogilvie, MRI, Interim Town Planner**

Re: **J. Caley Associates 97 Portsmouth Avenue PB Case #25-3**

The Applicant has submitted site plan review and Shoreland Conditional Use Permit (CUP) applications for the proposed redevelopment of the property at 97 Portsmouth Avenue. The developer is proposing to demolish the existing Blue Ribbon Dry Cleaners building on the site and construct a four-story building with commercial on the first floor and 14 residential units in the top three floors, a three-season espresso bar in the front of the lot, and a paved patio between the two structures. The property is located in the C-2, Highway Commercial zoning district and is identified as Tax Map Parcel #65-125.

The Applicant presented their plans to the Planning Board at the July 10, 2025 meeting, a site walk was conducted on August 13th, 2025; the Applicant returned to the Board at the August 28th meeting and the Board subsequently voted to continue discussion of the application to the September 11th, 2025 meeting.

Revised plans and supporting documents, dated 9/3/25, have been submitted for your review. Included among these are responses to staff comments of 8/20/25 and to the UEI letter of 8/26/25, in both cases some of the comments involve plan changes and some of which are explanatory.

The Applicant is requesting two waivers from the Board's Site Plan Review and Subdivision Regulations as outlined in the waiver letters from Beals Associates, PLLC dated June 24, 2025 previously provided to the Board.

The Applicant presented their Shoreland Conditional Use Permit application to the Conservation Commission at their July 8th, 2025 meeting. The Commission voted unanimously to recommend approval of the Shoreland CUP with conditions. A memo from our Conservation & Sustainability Planner Kristen Murphy, dated 710/25, has previously been provided for review.

Following are draft motions for the two waiver requests, for the Shoreland Conditional Use Permit, and for the MUND Site Plan Review. I will have conditions of approval prepared for the meeting, should the Board decide to act on the application.

Waiver Motions:

Grading within 5 feet of exterior property line waiver motion: After reviewing the criteria for granting waivers, I move that the request of J. Caley Associates (PB #25-3) for a waiver from Section 9.3.6.4. of the Site Plan Review and Subdivision Regulations regarding grading within 5 feet of an exterior property line be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Sidewalk waiver motion: After reviewing the criteria for granting waivers, I move that the request of J. Caley Associates (PB Case #25-3) for a waiver from Section 6.19.5.E.3. of the Zoning Ordinance (MUND Design Standards – Property Frontage) to permit the proposed sidewalk to be less than eight-feet (8') in width be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Planning Board Motions:

Table /Continuance Motion: I move that the application of J. Caley Associates (PB Case #25-3) be CONTINUED to the (date/time/place) Planning Board meeting and revised plans/documents shall be submitted to the Planning Office at least eight (8) days prior to the meeting or the application may remain on the table to a future meeting.

Conditional Use Permit (Shoreland) Motion: After reviewing the criteria for a Shoreland Conditional Use permit, I move that the request of J. Caley Associates (PB Case #25-3) for a Conditional Use Permit be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Mixed Use Neighborhood Development (MUND) Site Plan Motion: I move that the request of J. Caley Associates (PB Case #25-3) for Site Plan approval of the proposed MUND project be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Thank You.

From: **Carol Ogilvie, MRI, Interim Town Planner**

Re: **J. Caley Associates 97 Portsmouth Avenue PB Case #25-3**

The Applicant has submitted site plan review and Shoreland Conditional Use Permit (CUP) applications for the proposed redevelopment of the property at 97 Portsmouth Avenue. The developer is proposing to demolish the existing Blue Ribbon Dry Cleaners building on the site and construct a four-story building with commercial on the first floor and 14 residential units in the top three floors, a three-season espresso bar in the front of the lot, and a paved patio between the two structures. The property is located in the C-2, Highway Commercial zoning district and is identified as Tax Map Parcel #65-125.

The Applicant presented their plans, dated 6/24/25, to the Planning Board at the July 10, 2025 meeting. The Board opened the public hearing for abutter comment, scheduled a site walk for August 13th at 8:00 AM, and voted to continue further discussion of the application to the August 28th Planning Board meeting.

At the August 13th site walk, attended by representatives from the abutting bank and shopping plaza, questions were raised about parking, traffic circulation, and snow storage. The applicant submitted new plans on August 18, 2025 with the following revisions.

1. Site Plan - Sheet #4:
    a. One of the 10 spaces in the rear of the building is a dedicated handicap parking space.
    b. One parking space has been added to the six spaces behind the coffee bar.
    c. The sidewalk to the coffee bar has been moved from the front to the side.
2. Utility Plan – Sheet #6 identifies a new sewer line to the coffee bar, and labels the existing water line.
3. Lighting Plan – Sheet #7 provides details on the lumens, on and off the site. Section 9.20.5.5 of the Site Plan Review Regulations requires that lighting shall not direct onto neighboring properties. This plan shows that there is some light spillage at the property lines.

    Lighting is not directed to adjacent parcels as all luminaires are down cast as required. All light spillage on the abutting parcels is into existing parking/travel lanes. Additionally, the minimal fractions of a foot candle that crosses parcel boundaries will be eclipsed by

existing light poles on the abutting properties (see attached – ex light poles are circled in red).

4. Planting Plan – Sheet #8 shows new plantings at the rear of the parcel, and slightly revised plantings in the two "teardrop" areas adjacent to the bank. A portion of these two areas, however, appear to extend over the property line.

   This is not an issue, in fact currently portions of parking stalls, sidewalk, etc. and connected landscape islands overlap the parcels. The current existing exit lane serving the bank and dry cleaner is nearly entirely on the subject parcel.

Based on the review and information received to date, following is a summary of points for the Planning Board's consideration:

1. Parking. The applicant has submitted documentation regarding parking easements that are in place that provide for shared parking between this property, the bank, and the shopping plaza. Both abutters raised the potential for customers and/or residents of 97 Portsmouth Avenue to use their spaces due to convenience. There is also a general view that the site is being overdeveloped and even with easements, the parking will not be sufficient or efficient.

   We understand this opinion and testimony from the abutters. We respectfully disagree. The espresso bar will in all likelihood be utilized primarily by the residents. No prohibition for public use is proposed. The applicant is in ongoing discussion with the bank regarding how to best deal with this concern.

2. Regarding traffic circulation, the bank expressed concerns that people intending to park at the rear of either the subject parcel or the abutting lot could potentially conflict with the bank's drive-thru traffic pattern.

   It seems, based on the minimal traffic anticipated for this area, traffic flow conflict should not be an issue. driver visibility from the bank drive through lanes and from the proposed rear parking lot is completely unimpeded & should facilitate reasonable pass/repass as is legally protected by easement for the properties.

3. Pedestrian traffic. Given that there is limited parking adjacent to the multi-use building, it is reasonable to assume that some people will be parking in the abutting parking spaces and walking to the subject parcel; if so, there is no identified pedestrian traffic plan that indicates how one walks safely to and from those parking spaces in the rear on the abutting parcel.

   This is not correct, a crosswalk (painted) is proposed from the banks' sidewalk to the sidewalk adjacent to the proposed building which connects to the front patio of the locus development. This is in virtually the same location as the existing painted crosswalk. There is also a sidewalk proposed from the rear parking area to the front patio.

4. A question was raised at the site visit about snow storage, and how that would be handled prior to removal, and the response was that snow would be piled on the patio in between the two structures. That patio is indicated to have some plantings, as well as being constructed on pervious pavers. It does not seem like a good idea to pile plowed snow over pervious pavers, or on an area that has landscaping. In fact, the pervious parking

spaces in the rear are indicated to have a sign that says “Snow storage not allowed on porous pavement.”

There is no contemplation of snow storage on the patios themselves, the response was that it can be stored in the green space at the end of the parking stalls (grass) between the patios until the stalls can not be kept clear, then it would need to be legally trucked away and disposed of as noted on the plans.

5. Inclusionary Housing. Section 6.19.4 requires a certain number of affordable (based on HUD calculations) be provided. Using the formula in this section, 14 units would result in one (1) unit that is affordable to a renter or owner pursuant to Section 6.19.4. B. 3 & 4. Should this application be approved, this will be a condition of approval, subject to review by Town Counsel.

   This is understood.

The Applicant is requesting two waivers from the Board’s Site Plan Review and Subdivision Regulations as outlined in the waiver letters from Beals Associates, PLLC dated June 24, 2025 previously provided to the Board.

The Applicant presented their Shoreland Conditional Use Permit application to the Conservation Commission at their July 8th, 2025 meeting. The Commission voted unanimously to recommend approval of the Shoreland CUP with conditions. Please see the attached memo from Conservation & Sustainability Planner Kristen Murphy, dated 710/25.

Following are draft motions for the two waiver requests, for the Shoreland Conditional Use Permit, and for the MUND Site Plan Review. These may be prematurely in this memo, considering the review process; if so, these may be ignored until the Board is ready to vote. When that time comes, however, pursuant to state law, the Board needs to include Findings of Fact in its decision that support its decision – whether approval or denial. I think one finding the Board could make is whether this proposal meets the eligibility criteria of the MUND. This ordinance does not have a purpose statement, but it does contain language that describes what the ordinance is intended to accomplish (Section 6.19.1).

Waiver Motions:

Grading within 5 feet of exterior property line waiver motion: After reviewing the criteria for granting waivers, I move that the request of J. Caley Associates (PB #25-3) for a waiver from Section 9.3.6.4. of the Site Plan Review and Subdivision Regulations regarding grading within 5 feet of an exterior property line be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Sidewalk waiver motion: After reviewing the criteria for granting waivers, I move that the request of J. Caley Associates (PB Case #25-3) for a waiver from Section 6.19.5.E.3. of the Zoning Ordinance (MUND Design Standards – Property Frontage) to permit the proposed sidewalk to be less than eight-feet (8’) in width be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Planning Board Motions:

Table /Continuance Motion: I move that the application of J. Caley Associates (PB Case #25-3) be CONTINUED to the (date/time/place) Planning Board meeting and revised plans/documents shall be submitted to the Planning Office at least eight (8) days prior to the meeting or the application may remain on the table to a future meeting.

Conditional Use Permit (Shoreland) Motion: After reviewing the criteria for a Shoreland Conditional Use permit, I move that the request of J. Caley Associates (PB Case #25-3) for a Conditional Use Permit be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Mixed Use Neighborhood Development (MUND) Site Plan Motion: I move that the request of J. Caley Associates (PB Case #25-3) for Site Plan approval of the proposed MUND project be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Thank You.

Re: *97 Portsmouth Avenue Residential Development*
Design Review Engineering Services
Exeter, New Hampshire

Site Information:

Review No. 3

Tax Map/Lot#:	65 / 125
Address:	97 Portsmouth Avenue
Lot Area:	0.40 ac
Zoning District:	C2 Highway Commercial
Proposed Use:	MUND – commercial and residential
Water:	Municipal
Sewer:	Municipal
Applicant:	J. Caley Associates
Design Engineer:	Beals Associates

Documents Reviewed:

Please Note: On August 21, Underwood was notified of a resubmittal package provided to the Town on June 24. Underwood Engineers was initially omitted from the resubmitted package and did not receive it for review until August 21.

- Site plan set entitled "Mixed Use Site Plan 97 Portsmouth Avenue" last revised 8/18/2025, prepared by Beals Associates
- "Drainage Analysis & Sediment and Erosion Control Plan" last revised 6/24/2025, prepared by Beals Associates

Dear Mr. Sharples:

Based on our review of the above information, we offer the following in accordance with the Town of Exeter Regulations and standard engineering practice.

Mr. Sharples
August 26, 2025

Please note any comments no longer listed have either been adequately addressed or are no longer applicable.

Existing Conditions and Demolition Plan Sheets

2. The wetland notes state the delineation was performed in 2010. The notes refer to references that are more recent than 2010. Please clarify. The delineation needs to be reasonably current.

   Beals Response: The typo stating 2010 has been corrected. The wetland/soil scientist report is attached for confirmation.

   UE Response: The note now states the delineation was performed in 2014, over ten years ago. The wetland/soil scientist report was not received by UE. We defer further comment to the Conservation Commission.

   The review was conducted in '2024 & the note has been updated by Berry Survey (see sheets 1 & 2).

Site Plan Sheets

13. The new concrete sidewalk along Portsmouth Avenue must be 8-feet width minimum per 6.19.5.E. Provide a tipdown and truncated dome for ADA compliance. In addition, provide a textured or raised pedestrian crossing at the driveway entrance per 6.19.5.D

    Beals Response: The tipdown and raised warning device have been added. The sidewalk width waiver is attached herewith. It would be odd for an 8' sidewalk to lead to the existing 5' sidewalk along Ports. Ave.

    UE Response: Further discussion regarding the requirements of the MUND regulations along the front of the site for pedestrian movements is deferred to the Planning Board.

    Coord. w/.PB

23. Show foundation and roof drain lines.

    Beals Response: The requested information is depicted on the architectural plans.

    UE Response: The architectural plans note the drain lines are still TBD. However, as long as their flow is accounted for in the storm drainage calculations, UE is satisfied with waiting for the final plan sets and has no further comment on the drain line locations.

    The runoff is accounted for in the drainage model, no response required.

28. Confirm the existing sewer line has sufficient capacity to handle the proposed flow.

    Beals Response: We understand the sewer line has the necessary capacity.

    UE Response: Item not addressed, and the concern still applies. UE feels strongly that the capacity and condition of the pipe should be evaluated as part of the design effort before construction activities.

    We have received existing sewer manhole data from the surveyor, and added to the plan. Sheet 6 depicts the 4" line from the espresso bar tying into the 6" line from the new building with a tee eliminating the acute angle in the former manhole connection. We have confirmed with the Exeter Sewer/Water superintendent that there are no capacity issues in the area of the proposed project in the existing mains.

Mr. Sharples
August 26, 2025

Drainage Analysis

38. UE notes the drainage model has a Tc of 210 Minutes for drainage areas being directed/treated via porous pavement. UE understands that extended Tc's can be utilized in modeling the flow through porous pavement, however the drainage area is a mix of conventional and porous pavement sections all modelled as impervious (CN98) and all directed to porous pavement "ponds" resulting in additional attenuation. UE understands that these are relatively small areas on the site, however the designer should confirm with HydroCAD how best to handle this modelling and reduce the potential of double counting the attenuation.

    Beals Response: The Tc is identical to a recently approved project, and developed with NHDES AoT specific to pervious pavement modelling. While we understand this project will not require AoT permitting, it seems appropriate to use this method.

    UE Response: Response received; however UE has no information regarding the "recently approved project" by DES and therefore cannot make a determination as to whether the specifics of two project are comparable. We remain concerned that the unusually large Tc when combined with the porous pavement reservoir course is being interpreted by the model as the runoff is unrealistically delayed in its conveyance such that the run-off has sufficient time (20 minutes/inch perc rate) to be discarded, when in reality, the porous reservoir courses may become overwhelmed.

    NHDES AoT mandated 10 min/in through the entire previous cross-section be utilized & added into the delivering sub-catchment . Edits have been made based on the depth of pervious features and the filtration media & the update 50-YR

New Comments report for the site (unchanged) and summaries of the ponds is attached (all have >1' unsaturated depth)

39. It remains unclear to UE if the parking requirements have been met. The number of outside seats shown differ between the Civil and the Architectural plans on both patios and along the espresso bar. Although the MUND requires only 1 parking spot per residential unit, it is likely that some of the units will have more than one car. Please confirm the agreements in place for parking on the abutting lots will support overflow parking. We defer further discussion to the Planning Board. Please note our prior comment about the temporary loss of parking spots in the winter due to snow storage still stands. Actively discussing this with the PB

40. If the retaining wall will be 4' high or more in places, it must be designed and stamped by a NH Professional Engineer. However, if it will be under 4' high along the entire length, provide appropriate retaining wall details. Please consider this an amendment to our previous comment about details. Will add wall detail

41. The outside envelope of the main building appears to encroach into the building setback.
    The ZBA allowed the building to be constructed on the existing footprint.

42. We note the design engineer is still waiting for information on the existing water, sewer pipes and structures. The sewer service line from the espresso bar may need to be rerouted, as designed it appears to enter the existing sewer manhole on the abutting parcel at a backwards angle.

    Sheet 6 depicts the 4" line from the espresso bar tying into the 6" line from the new building with a tee eliminating the acute angle in the former manhole connection.

Mr. Sharples
August 26, 2025

43. Note, the Contractor may be required to clean out the two catch basins in Portsmouth Avenue prior to bond release. Please amend the Erosion Control Plan accordingly.
Note 15 has been added to the construction sequence specifying this.

A written response is required to facilitate future reviews. Please contact us if you have any questions.

Very truly yours,

RE: Proposed Residential Development at 97 Portsmouth Avenue – Waiver Request
Tax Map 65 Lot #: 125

Dear Members of the Board:

This is written to formalize a request for two waivers specific to the design for the referenced subdivision application.

1. We respectfully request a waiver to the Town of Exeter's Site Plan Review and Subdivision Regulations Section 9.3.6.4 which restricts grading within 5 feet of any exterior property line.

   We feel the waiver is justified as:

   13.7.1 The proposed design provides adequate space to work between the proposed disturbance and the property line, therefore granting of the waiver will not be detrimental to public safety, health, or welfare, nor could it be deemed injurious to other property.

   13.7.2 The conditions upon which this request is made expressly due to the fact that the proposed building being proposed in the same location as the existing, which is closer to the property line that 5'. The existing building, driveway, etc. are all within 5' of exiting parcel boundaries, and this is unique to the parcel/proposal and not generally applicable to other properties.

   13.7.3 Due to the location of the existing features as referenced above, it would be impossible to improve this site without such encroachment. This would result in a hardship if the strict letter of the regulations is carried out as it would be illogical to implement this rule based on the current layout of the parcel. Care will be taken to ensure no disturbance to the abutting property (unless authorized by the abutting property owner(s)).

   13.7.4 The waiver would not be contrary to the spirit and intent of the regulations as the proposed development will result in adequate width for construction to take place without causing harm to abutting property.

   13.7.5 The proposed waiver does not propose to vary the provisions of the Zoning Ordinance or Master Plan. This is demonstrated by the facts cited above, as well as the fact that no structures are to be located within 5-feet of the property line.

Thank you for your consideration.
Very truly yours,
BEALS ASSOCIATES, PLLC

RE: Proposed Residential Development at 97 Portsmouth Avenue – Waiver Requests
Tax Map 65 Lot #: 125

Dear Members of the Board:

This is written to formalize a request for a waiver specific to the design for the referenced subdivision application.

Your petitioner seeks the following relief:

3. We respectfully request a waiver to the Town of Exeter's Site Plan Review and Subdivision Regulations which required 8' wide sidewalks for MUND development projects.

We feel the waiver is justified as:

13.7.1 The existing sidewalk on Portsmouth Avenue is 5' in width, and we are proposing to connect to that sidewalk. We are proposing 5' sidewalks on the parcel which will match the existing width. Therefore, granting of the waiver will not be detrimental to public safety, health, or welfare, nor could it be deemed injurious to other property.

13.7.2 The conditions upon which this request is made is unique to the property as the proposed development will mirror the existing sidewalk width. This will provide the same pedestrian access as is utilized now on Portsmouth Avenue. This is unique to the parcel/proposal and not generally applicable to other properties (e.g. other areas of Town may have wider sidewalks for connection).

13.7.3 The proposed walkways will provide safe and accessible pedestrian travel ways to and from Portsmouth Avenue, matches the existing sidewalk & therefore, a denial of the waiver request would result in a hardship requiring the increased impervious area which is not desirable for stormwater mitigation.

13.7.4 The waiver would not be contrary to the spirit and intent of the regulations as the proposed development and resulting sidewalks will be identical in width to the existing sidewalk they are proposed to connect to.

13.7.5 The proposed waiver does not propose to vary the provisions of the Zoning Ordinance or Master Plan. This is demonstrated by the facts cited above, along with the absence of such language from the Zoning Ordinance or Master Plan.

Thank you for your consideration.
Very truly yours,
BEALS ASSOCIATES, PLLC

NOTES

1. ALL EXISTING STRUCTURES IN THE CONSTRUCTION AREA SHALL BE REMOVED AND DISPOSED OF OFF-SITE IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS, UNLESS NOTED TO REMAIN ON THE SITE PLANS. ANY BURNING ON-SITE SHALL BE SUBJECT TO LOCAL ORDINANCES.
2. ALL EXISTING UTILITIES SHALL BE TERMINATED AT THE PROPERTY LINE, OR AS SHOWN ON THE DESIGN PLANS, IN CONFORMANCE WITH LOCAL, STATE, AND UTILITY COMPANY STANDARDS, SPECIFICATIONS, AND DETAILS. THE CONTRACTOR SHALL COORDINATE UTILITY SERVICE DISCONNECTS WITH THE UTILITY REPRESENTATIVES PRIOR TO THE START OF WORK.
3. EROSION AND SEDIMENTATION CONTROLS ARE TO BE INSTALLED PRIOR TO ANY EARTH MOVING ACTIVITIES.
4. THE CONTRACTOR SHALL INSTALL ORANGE CONSTRUCTION FENCING ALONG PROPERTY LINES IN ALL AREAS WHERE SILT FENCING IS NOT REQUIRED WHERE CONSTRUCTION IS PROPOSED ADJACENT TO ABUTTING PROPERTIES.
5. EXISTING SEWER SERVICE AND APPURTENANCES TO BE REMOVED AND DISPOSED OF PER TOWN AND STATE REQUIREMENTS. NEW SERVICES FOR EACH UNIT TO BE INSTALLED & CONNECTED PER TOWN SPECIFICATIONS. SEQUENCING AND SCHEDULING: (SEE DETAIL SHEETS FOR COMPLETE CONSTRUCTION SEQUENCE AND EROSION CONTROL SPECIFICATION.)
6. DEMOLITION REQUIREMENTS: CONDUCT DEMOLITION TO MINIMIZE INTERFERENCE WITH THE ADJACENT AND OCCUPIED BUILDING AREAS, IN COMPLIANCE WITH THE GOVERNING LAWS. PRIME CONSIDERATION SHALL BE GIVEN TO THE SAFETY, PROTECTION AND CONVENIENCE OF THE PUBLIC AND OWNER'S PERSONNEL.
7. LEAVE SITE IN CLEAN CONDITION.
8. TEMPORARY EARTH MATERIAL STOCKPILES TO BE IN UPLAND AREAS AND COMPLETELY IMPOUNDED BY SILT FENCE/HAYBALE EROSION CONTROLS.
9. THE LANDOWNER IS RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL REGULATIONS, INCLUDING ANY PERMITTING AND SETBACK REQUIREMENTS REQUIRED UNDER THESE REGULATIONS.
10. ALL WATER, SEWER, ROAD (INCLUDING DRIVEWAY), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.3 STORMWATER MANAGEMENT STANDARDS, STORMWATER MANAGEMENT PLAN, STORMWATER POLLUTION PREVENTION PLAN, AND EROSION AND SEDIMENT CONTROL STANDARDS AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE". SEE SECTION 9.14 ROADWAYS, ACCESS POINTS, AND FIRE LANES AND SECTION 9.13 PARKING AREAS FOR EXCEPTIONS.
11. THE CONTRACTOR MUST OBTAIN A VALID UTILITY PIPE INSTALLER'S LICENSE AND THE JOB SUPERVISOR OR FOREMAN MUST BE CERTIFIED BY THE TOWN PRIOR TO WORKING ON ANY WATER, SEWER, OR DRAINAGE PIPES THAT ARE IN A TOWN STREET OR RIGHT OF WAY, OR THAT WILL CONNECT OR MAY BE CONNECTED TO A TOWN WATER, SEWER, OR DRAINAGE SYSTEM. A LICENSED SUPERVISOR OR FOREMAN MUST BE PRESENT AT THE JOB SITE AT ALL TIMES DURING CONSTRUCTION OF THESE UTILITIES.

TOWN NOTES

1. THE LANDOWNER IS RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL WETLANDS REGULATIONS, INCLUDING ANY PERMITTING AND SETBACK REQUIREMENTS REQUIRED UNDER THESE REGULATIONS.
2. THE APPLICANT HAS DESIGNED THIS SITE TO SAFELY ACCOMMODATE MAXIMUM SIZE VEHICLES AND TRUCKS, (DESIGN VEHICLE IS THE EXETER LADDER TRUCK OR 35' BOX TRUCK) EITHER DELIVERING TO, OR USING THE PROPERTY.
3. ALL SNOW SHALL BE STORED IN THE AREA(S) DEPICTED ON THIS PLAN AS SNOW STORAGE AREAS. IN THE EVENT THAT THE AREA(S) APPROVED FOR SNOW STORAGE BECOME FULL, THE OWNER SHALL REASONABLY REMOVE EXCESS SNOW FROM THE SITE, AND SHALL NOT ALLOW SNOW TO BE STORED WITHIN TRAVEL AISLES.
4. ALL WASTE MATERIALS AND RECYCLABLE SHALL BE CONTAINED WITHIN THE BUILDING(S) OR APPROVED STORAGE FACILITIES AND SHALL NOT BE OTHERWISE STORED ON THE PROPERTY. REFUSE COLLECTION WILL BE BY DUMPSTER AS NEEDED.
5. ALL WATER, SEWER, ROAD (INCLUDING PARKING LOT), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.5 GRADING, DRAINAGE, AND EROSION & SEDIMENT CONTROL AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE.

NOTES:

1. THE PURPOSE OF THIS PLAN IS TO SHOW TWO 4–STORY BUILDINGS (1 MIXED USE AND 1 RESIDENTIAL) WITH ASSOCIATED PARKING SPACES.
2. ALL CONSTRUCTION SHALL CONFORM TO TOWN OF EXETER STANDARDS AND REGULATIONS.
3. ALL WATER, SEWER, ROAD (INCLUDING PARKING LOT), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.3 STORMWATER MANAGEMENT STANDARDS, STORMWATER MANAGEMENT PLAN, STORMWATER POLLUTION PREVENTION PLAN, AND EROSION AND SEDIMENT CONTROL STANDARDS AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE. SEE SECTION 9.14 ROADWAYS, ACCESS POINTS, AND FIRE LANES AND SECTION 9.13 PARKING AREAS FOR EXCEPTIONS.
4. IN ACCORDANCE WITH SITE PLAN REVIEW & SUBDIVISION REGULATIONS SECTIONS 7.15.10 AND 9.3.4 THE APPLICANT SHALL PROVIDE THE TOWN WITH THREE COPIES OF THE STORMWATER POLLUTION PREVENTION PLAN (SWPPP) AND ALSO ENSURE THAT ONE COPY REMAINS ON SITE.
5. ALL PROPOSED SIGNAGE SHALL CONFORM WITH THE TOWN ZONING REGULATIONS UNLESS A VARIANCE IS OTHERWISE REQUESTED.
6. TOTAL PROPOSED DISTURBANCE FOR CONSTRUCTION = 0.4± ACRES.
7. UPON COMPLETION OF CONSTRUCTION AND PRIOR TO RELEASE OF BOND, THE APPLICANT SHALL SUBMIT A LETTER TO THE TOWN, SIGNED AND STAMPED BY THE DESIGN ENGINEER, WHO MUST BE A LICENSED PROFESSIONAL ENGINEER IN NH, STATING CONSTRUCTION HAS BEEN COMPLETED IN CONFORMANCE WITH THE APPROVED PLANS.
8. UNDERGROUND FACILITIES, UTILITIES AND STRUCTURES HAVE BEEN LOCATED FROM FIELD OBSERVATIONS AND THEIR LOCATIONS MUST BE CONSIDERED APPROXIMATE ONLY. BEALS ASSOCIATES OR ANY OF THEIR EMPLOYEES TAKE NO RESPONSIBILITY FOR THE LOCATION OF ANY UNDERGROUND STRUCTURES OR UTILITIES NOT SHOWN, THAT MAY EXIST. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL UNDERGROUND UTILITIES OR STRUCTURES LOCATED PRIOR TO EXCAVATION WORK BY CALLING 1–888–DIG–SAFE.
9. THIS PLAN HAS BEEN PREPARED FOR MUNICIPAL APPROVALS AND FOR CONSTRUCTION BASED ON DATA OBTAINED FROM ON–SITE FIELD SURVEY AND EXISTING MUNICIPAL RECORDS. THROUGHOUT THE CONSTRUCTION PROCESS, THE CONTRACTOR SHALL INFORM THE ENGINEER IMMEDIATELY OF ANY FIELD DISCREPANCY FROM DATA AS SHOWN ON THE DESIGN PLANS. THIS INCLUDES ANY UNFORESEEN CONDITIONS, SUBSURFACE OR OTHERWISE, FOR EVALUATION AND RECOMMENDATIONS. ANY CONTRADICTION BETWEEN ITEMS OF THIS PLAN/PLAN SET, OR BETWEEN THE PLANS AND ON–SITE CONDITIONS MUST BE RESOLVED BEFORE RELATED CONSTRUCTION HAS BEEN INITIATED.
10. ALL BENCHMARKS AND TOPOGRAPHY SHOULD BE FIELD VERIFIED BY THE CONTRACTOR.

SHORELAND IMPACT SUMMARY

	0–150 FOOT	150–300 FOOT
TEMPORARY IMPACTS	121 SF	189 SF
PERMANENT IMPACTS	3,106 SF	10,326 SF

UNDERGROUND FACILITIES, UTILITIES AND STRUCTURES HAVE BEEN PLOTTED FROM FIELD OBSERVATION AND THEIR LOCATION MUST BE CONSIDERED APPROXIMATE ONLY. NEITHER BEALS ASSOCIATES, NOR ANY OF THEIR EMPLOYEES TAKE RESPONSIBILITY FOR THE LOCATION OF ANY UNDERGROUND STRUCTURES OR UTILITIES NOT SHOWN THAT MAY EXIST. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL UNDERGROUND STRUCTURES AND/OR UTILITIES LOCATED PRIOR TO EXCAVATION WORK BY CALLING 1-888-DIG-SAFE (1-888-344-7233) AND EXETER DPW (603) 773-6157.

NOTES:

1. CONSTRUCTION OPERATIONS SHALL BE CARRIED OUT IN SUCH A MANNER SO THAT EROSION AND AIR AND WATER POLLUTION WILL BE MINIMIZED.
2. STRAW BALES SHALL BE ANCHORED INTO THE SOIL USING 2" X 2" STAKES DRIVEN THROUGH THE BALES AND AT LEAST 18 INCHES IN TO THE SOIL.
3. SEEDING, FERTILIZING, AND MULCHING SHALL CONFORM TO THE RECOMMENDATIONS IN THE APPROPRIATED VEGETATIVE BMP.
4. THROUGHOUT THE DURATION OF CONSTRUCTION ACTIVITIES THE CONTRACTOR SHALL TAKE PRECAUTIONS AND INSTRUCTIONS FROM THE PLANNING DEPARTMENT IN ORDER TO PREVENT, ABATE AND CONTROL THE EMISSION OF FUGITIVE DUST INCLUDING BUT NOT LIMITED TO WETTING, COVERING, SHIELDING, OR VACUUMING.
5. THE NH COMMISSIONER OF AGRICULTURE PROHIBITS THE COLLECTION, POSSESSION, IMPORTATION, TRANSPORTATION, SALE, PROPAGATION, TRANSPLANTATION, OR CULTIVATION OF PLANTS BANNED BY NH LAW RSA 430:53 AND NH CODE ADMINISTRATIVE RULES AGR 3800. THE PROJECT SHALL MEET ALL REQUIREMENTS AND THE INTENT OF RSA 430:53 AND AGR 3800 RELATIVE TO INVASIVE SPECIES.

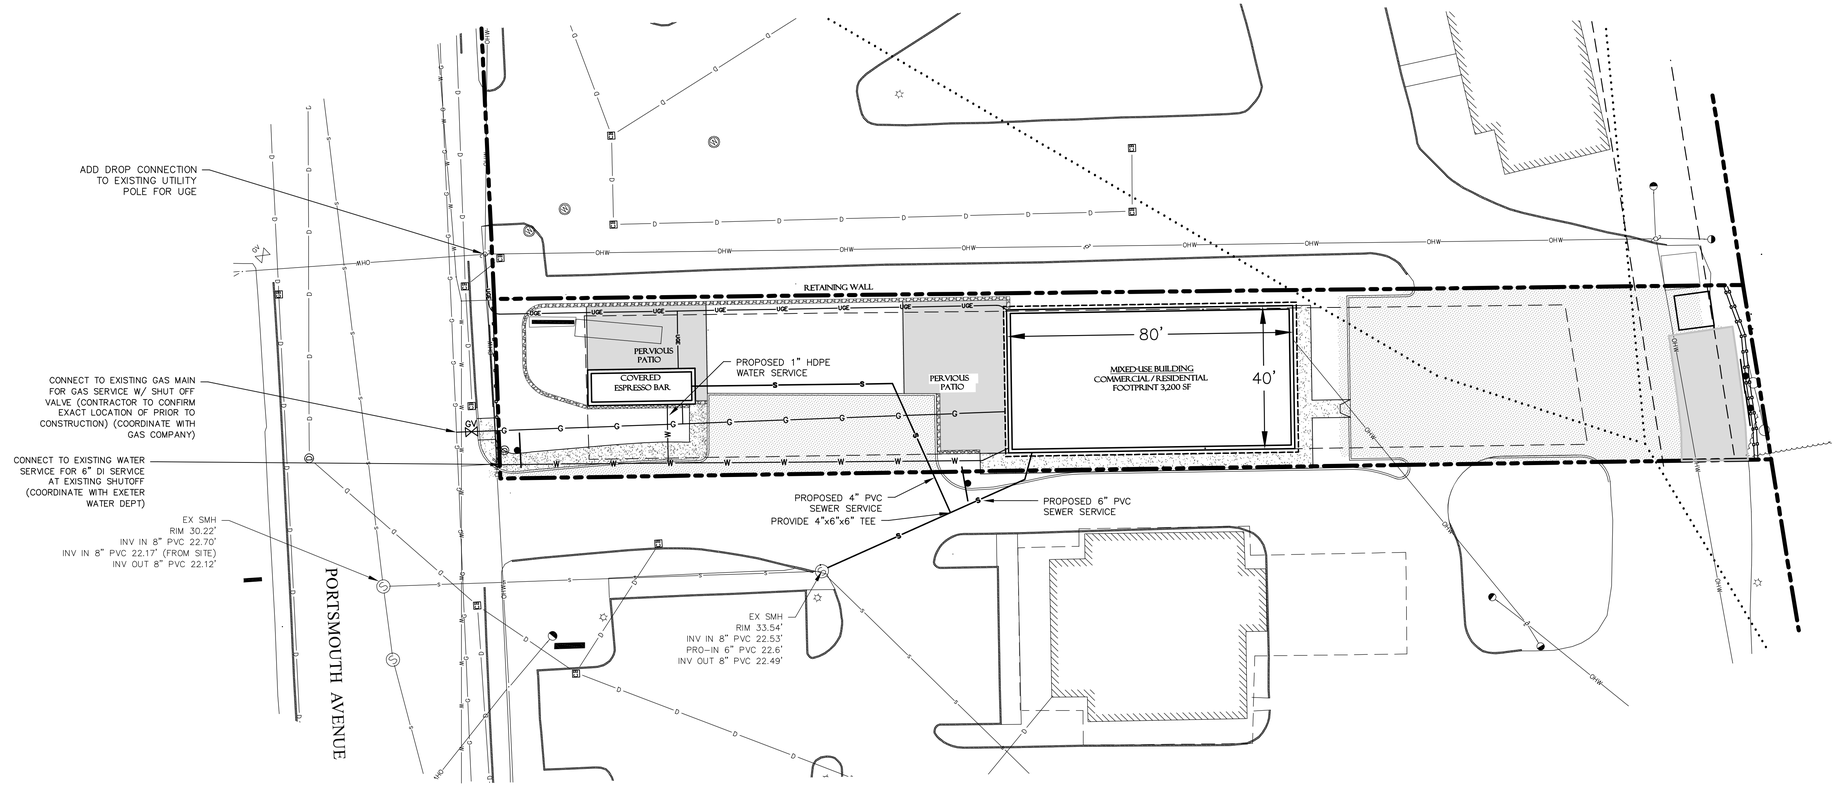
UTILITY NOTES:

1. PRIOR TO THE START OF CONSTRUCTION, THE CONTRACTOR SHALL COORDINATE WITH THE ENGINEER, ARCHITECT AND/OR OWNER, IN ORDER TO OBTAIN AND/OR PAY ALL THE NECESSARY LOCAL PERMITS, FEES, AND BONDS.
2. THE CONTRACTOR SHALL PROVIDE NOTICE TO ALL COMPANIES AND LOCAL AUTHORITIES OWNING OR HAVING A JURISDICTION OVER UTILITIES RUNNING TO, THROUGH, OR ACROSS PROJECT AREAS PRIOR TO DEMOLITION AND/OR CONSTRUCTION ACTIVITIES.
3. THE SPECIFICATIONS FOR PROPOSED PRIVATE UTILITY SERVICES SHALL BE TO THE STANDARDS AND REQUIREMENTS OF THE RESPECTIVE UTILITY COMPANY. CONTRACTOR TO COORDINATE WITH UTILITY COMPANIES FOR PROPER UTILITY CROSSING REQUIREMENTS PRIOR TO CONSTRUCTION.
4. PRIOR TO THE PRE-CONSTRUCTION MEETING UGE&T PLANS FROM THE UTILITY COMPANIES NEED TO BE REDRAWN ON THIS SHEET. ADDITIONALLY THE CONTRACTOR NEEDS TO HAVE A COMPLETED SWPPP. A PRE-CONSTRUCTION MEETING SHALL BE HELD WITH THE OWNER, ENGINEER, ARCHITECT, CONTRACTOR, LOCAL OFFICIALS, AND ALL UTILITY COMPANIES (PUBLIC AND PRIVATE) PRIOR TO START OF CONSTRUCTION.
5. ALL CONSTRUCTION SHALL CONFORM TO EXETER STANDARDS AND REGULATIONS, UNLESS OTHERWISE SPECIFIED. ALL CONSTRUCTION ACTIVITIES SHALL CONFORM TO LABOR (OSHA) RULES AND REGULATIONS. BUILDINGS ARE TO BE SERVICED BY UNDERGROUND UTILITIES.
6. THE CONTRACTOR IS TO VERIFY LOCATION AND DEPTH OF ALL EXISTING UTILITY STUBS PRIOR TO CONSTRUCTION AND DISCONNECT ALL EXISTING SERVICE CONNECTIONS AT THEIR RESPECTIVE MAINS (IF REQUIRED) IN ACCORDANCE WITH THE RESPECTIVE UTILITY COMPANY'S STANDARDS AND SPECIFICATIONS.
7. WATER LINE SHALL BE INSTALLED UNDER ALL UTILITY LINES WITH A MINIMUM OF 18" OF VERTICAL CLEARANCE BETWEEN UTILITIES AT CROSSINGS.
8. AN AS-BUILT PLAN IS TO BE PREPARED AND SUBMITTED TO DEPARTMENT OF PUBLIC WORKS IN DIGITAL (.DWG AND .PDF) AND MYLAR FORMATS.
9. THE CONTRACTOR IS RESPONSIBLE FOR PAYMENT OF ALL CONNECTION FEES.
10. SANITARY SEWER FLOW CALCULATIONS:
    24 UNITS AT 2 BEDROOMS EACH= 48 BEDROOMS
    ESTIMATED FLOW AT 150 GPD/BEDROOM= 7,200 GPD

    FOOD SERVICE WITH 70 SEATS AND 3 EMPLOYEES
    ESTIMATED FLOW AT 40 GPD/SEAT = 2,800 GPD + 20 GPD/EMPLOYEE = 60 GPD = 2,860 GPD

    TOTAL ESTIMATED FLOW = 10,060 GPD
11. ALL WATER AND SANITARY LEADS TO BUILDING SHALL END 5' OUTSIDE THE BUILDING LIMITS AS SHOWN ON PLANS AND SHALL BE PROVIDED WITH A TEMPORARY CAP AND WITNESS AT END.
12. THRUST BLOCKS SHALL BE PROVIDED AT ALL WATER LINE BENDS, TEES, AND MECHANICAL JOINTS.
13. CONTRACTOR SHALL MINIMIZE DISRUPTIONS TO EXISTING WATER SERVICES AND ALL REQUIREMENTS OF EXETER WATER DEPARTMENT SHALL BE FOLLOWED REGARDING NOTIFICATION OF INTERRUPTION OF SERVICE (MIN 48 HOURS). TEE INSTALLATION MAY NEED TO BE CONDUCTED AT NIGHT AS DIRECTED BY EXETER WATER DEPT.
14. WATER VALVES ARE TO BE OPERATED ONLY BY MUNICIPAL STAFF.
15. THE INSTALLATION OF SMOKE, HEAT, FIRE, OR CARBON MONOXIDE ALARMS OR SYSTEMS SHALL COMPLY WITH NFPA 72 REQUIREMENTS.
16. ALL SEWER SERVICE BENDS SHALL HAVE CLEANOUTS INSTALLED.
17. ALL WATER, SEWER, ROAD (INCLUDING PARKING LOT), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.3 STORMWATER MANAGEMENT STANDARDS, STORMWATER MANAGEMENT PLAN, STORMWATER POLLUTION PREVENTION PLAN, AND EROSION AND SEDIMENT CONTROL STANDARDS AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE", SEE SECTION 9.14 ROADWAYS, ACCESS POINTS, AND FIRE LANES AND SECTION 9.13 PARKING AREAS FOR EXCEPTIONS.
18. THE CONTRACTOR MUST OBTAIN A VALID UTILITY PIPE INSTALLER'S LICENSE AND THE JOB SUPERVISOR OR FOREMAN MUST BE CERTIFIED BY THE TOWN PRIOR TO WORKING ON ANY WATER, SEWER, OR DRAINAGE PIPES THAT ARE IN A TOWN STREET OR RIGHT OF WAY, OR THAT WILL CONNECT OR MAY BE CONNECTED TO A TOWN WATER, SEWER, OR DRAINAGE SYSTEM. A LICENSED SUPERVISOR OR FOREMAN MUST BE PRESENT AT THE JOB SITE AT ALL TIMES DURING CONSTRUCTION OF THESE UTILITIES.



UNDERGROUND FACILITIES, UTILITIES AND STRUCTURES HAVE BEEN PLOTTED FROM FIELD OBSERVATION AND THEIR LOCATION MUST BE CONSIDERED APPROXIMATE ONLY. NEITHER BEALS ASSOCIATES, NOR ANY OF THEIR EMPLOYEES TAKE RESPONSIBILITY FOR THE LOCATION OF ANY UNDERGROUND STRUCTURES OR UTILITIES NOT SHOWN THAT MAY EXIST. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL UNDERGROUND STRUCTURES AND/OR UTILITIES LOCATED PRIOR TO EXCAVATION WORK BY CALLING 1-888-DIG-SAFE (1-888-344-7233) AND EXETER DPW (603) 773-6157.

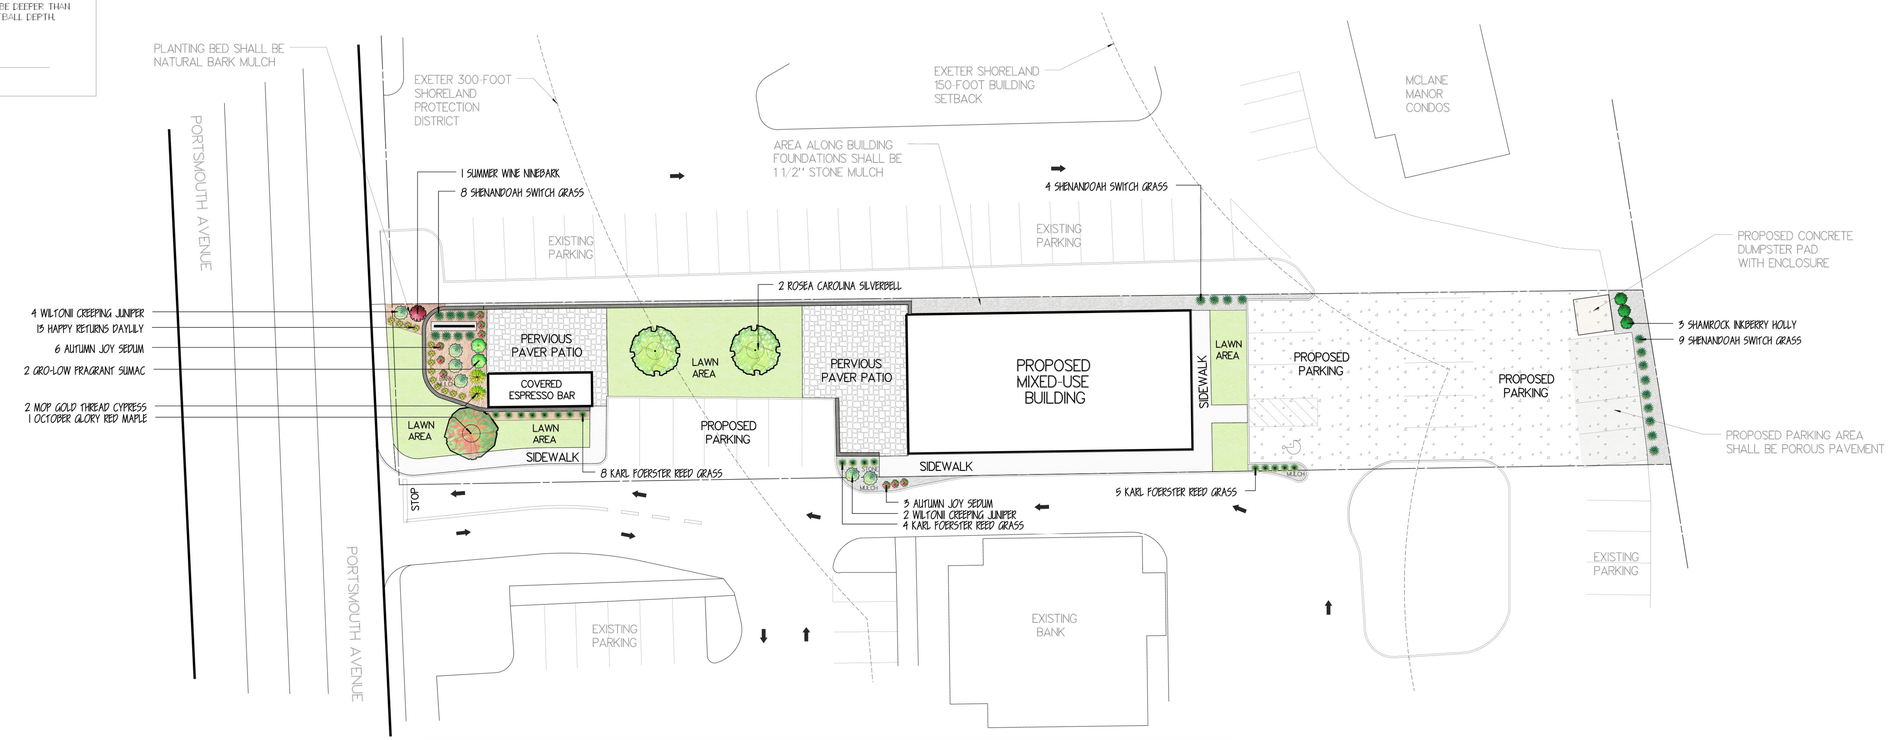
TYPICAL SHRUB OR TREE PLANTING DETAIL

NOT TO SCALE



PLANTING NOTES:

THE LANDSCAPE INSTALLATION CONTRACTOR SHALL LOCATE AND VERIFY ALL EXISTING UTILITIES PRIOR TO STARTING WORK.

THE CONTRACTOR SHALL CONFORM TO THE GUIDELINES ESTABLISHED BY THE CURRENT AMERICAN STANDARD FOR NURSERY STOCK PUBLISHED BY THE AMERICAN ASSOCIATION OF NURSERYMEN.

THE DEVELOPER SHALL PLANT A MINIMUM OF THE AMOUNT OF SHRUBS AND TREES SHOWN ON THE PLANT LIST, BUT EXACT SPECIES MAY VARY BASED ON AVAILABILITY. ALL PLANT MATERIAL SHALL BE GUARANTEED BY THE CONTRACTOR FOR ONE FULL YEAR FROM THE TIME OF OWNER ACCEPTANCE.

ALL PLANT MATERIAL SHALL BE WATERED THOROUGHLY DURING THE FIRST 24 HOUR PERIOD AFTER PLANTED. PLANTS SHALL BE WATERED WEEKLY OR MORE AS NECESSARY DURING THE FIRST GROWING YEAR.

ALL TREES, SHRUBS AND PERENNIALS SHALL BE PLANTED IN MULCH BEDS EXCEPT WHERE SPECIFIED ON THE PLAN. ALL MULCH AREAS SHALL RECEIVE A 3 INCH LAYER OF NATURAL BARK MULCH OVER A CONSTRUCTION GRADE WEED MAT BARRIER.

THE CONTRACTOR SHALL REMOVE WEEDS, ROCKS, CONSTRUCTION DEBRIE, ETC. FROM ANY LANDSCAPE AREA UNLESS DESIGNATED TO REMAIN.

ALL DISTURBED AREAS TO BE LANDSCAPED SHALL BE REPLACED WITH SUITABLE TOPSOIL.

THE BUILDING FOUNDATIONS WILL HAVE STONE MULCH BORDER EXTENDING OUT 18 INCHES FROM FOUNDATION AS DRIP EDGE. THE STONE MULCH SHALL BE 3 INCH DEPTH OVER A CONSTRUCTION GRADE WEED MAT BARRIER.

THIS PLAN SHEET IS INTENDED FOR LANDSCAPING PURPOSES ONLY. REFER TO CIVIL AND SITE SHEETS FOR ALL OTHER SITE CONSTRUCTION INFORMATION.

ALL PLANTING SHALL CONFORM TO THE TOWN OF EXETER, NEW HAMPSHIRE'S SITE PLAN REVIEW REGULATIONS PLANTING REQUIREMENTS.

Qty	Botanical Name	Common Name	Size/Condition
Trees			
1	Acer rubrum 'October Glory'	OCTOBER GLORY RED MAPLE	3" Caliper B&B
2	Halesia tetraptera 'Rosea'	ROSEA CAROLINA SILVERBELL	2" Caliper B&B
Shrubs			
2	Chamaecyparis pisifera 'Mop'	MOP GOLD THREAD CYPRESS	5 Gallon
3	Ilex glabra 'Shamrock'	SHAMROCK INKBERRY HOLLY	5 Gallon
6	Juniperus horizontalis 'Wiltonii'	WILTONII CREEPING JUNIPER	3 Gallon
1	Physocarpus opulifolius 'Seward'	SUMMER WINE NINEBARK	5 Gallon
2	Rhus aromatica 'Gro-low'	GRO-LOW FRAGRANT SUMAC	3 Gallon
Ornamental Grasses			
17	Calamagrostis x acutiflora 'Karl Foerster'	KARL FOERSTER REED GRASS	2 Gallon
21	Panicum virgatum 'Shenandoah'	SHENANDOAH SWITCH GRASS	2 Gallon
Perennials			
13	Hemerocallis 'Happy Returns'	HAPPY RETURNS DAYLILY	1 Gallon
9	Sedum 'Autumn Joy'	AUTUMN JOY SEDUM	1 Gallon

NOTE: PLANT CONTAINER SIZES MAY VARY BASED ON AVAILABILITY.

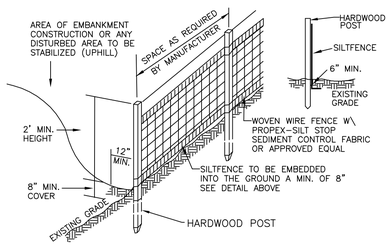
EXETER, NH
TAX MAP 65, LOT 125

DATE:	APRIL 29, 2025	SCALE:	1" = 20'
PROJ. NO:	NH-1547	SHEET NO.	8

CONSTRUCTION SEQUENCE

1. CUT AND REMOVE TREES IN CONSTRUCTION AREAS AS REQUIRED OR DIRECTED.
2. CONSTRUCT AND/OR INSTALL TEMPORARY AND PERMANENT SEDIMENT EROSION AND DETENTION CONTROL FACILITIES AS REQUIRED. EROSION, SEDIMENT AND DETENTION CONTROL FACILITIES SHALL BE INSTALLED AND STABILIZED PRIOR TO ANY EARTH MOVING OPERATION AND PRIOR TO DIRECTING RUNOFF TO THEM.
3. CLEAR, CUT, GRUB AND DISPOSE OF DEBRIS IN APPROVED FACILITIES. STUMPS AND DEBRIS ARE TO BE REMOVED FROM SITE AND DISPOSED OF PER STATE AND LOCAL REGULATIONS.
4. EXCAVATE AND STOCKPILE TOPSOIL /LOAM. ALL AREAS SHALL BE STABILIZED IMMEDIATELY AFTER GRADING.
5. CONSTRUCT TEMPORARY CULVERTS AS REQUIRED OR DIRECTED.
6. CONSTRUCT THE ROADWAY AND ITS ASSOCIATED DRAINAGE STRUCTURES.
7. INSTALL PIPE AND CONSTRUCTION ASSOCIATED APPURTENANCES AS REQUIRED OR DIRECTED. ALL DISTURBED AREAS SHALL STABILIZED IMMEDIATELY AFTER GRADING.
8. BEGIN PERMANENT AND TEMPORARY SEEDING AND MULCHING. ALL CUT AND FILL SLOPES AND DISTURBED AREAS SHALL BE SEEDED OR MULCHED AS REQUIRED, OR DIRECTED.
9. DAILY OR AS REQUIRED, CONSTRUCT TEMPORARY BERMS, DRAINAGE CHECK DAMS, DITCHES, SEDIMENT TRAPS, ETC. TO PREVENT EROSION ON THE SITE AND PREVENT ANY SILTATION OF ABUTTING WATERS OR PROPERTY.
10. INSPECT AND MAINTAIN ALL EROSION AND SEDIMENT CONTROL MEASURES DURING CONSTRUCTION
11. COMPLETE PERMANENT SEEDING AND LANDSCAPING
12. REMOVE TEMPORARY EROSION CONTROL MEASURES AFTER SEEDING AREAS HAVE ESTABLISHED THEMSELVES AND SITE IMPROVEMENTS ARE COMPLETE. SMOOTH AND RE-VEGETATE ALL DISTURBED AREAS.
13. ALL SWALES AND DRAINAGE STRUCTURES WILL BE CONSTRUCTED AND STABILIZED PRIOR TO HAVING RUNOFF DIRECTED TO THEM.
14. FINISH PAVING ALL DRIVEWAYS.
15. CONTRACTOR TO BE AWARE CLEANING OF EXISTING CATCH BASINS MAY BE REQUIRED PRIOR TO BOND RELEASE AS DETERMINED BY THE EXETER DPW.



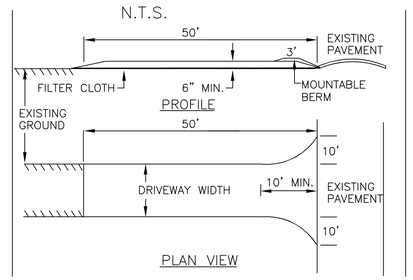
SILT FENCE CONSTRUCTION SPECIFICATIONS

1. WOVEN WIRE FENCE TO BE FASTENED SECURELY TO FENCE POSTS WITH WIRE TIES OR STAPLES AND FILTER CLOTH SHALL BE FASTENED TO WOVEN WIRE EVERY 24" AT TOP MID AND BOTTOM SECTIONS AND BE EMBEDDED INTO GROUND A MINIMUM OF 8" THE FENCE POSTS SHALL BE A MINIMUM 48" LONG, SPACED A
2. MAXIMUM 10' APART, AND DRIVEN A MINIMUM OF 16" INTO THE GROUND WHEN TWO SECTIONS OF FILTER CLOTH ADJOIN EACH OTHER,
3. THE ENDS OF THE FABRIC SHALL BE OVERLAPPED BY SIX INCHES, FOLDED AND STAPLED TO PREVENT SEDIMENT FROM BYPASSING MAINTENANCE SHALL BE PERFORMED AS NEEDED AND SEDIMENT
4. REMOVED WHEN "BULGES" DEVELOP IN THE SILT FENCE AND PROPERLY DISPOSED OF PLACE THE ENDS OF THE SILT FENCE UP CONTOUR TO PROVIDE
5. FOR SEDIMENT STORAGE SILT FENCES SHALL BE REMOVED WHEN NO LONGER NEEDED AND
6. THE SEDIMENT COLLECTED SHALL BE DISPOSED AS DIRECTED BY THE ENGINEER. THE AREA DISTURBED BY THE REMOVAL SHALL BE SMOOTHED AND RE-VEGETATED

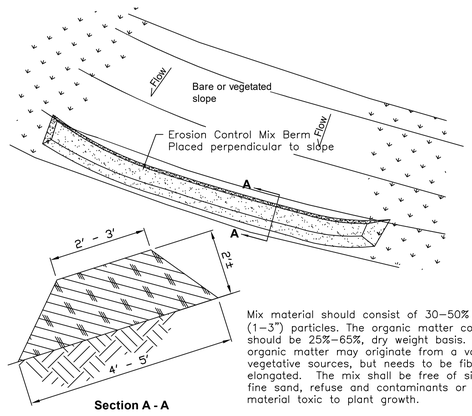
SILT FENCE MAINTENANCE

1. SILT FENCES SHALL BE INSPECTED IMMEDIATELY AFTER EACH RAINFALL AND AT LEAST DAILY DURING PROLONGED RAINFALL. ANY REPAIRS THAT ARE REQUIRED SHALL BE MADE IMMEDIATELY IF THE FABRIC ON A SILT FENCE SHOULD DECOMPOSE OR BECOME
2. INEFFECTIVE DURING THE EXPECTED LIFE OF THE FENCE, THE FABRIC SHALL BE REPLACED PROMPTLY. SEDIMENT DEPOSITS SHOULD BE INSPECTED AFTER EVERY STORM EVENT.
3. THE DEPOSITS SHOULD BE REMOVED WHEN THEY REACH APPROXIMATELY ONE HALF THE HEIGHT OF THE BARRIER. SEDIMENT DEPOSITS THAT ARE REMOVED OR LEFT IN PLACE AFTER THE
4. FABRIC HAS BEEN REMOVED SHALL BE GRADED TO CONFORM WITH THE EXISTING TOPOGRAPHY AND VEGETATED.

STABILIZED CONSTRUCTION ENTRANCE



1. STONE FOR A STABILIZED CONSTRUCTION ENTRANCE SHALL BE 3 INCH STONE, RECLAIMED STONE, OR RECYCLED CONCRETE EQUIVALENT.
2. THE LENGTH OF THE STABILIZED ENTRANCE SHALL NOT BE LESS THAN 50 FEET,
3. THE THICKNESS OF THE STONE FOR THE STABILIZED ENTRANCE SHALL NOT BE LESS THAN 6 INCHES.
4. THE WIDTH OF THE ENTRANCE SHALL NOT BE LESS THAN THE FULL WIDTH OF THE ENTRANCE WHERE INGRESS OR EGRESS OCCURS OR 10 FEET, WHICH EVER IS GREATER.
5. GEOTEXTILE FILTER CLOTH SHALL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING THE STONE.
6. ALL SURFACE WATER THAT IS FLOWING TO OR DIVERTED TOWARD THE CONSTRUCTION ENTRANCE SHALL BE PIPED BENEATH THE ENTRANCE, IF PIPING IS IMPRACTICAL, A BERM WITH 5:1 SLOPES THAT CAN BE CROSSED BY VEHICLES MAY BE SUBSTITUTED FOR THE PIPE.
7. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO PUBLIC RIGHTS-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND AND REPAIR AND/OR CLEAN OUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, WASHED, OR TRACKED ONTO PUBLIC RIGHT-OF-WAY MUST BE REMOVED PROMPTLY.



Section A - A

Mix material should consist of 30-50% large (1-3") particles. The organic matter content should be 25%-65%, dry weight basis. The organic matter may originate from a variety of vegetative sources, but needs to be fibrous and elongated. The mix shall be free of silt, clay, fine sand, refuse and contaminants or any material toxic to plant growth.

Erosion Control Mix berms are effective filters for overland flow conditions and should not be used to filter concentrated flow such as that found in drainage ditchs, streams, etc.

SEEDING RATES

MIXTURE	POUNDS PER ACRE	POUNDS PER 1,000 Sq. Ft.
A. TALL FESCUE	20	0.45
CREEPING RED FESCUE	20	0.45
RED TOP	2	0.05
TOTAL	42	0.95
B. TALL FESCUE	15	0.35
CREEPING RED FESCUE	10	0.25
CROWN VETCH	15	0.35
OR		
FLAT PEA	30	0.75
TOTAL	40 OR 55	0.95 OR 1.35
C. TALL FESCUE	20	0.45
CREEPING RED FESCUE	20	0.45
BIRDS FOOT TREFOIL	8	0.20
TOTAL	48	1.10
D. TALL FESCUE	20	0.45
FLAT PEA	30	0.75
TOTAL	50	1.20
E. CREEPING RED FESCUE 1/	50	1.15
KENTUCKY BLUEGRASS 1/	50	1.15
TOTAL	100	2.30
F. TALL FESCUE 1	150	3.60

TEMPORARY EROSION CONTROL MEASURES

1. NO MORE THAN 1.58 ACRES OF LAND SHALL BE EXPOSED AT ANY ONE TIME.
2. EROSION, SEDIMENT AND DETENTION MEASURES SHALL BE INSTALLED AS SHOWN ON THE PLANS AND AT LOCATIONS AS REQUIRED OR DIRECTED BY THE ENGINEER ALL DISTURBED AREAS SHALL BE RETURNED TO ORIGINAL GRADES AND ELEVATIONS.
3. DISTURBED AREAS SHALL BE LOAMED WITH A MINIMUM OF 4" OF LOAM AND SEEDED WITH NOT LESS THAN 1.10 POUNDS OF SEED PER 1000 SQUARE FEET OF AREA. (48 POUNDS PER ACRE) SEE SEED SPECIFICATIONS THIS SHEET.
4. SILT FENCES AND OTHER EROSION CONTROLS SHALL BE INSPECTED WEEKLY AND AFTER EVERY RAIN EVENT GREATER THAN 0.5" DURING THE LIFE OF THE PROJECT. ALL DAMAGED AREAS SHALL BE REPAIRED, SEDIMENT DEPOSITS SHALL PERIODICALLY BE REMOVED AND DISPOSED OF.
5. AFTER ALL DISTURBED AREAS HAVE BEEN STABILIZED, THE TEMPORARY EROSION CONTROL MEASURES ARE TO BE REMOVED AND THE AREA DISTURBED BY THE REMOVAL SMOOTHED AND RE-VEGETATED.
6. AREAS MUST BE SEEDED AND MULCHED WITHIN 3 DAYS OF FINAL GRADING, PERMANENTLY STABILIZED WITHIN 15 DAYS OF FINAL GRADING, OR TEMPORARILY STABILIZED WITHIN 30 DAYS OF INITIAL DISTURBANCE OF SOIL.

WINTER MAINTENANCE

1. ALL DISTURBED AREAS THAT DO NOT HAVE AT LEAST 85% VEGETATIVE COVERAGE PRIOR TO OCTOBER 15TH, SHALL BE STABILIZED BY APPLYING MULCH AT A RATE OF 3-4 TONS PER ACRE. ALL SIDE SLOPES, STEEPER THAN 4:1, THAT ARE NOT DIRECTED TO SWALES OR DETENTION BASINS, SHALL BE LINED WITH BIODEGRADABLE/PHOTODEGRADABLE "JUTE MATTING" (EXCELSIOR'S CURLEX II OR EQUAL). ALL OTHER SLOPES SHALL BE MULCHED AND TACKED AT A RATE OF 3-4 TONS PER ACRE. THE APPLICATION OF MULCH AND/OR JUTE MATTING SHALL NOT OCCUR OVER EXISTING SNOW COVER. IF THE SITE IS ACTIVE AFTER OCTOBER 15TH, ANY SNOW THAT ACCUMULATES ON DISTURBED AREAS SHALL BE REMOVED. PRIOR TO SPRING THAW ALL AREAS WILL BE STABILIZED, AS DIRECTED ABOVE.

2. ALL SWALES THAT DO NOT HAVE FULLY ESTABLISHED VEGETATION SHALL BE EITHER LINED WITH TEMPORARY JUTE MATTING OR TEMPORARY STONE CHECK DAMS (APPROPRIATELY SPACED). STONE CHECK DAMS WILL BE MAINTAINED THROUGHOUT THE WINTER MONTHS. IF THE SWALES ARE TO BE MATTED WITH PERMANENT LINERS OR RIPRAP WITH ENGINEERING FABRIC, THIS SHALL BE COMPLETED PRIOR TO WINTER SHUTDOWN OR AS SOON AS THEY ARE PROPERLY GRADED AND SHAPED.

3. PRIOR TO OCT. 15TH ALL ROADWAY AND PARKING AREAS SHALL BE BROUGHT UP TO AND THROUGH THE BANK RUN GRAVEL APPLICATION. IF THESE AREAS' ELEVATIONS ARE PROPOSED TO REMAIN BELOW THE PROPOSED SUBGRADE ELEVATION, THE SUBGRADE MATERIAL SHALL BE ROUGHLY CROWNED AND A 3" LAYER OF CRUSHED GRAVEL SHALL BE PLACED AND COMPACTED. THIS WILL ALLOW THE SUBGRADE TO SHED RUNOFF AND WILL REDUCE ROADWAY EROSION. THIS CRUSHED GRAVEL DOES NOT HAVE TO CONFORM TO NH DOT 304.3, BUT SHALL HAVE BETWEEN 15-25% PASSING THE #200 SIEVE AND THE LARGEST STONE SIZE SHALL BE 2". IF THE SITE IS ACTIVE AFTER NOVEMBER 15TH, ANY ACCUMULATED SNOW SHALL BE REMOVED FROM ALL ROADWAY AND PARKING AREAS.

4. AFTER OCTOBER 15TH, THE END OF NEW HAMPSHIRE'S AVERAGE GROWING SEASON, NO ADDITIONAL LOAM SHALL BE SPREAD ON SIDE SLOPES AND SWALES. THE STOCKPILES THAT WILL BE LEFT UNDISTURBED UNTIL SPRING SHALL BE SEEDED BY THIS DATE. AFTER OCTOBER 15TH, ANY NEW OR DISTURBED PILES SHALL BE MULCHED AT A RATE OF 3-4 TONS PER ACRE. ALL STOCKPILES THAT WILL REMAIN THROUGHOUT THE WINTER SHALL BE SURROUNDED WITH SILT FENCING.

SEEDING SPECIFICATIONS

1. GRADING AND SHAPING
   A. SLOPES SHALL NOT BE STEEPER THAN 2:1;3:1 SLOPES OR FLATTER ARE PREFERRED. WHERE MOWING WILL BE DONE, 3:1 SLOPES OR FLATTER ARE RECOMMENDED.
2. SEEDBED PREPARATION
   A. SURFACE AND SEEPAGE WATER SHOULD BE DRAINED OR DIVERTED FROM THE SITE TO PREVENT DROWNING OR WINTER KILLING OF THE PLANTS.
   B. STONES LARGER THAN 4 INCHES AND TRASH SHOULD BE REMOVED BECAUSE THEY INTERFERE WITH SEEDING AND FUTURE MAINTENANCE OF THE AREA. WHERE FEASIBLE, THE SOIL SHOULD BE TILLED TO A DEPTH OF ABOUT 4 INCHES TO PREPARE A SEEDBED AND MIX FERTILIZER AND LIME INTO THE SOIL. THE SEEDBED SHOULD BE LEFT IN REASONABLY FIRM AND SMOOTH CONDITION. THE LAST TILLAGE OPERATION SHOULD BE PERFORMED ACROSS THE SLOPE WHEREVER PRACTICAL.
3. ESTABLISHING A STAND
   A. LIME AND FERTILIZER SHOULD BE APPLIED PRIOR TO OR AT THE TIME OF SEEDING AND INCORPORATED INTO THE SOIL KINDS AND AMOUNTS OF LIME AND FERTILIZER SHOULD BE BASED ON AN EVALUATION OF SOIL TESTS. WHEN A SOIL TEST IS NOT AVAILABLE, THE FOLLOWING MINIMUM AMOUNTS SHOULD BE APPLIED:

   AGRICULTURAL LIMESTONE, 2 TONS PER ACRE OR 100 LBS PER 1,000 SQ. FT..

   NITROGEN(N), 50 LBS PER ACRE OR 1. 1 LBS PER 1,000 SQ.FT.

   PHOSPHATE(P205), 100 LBS PER ACRE OR 2. 2 LBS PER 1,000 SQ.FT.

   POTASH(K20), 100 LBS PER ACRE OR 2. 2 LBS PER 1,000 SQ.FT.

   (NOTE: THIS IS THE EQUIVALENT OF 500 LBS PER ACRE OF 10-20-20 FERTILIZER OR 1,000 LBS PER ACRE OF 5-10-10.)

Erosion Control Mix Berm

B. SEED SHOULD BE SPREAD UNIFORMLY BY THE METHOD MOST APPROPRIATE FOR THE SITE. METHODS INCLUDE BROADCASTING, DRILLING AND HYDROSEEDING. WHERE BROADCASTING IS USED, COVER SEED WITH .25 INCH OF SOIL OR LESS, BY CULTIPACKING OR RAKING.

C. REFER TO TABLE(G-E1 THIS SHEET) FOR APPROPRIATE SEED MIXTURES AND TABLE(H-E1 THIS SHEET) FOR RATES OF SEEDING. ALL LEGUMES (CROWN VETCH, BIRDS FOOT TREFOIL, AND FLAT PEA) MUST BE INOCULATED WITH THEIR SPECIFIC INOCULANT.

D. WHEN SEEDED AREAS ARE MULCHED, PLANTINGS MAY BE MADE FROM EARLY SPRING TO EARLY OCTOBER. WHEN SEEDED AREAS ARE NOT MULCHED, PLANTINGS SHOULD BE MADE FROM EARLY SPRING TO MAY 20 OR FROM AUGUST 10 TO SEPTEMBER 1.

4. MULCH
   A. HAY, STRAW, OR OTHER MULCH, WHEN NEEDED, SHOULD BE APPLIED IMMEDIATELY AFTER SEEDING.
   B. MULCH WILL BE HELD IN PLACE USING APPROPRIATE TECHNIQUES FROM THE BEST MANAGEMENT PRACTICE FOR MULCHING. HAY OR STRAW MULCH SHALL BE PLACED AT A RATE OF 90 LBS PER 1000 SQ. FT.

5. MAINTENANCE TO ESTABLISH A STAND
   A. PLANTED AREA SHOULD BE PROTECTED FROM DAMAGE BY FIRE, GRAZING, TRAFFIC, AND DENSE WEED GROWTH.
   B. FERTILIZATION NEEDS SHOULD BE DETERMINED BY ONSITE INSPECTIONS. SUPPLEMENTAL FERTILIZER IS USUALLY THE KEY TO FULLY COMPLETE THE ESTABLISHMENT OF THE STAND BECAUSE MOST PERENNIAL STAKE 2 TO 3 YEARS TO BECOME ESTABLISHED.
   C. IN WATERWAYS, CHANNELS, OR SWALES WHERE UNIFORM FLOW CONDITIONS ARE ANTICIPATED, OCCASIONAL MOWING MAY BE NECESSARY TO CONTROL GROWTH OF WOODY VEGETATION.

SEEDING GUIDE

RECOMMENDED

GRAVEL PIT, SEE NH-PM-24 IN APPENDIX FOR RECOMMENDATION REGARDING RECLAMATION OF SAND AND GRAVEL PITS.

* REFER TO SEEDING MIXTURES AND RATES IN TABLE 7-36.
** POORLY DRAINED SOILS ARE NOT DESIRABLE FOR USE AS PLAY AREAS OR ATHLETIC FIELDS.

NOTE: TEMPORARY SEED MIX FOR STABILIZATION OF TURF SHALL BE WINTER RYE OR OATS AT A RATE OF 2.5 LBS. PER 1000 S.F. AND SHALL BE PLACED PRIOR TO OCT. 15, IF PERMANENT SEEDING NOT YET COMPLETE.

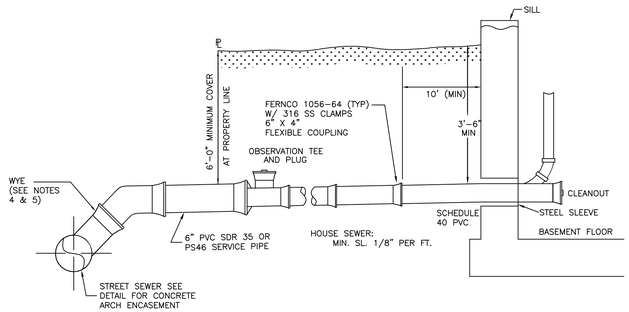
NOTE:
1. PAVEMENT REPAIR IN EXISTING ROADWAYS SHALL CONFORM TO STREET OPENING REGULATIONS.
2. NEW ROADWAY CONSTRUCTION SHALL CONFORM TO SUBDIVISION SPEC'S.

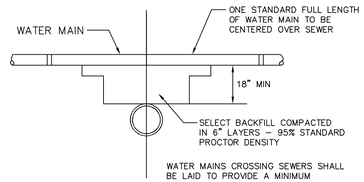
TYPICAL SEWER TRENCH DETAIL

NOT TO SCALE



NOTES:
1) SEWER SERVICE FROM PROPERTY LINE TO 10' OUTSIDE OF BUILDING SHALL BE INSTALLED UNDER THIS CONTRACT ONLY WHEN OUTSIDE THE TRENCH DEWATERING OR LEDGE EXCAVATION IS REQUIRED.
2) PIPE DEPTH AT HOUSE SHALL BE ABOVE THE SEASONAL GROUND WATER LEVEL.
3) SEWER SHALL BE BELOW SLAB ONLY WHEN BASEMENT TOILETS EXIST.
4) JOINTS SHALL BE DEPENDENT UPON A NEOPRENE OR ELASTOMERIC GASKET FOR WATER TIGHTNESS. ALL JOINTS SHALL BE PROPERLY MATCHED WITH THE PIPE MATERIALS USED. WHERE DIFFERING MATERIALS ARE TO BE CONNECTED, AST AT THE STREET SEWER WYE OR, AT THE FOUNDATION WALL, APPROPRIATE MANUFACTURED ADAPTERS SHALL BE USED
5) WYES: WHERE WYE IS NOT AVAILABLE IN THE EXISTING STREET SEWER, AN APPROPRIATE CONNECTION SHALL BE MADE FOLLOWING MANUFACTURERS INSTRUCTIONS USING A BOLTED, CLAMPED, OR EPOXY-CEMENTED SADDLE, TAPPED INTO A SMOOTHLY DRILLED OR SAWN OPENING IN THE SEWER.

DETAIL OF HOUSE SEWER SERVICE



WATER MAINS CROSSING SEWERS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF 18 INCHES BETWEEN PIPES. WATER MAIN JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE SEWER JOINTS

SEPARATION NOTES:

SEWERS CROSSING WATER MAINS SHALL BE LAID TO PROVIDE A MINIMUM VERTICAL DISTANCE OF 18 INCHES (460 MM) BETWEEN THE OUTSIDE OF THE WATER MAIN AND THE OUTSIDE OF THE SEWER. THIS SHALL BE THE CASE WHERE THE WATER MAIN IS EITHER ABOVE OR BELOW THE SEWER. THE CROSSING SHALL BE ARRANGED SO THAT THE SEWER JOINTS WILL BE EQUIDISTANT AND AS FAR AS POSSIBLE FROM THE WATER MAIN JOINTS. WHERE A WATER MAIN CROSSES UNDER A SEWER, ADEQUATE STRUCTURAL SUPPORT SHALL BE PROVIDED FOR THE SEWER TO MAINTAIN LINE AND GRADE.

CONSTRUCTION SPECIFICATIONS FOR POROUS ASPHALT
THE UNH STORM WATER CENTER

INSTALLATION RECOMMENDATIONS

INSTALLATION
A. PERCOLATION BEDS (REFERS TO NO 57 STONE)
I. OWNER SHALL BE NOTIFIED AT LEAST 24 HOURS PRIOR TO ALL PERCOLATION BED AND POROUS PAVING WORK.
2. SUB GRADE PREPARATION
A.EXISTING SUB GRADE UNDER BED AREAS SHALL NOT BE COMPACTED OR SUBJECT TO EXCESSIVE CONSTRUCTION EQUIPMENT TRAFFIC PRIOR TO STONE BED PLACEMENT.
B. WHERE EROSION OF SUB GRADE HAS CAUSED ACCUMULATION OF FINE MATERIALS AND/OR SURFACE PONDING, THIS MATERIAL SHALL BE REMOVED WITH LIGHT EQUIPMENT AND THE UNDERLYING SOILS SCARIFIED TO A MINIMUM DEPTH OF 6 INCHES WITH A YORK RAKE OR EQUIVALENT AND LIGHT TRACTOR.
C. BRING SUB GRADE OF STONE PERCOLATION BED TO LINE, GRADE, AND ELEVATIONS INDICATED. FILL AND LIGHTLY REGRADE ANY AREAS DAMAGED BY EROSION, PONDING, OR TRAFFIC COMPACTION BEFORE THE PLACING OF STONE. ALL BED BOTTOMS ARE LEVEL GRADE.
3. RECHARGE BED INSTALLATION (REFERS TO NO 3 STONE)
A.UPON COMPLETION OF SUB GRADE WORK, THE ENGINEER SHALL BE NOTIFIED AND SHALL INSPECT AT HIS DISCRETION BEFORE PROCEEDING WITH PERCOLATION BED INSTALLATION.
B.PERCOLATION BED AGGREGATE SHALL BE PLACED IMMEDIATELY AFTER APPROVAL OF SUB GRADE PREPARATION. ANY ACCUMULATION OF DEBRIS OR SEDIMENT WHICH HAS TAKEN PLACE AFTER APPROVAL OF SUB GRADE SHALL BE REMOVED PRIOR TO INSTALLATION OF AGGREGATE AT NO EXTRA COST TO THE OWNER.
C.INSTALL COARSE AGGREGATE NO. 3 (1 1/2" STONE) IN 8–INCH MAXIMUM LIFTS. LIGHTLY COMPACT EACH LAYER WITH EQUIPMENT, KEEPING EQUIPMENT MOVEMENT OVER STORAGE BED SUBGRADES TO A MINIMUM. INSTALL AGGREGATE TO GRADES INDICATED ON THE DRAWINGS.
D. INSTALL 3" LIFT PEA GRAVEL LAYER TO PREVENT MIGRATION OF FINES FROM THE FILTER COARSE (NHDOT 304.1)
E.INSTALL FILTER COARSE (NHDOT 304.1 SAND LESS THAN 2% FINES) IN 2, 4" LIFTS. LIGHTLY COMPACT EACH LAYER WITH EQUIPMENT, KEEPING EQUIPMENT MOVEMENT OVER STORAGE BED SUBGRADES TO A MINIMUM. INSTALL AGGREGATE TO GRADES INDICATED ON THE DRAWNGS.
F. INSTALL CHOKER BASE COURSE (AASHTO # 57 STONE) AGGREGATE EVENLY OVER SURFACE OF STONE BED, SUFFICIENT TO ALLOW PLACEMENT OF PAVEMENT, AND NOTIFY ENGINEER FOR APPROVAL. CHOKER BASE COURSE SHALL BE SUFFICIENT TO ALLOW FOR EVEN PLACEMENT OF ASPHALT BUT NO THICKER THAN 4–INCH IN DEPTH.
4. SURROUNDING AREAS
A.BEFORE THE POROUS PAVEMENT IS INSTALLED, ADJACENT SOIL AREAS SHOULD BE SLOPED AWAY FROM ALL PAVEMENT EDGES, TO PREVENT POTENTIAL SEDIMENT FROM WASHING ONTO THE PAVEMENT SURFACE.
B.TO ACCOMPLISH THIS, A SEQUENCE OF SWALES SHOULD BE EXCAVATED INTO ALL EARTHEN (UNPAVED) AREAS AT LEAST ON THE UPHILL SIDES OF THE PAVEMENT, AND WHERE NECESSARY, TO BELOW THE CURB OR PAVEMENT ELEVATION. ITS SHAPE AND PAINTINGS CAN BE INTEGRATED WITH THE PROJECT'S ARCHITECTURE AND LANDSCAPE, AND DESIGNED TO MAXIMIZE INFILTRATION. SWALE OVERFLOW, WHEN IT OCCURS, CAN BE DISCHARGED FROM ONE SWALE TO ANOTHER BY CONNECTING PIPES UNDER DRIVEWAYS.
C.BUILDING BASEMENTS AND FOUNDATIONS SHOULD BE WATERPROOFED AS NECESSARY, WHERE THE POROUS PAVEMENT ABUTS BUILDINGS.
B. POROUS ASPHALT
1. TRANSPORTING MATERIAL
A.TRANSPORTING OF MIX TO THE SITE SHALL BE IN VEHICLES WITH SMOOTH, CLEAN DUMP BEDS THAT HAVE BEEN SPRAYED WITH A NON–PETROLEUM RELEASE AGENT.
B.THE MIX SHALL BE COVERED DURING TRANSPORT TO CONTROL COOLING.
2. POROUS BITUMINOUS ASPHALT SHALL NOT BE STORED IN EXCESS OF 90 MINUTES BEFORE PLACEMENT.
3. ASPHALT PLACEMENT
A.THE POROUS BITUMINOUS SURFACE COURSE SHALL BE LAID IN ONE LIFT DIRECTLY OVER THE CHOKER COARSE, FILTER COARSE, AND CRUSHED STONE BASE COURSE TO A 4–INCH FINISHED THICKNESS. THE SURFACE CAN BE LAID IN TWO LIFTS IF SECOND LIFT IS DONE WITHIN 10 BUSINESS DAYS
AND THE INITIAL COURSE IS CLEAN AND FREE OF SEDIMENT.
B.THE LAYING TEMPERATURE OF THE BITUMINOUS MIX SHALL BE BETWEEN 300 DEGREES FAHRENHEIT AND 350 DEGREES FAHRENHEIT (BASED ON THE RECOMMENDATIONS OF THE ASPHALT SUPPLIER).
C.INSTALLATION SHALL TAKE PLACE WHEN AMBIENT TEMPERATURES ARE 55 DEGREES FAHRENHEIT OR ABOVE, WHEN MEASURED IN THE SHADE AWAY FROM ARTIFICIAL HEAT.
D.THE USE OF A REMIXING MATERIAL TRANSFER DEVICE BETWEEN THE TRUCKS AND THE PAVER IS HIGHLY RECOMMENDED TO ELIMINATE COLD LUMPS IN THE MIX.
E. THE POLYMER–MODIFIED ASPHALT IS VERY DIFFICULT TO RAKE, A WELL–HEATED SCREED SHOULD BE USED TO MINIMIZE THE NEED FOR RAKING.
F. COMPACTION OF THE SURFACE COURSE SHALL TAKE PLACE WHEN THE SURFACE IS COOL ENOUGH TO RESIST A 10–TON ROLLER. (140°F. SURFACE TEMPERATURE) ONE OR TWO PASSES IS ALL THAT IS REQUIRED FOR PROPER COMPACTION. MORE ROLLING COULD CAUSE A REDUCTION IN THE SURFACE POROSITY WHICH IS UNACCEPTABLE.
4. IN THE EVENT CONSTRUCTION SEDIMENT IS INADVERTENTLY DEPOSITED ON THE FINISHED POROUS
SURFACE, IT MUST BE IMMEDIATELY REMOVED BY VACUUMING.
5. AFTER FINAL ROLLING, NO VEHICULAR TRAFFIC OF ANY KIND SHALL BE PERMITTED ON THE SURFACE UNTIL COOLING AND HARDENING HAS TAKEN PLACE, AND IN NO CASE WITHIN THE FIRST 48 HOURS. PROVIDE BARRIERS AS NECESSARY AT NO EXTRA COST TO THE OWNER TO PREVENT VEHICULAR USE; REMOVE AT THE DISCRETION OF THE ENGINEER.
6. STRIPING PAINT FOR TRAFFIC LANES AND PARKING BAYS SHALL BE CHLORINATED RUBBER BASE, FACTORY MIXED, NON–BLEEDING, FAST DRYING, BEST QUALITY, WHITE TRAFFIC PAINT WITH A LIFE EXPECTANCY OF TWO YEARS UNDER NORMAL TRAFFIC USE.
A.PAVEMENT–MARKING PAINT; LATEX, WATER–BASE EMULSION, READY–MIXED, COMPLYING WITH PS TT–P–1952.
B.SWEEP AND CLEAN SURFACE TO ELIMINATE LOOSE MATERIAL AND DUST.
C.PAINT 4 INCH WIDE TRAFFIC LANE STRIPING IN ACCORDANCE WITH LAYOUTS OF PLAN. APPLY PAINT WITH MECHANICAL EQUIPMENT TO PRODUCE UNIFORM STRAIGHT EDGES. APPLY IN TWO COATS AT MANUFACTURER'S RECOMMENDED RATES. PROVIDE CLEAR, SHARP LINES USING WHITE TRAFFIC PAINT, INSTALLED IN ACCORDANCE WITH NHDOT SPECIFICATIONS.
6. WORK SHALL BE DONE EXPERTLY THROUGHOUT, WITHOUT STAINING OR INJURY TO OTHER WORK.
TRANSITION TO ADJACENT IMPERVIOUS BITUMINOUS PAVING SHALL BE MERGED NEATLY WITH FLUSH, CLEAN LINE. FINISHED PAVING SHALL BE EVEN, WITHOUT POCKETS, AND GRADED TO ELEVATIONS SHOWN ON DRAWING.
7. POROUS PAVEMENT BEDS SHALL NOT BE USED FOR EQUIPMENT OR MATERIALS STORAGE DURING CONSTRUCTION, AND UNDER NO CIRCUMSTANCES SHALL VEHICLES BE ALLOWED TO DEPOSIT SOIL ON PAVED POROUS SURFACES.
8. REPAIR OF DAMAGED PAVING
A.ANY EXISTING PAVING ON OR ADJACENT TO THE SITE THAT HAS BEEN DAMAGED AS A RESULT OF CONSTRUCTION WORK SHALL HE REPAIRED TO THE SATISFACTION OF THE OWNER WITHOUT ADDITIONAL COST TO THE OWNER.
9. FIELD QUALITY CONTROL
A.THE FULL PERMEABILITY OF THE PAVEMENT SURFACE SHALL BE TESTED BY APPLICATION OF CLEAN WATER AT THE RATE OF AT LEAST 5 GPM OVER THE SURFACE, USING A HOSE OR OTHER DISTRIBUTION DEVISE. WATER USED FOR THE TEST SHALL BE CLEAN, FREE OF SUSPENDED SOLIDS AND DELETERIOUS LIQUIDS AND WILL BE PROVIDED AT NO EXTRA COST TO THE OWNER. ALL APPLIED WATER SHALL INFILTRATE DIRECTLY WITHOUT PUDDLE FORMATION OR SURFACE RUNOFF, AND SHALL BE OBSERVED BY THE ENGINEER AND OWNER.
B.TEST IN–PLACE BASE AND SURFACE COURSE FOR COMPLIANCE WITH REQUIREMENTS FOR THICKNESS AND SURFACE SMOOTHNESS. REPAIR OR REMOVE AND REPLACE UNACCEPTABLE WORK AS DIRECTED BY THE OWNER.
C.SURFACE SMOOTHNESS: TEST FINISHED SURFACE FOR SMOOTHNESS AND EVEN DRAINAGE, USING A TEN–FOOT TO CENTERLINE OF PAVED AREA. SURFACE WILL NOT BE ACCEPTED IF GAPS OR RIDGES EXCEED 3116 OF AN INCH.

MINIMUM COMPACTION REQUIREMENTS

COMPACTION SHALL BE PERFORMED TO NOT LESS THAN NINETY–FIVE PERCENT (95%) MAXIMUM DENSITY AS DETERMINED IN A LABORATORY COMPACTION TEST, PERFORMED UNDER THE SPECIFICATIONS OF ASTM D1557–64T, METHOD "A", (BACK FILL MATERIAL OF A STONY NATURE SHALL BE TESTED UNDER METHOD "C" OR "D" OF THE SAME ASTM DESIGNATION) OR OTHER APPROVED ASTM OR AMERICAN ASSOCIATION OF STATE HIGHWAY AND TRANSPORTATION OFFICIALS (AASHTO) SPECIFICATIONS. SUCH TEXT SHALL ALSO BE USED FOR ESTABLISHING THE OPTIMUM MOISTURE CONTENT OF THE MATERIALS. THE IN–PLACE DRY UNIT WEIGHT OF THE COMPACTED MATERIALS SHALL BE DETERMINED BY METHODS SPECIFIED UNDER ASTM "D" 1556–58T OR OTHER APPROVED ASTM OR AASHTO SPECIFICATIONS. THE IN–PLACE COMPACTION TEST TO BE CONSISTENT WITH THE APPROVED LABORATORY COMPACTION TEST.

TABLE 5. POROUS ASPHALT MIX DESIGN CRITERIA.

SIEVE SIZE (INCH/MM)	PERCENT PASSING (%)
0.75/19	100
0.50/12.5	85–100
0.375/9.5	55–75
NO.4/4.75	10–25
NO.8/2.36	5–10
NO.200/0.075 (#200)	2–4
BINDER CONTENT (AASHTO T164)	6.0–6.5%
AIR VOID CONTENT BY CORELOK (ASTM D6752)*	16.0–20.0%
AIR VOID CONTENT BY PARAFFIN WAX (AASHTO T275)*	18.0–22.0%
DRAINDOWN (ASTM D6390)**	<= 0.3 %
RETAINED TENSILE STRENGTH (AASHTO 283)***	>= 80 %

* EITHER METHOD IS ACCEPTABLE
**CELLULOSE OR MINERAL FIBERS MAY BE USED TO REDUCE DRAINDOWN.
***IF THE TSR (RETAINED TENSILE STRENGTH) VALUES FALL BELOW 80% WHEN TESTED PER NAPA IS 131 (WITH A SINGLE FREEZE THAW CYCLE RATHER THAN 5), STEP 4, THE CONTRACTOR SHALL EMPLOY AN ANTISTRIP ADDITIVE, SUCH AS HYDRATED LIME (ASTM C977) OR A FATTY AMINE, TO RAISE THE TSR VALUE ABOVE 80%.

MIX SUMMARY
POROUS ASPHALT PAVEMENT MIX
THE UNH STORM WATER CENTER

POROUS ASPHALT SHALL BE FOUR INCHES THICK WITH A BITUMINOUS MIX OF 6% TO 6.5% BY WEIGHT DRY AGGREGATE AND AIR VOIDS OF 18–22% IN ACCORDANCE WITH ASTM D6390, DRAIN DOWN OF THE BINDER SHALL BE NO GREATER THAN 0.3%. IF MORE ABSORPTIVE AGGREGATES, SUCH AS LIMESTONE, ARE USED IN THE MIX, THEN THE AMOUNT OF BITUMEN IS TO BE BASED ON THE TESTING PROCEDURES OUTLINED IN THE NATIONAL ASPHALT PAVEMENT ASSOCIATION'S INFORMATION SERIES 131 – "PERVIOUS ASPHALT PAVEMENTS" (2003) OR NHDOT EQUIVALENT. MIX SUPPLIERS MAY HAVE A SUITABLE IN–HOUSE SPECIFICATION FOR OPEN GRADED FRICTION COURSE (OGFC) THAT CAN BE USED.

USE NEAT ASPHALT BINDER MODIFIED WITH AN ELASTOMERIC POLYMER TO PRODUCE A BINDER MEETING THE REQUIREMENTS OF PG 76–22 AS SPECIFIED IN AASHTO MP– I. THE ELASTOMER POLYMER SHALL BE STYRENE–BUTADIENE–STYRENE (SBS), OR APPROVED EQUAL, APPLIED AT A RATE OF 3% BY WEIGHT OF THE TOTAL BINDER. THE COMPOSITE MATERIALS SHALL BE THOROUGHLY BLENDED AT THE ASPHALT REFINERY OR TERMINAL PRIOR TO BEING LOADED INTO THE TRANSPORT VEHICLE. THE POLYMER MODIFIED ASPHALT BINDER SHALL BE HEAT AND STORAGE STABLE.

AGGREGATE SHALL BE MINIMUM 90% CRUSHED MATERIAL AND HAVE A GRADATION OF:

COMPOSITION OF MIXTURE
SIEVE SIZE (INCH/MM)PERCENT PASSING0.75/191000.50/12.585–1000.375/9.555–75NO.4/4.7510–25NO.8/2.365–10NO.200/0.0752–4TOTAL AGGREGATES93–5–94% ASPHALT OF TOTAL MIX6–6.5
ADD HYDRATED LIME AT A DOSAGE RATE OF 1.0% BY WEIGHT OF THE TOTAL DRY AGGREGATE TO MIXES CONTAINING GRANITE. HYDRATED LIME SHALL MEET THE REQUIREMENTS OF ASTM C 977. THE ADDITIVE MUST BE ABLE TO PREVENT THE SEPARATION OF THE ASPHALT BINDER FROM THE AGGREGATE AND ACHIEVE A REQUIRED TENSILE STRENGTH RATIO (TSR) OF AT LEAST 80% ON THE ASPHALT MIX WHEN TESTED IN ACCORDANCE WITH AASHTO T 283. THE ASPHALTIC MIX SHALL BE TESTED FOR ITS RESISTANCE TO STRIPPING BY WATER IN ACCORDANCE WITH ASTM D–1664. IF THE ESTIMATED COATING AREA IS NOT ABOVE 95 PERCENT, ANTI–STRIPPING AGENTS SHALL BE ADDED TO THE ASPHALT.

NO WORK SHALL BE STARTED UNTIL THE CONTRACTOR HAS SUBMITTED AND THE ENGINEER HAS APPROVED A MIX DESIGN INCLUDING THE PERCENTAGE OF EACH INGREDIENT INCLUDING BINDER, POLYMER, AND THE JOB–MIX FORMULA FROM SUCH A COMBINATION. THE JOB–MIX FORMULA SHALL ESTABLISH A SINGLE PERCENTAGE OF AGGREGATE PASSING SIEVE AND A SINGLE PERCENTAGE OF BITUMINOUS MATERIAL TO BE ADDED TO THE AGGREGATE. NO CHANGE IN THE JOB–MIX FORMULA MAY BE MADE WITHOUT WRITTEN APPROVAL OF THE ENGINEER. THE JOB–MIX FORMULA MUST FALL WIT H THE MASTER RANGE SPECIFIED IN COMPOSITION OF MIXTURE TABLE.

TRANSPORTING MATERIAL: SEE CONSTRUCTION AND INSTALL SPECIFICATIONS

FOR QUESTIONS ON MIX SPECIFICATIONS CONTACT ROBERT ROSEEN, PHD, AT THE UNH STORM WATER CENTER. 603–862–4024.

MAINTENANCE SPECIFICATIONS FOR POROUS ASPHALT PARKING LOT AREAS AND LOW VOLUME ROADS
THE UNH STORM WATER CENTER

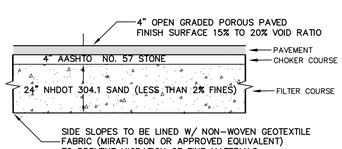
THE FOLLOWING RECOMMENDATIONS WILL HELP ASSURE THAT THE PAVEMENT IS MAINTAINED TO PRESERVE ITS HYDROLOGIC EFFECTIVENESS.

WINTER MAINTENANCE:

1. SANDING FOR WINTER TRACTION IS PROHIBITED. DEICING IS PERMITTED (NAC1, MGC12, OR EQUIVALENT). REDUCED SALT APPLICATION IS POSSIBLE AND CAN BE A COST SAVINGS FOR WINTER MAINTENANCE. NONTOXIC, ORGANIC DEICERS, APPLIED EITHER AS BLENDED, MAGNESIUM CHLORIDE–BASED LIQUID PRODUCTS OR AS PRETREATED SALT, ARE PREFERABLE.
2. PLOWING IS ALLOWED, BLADE SHOULD BE SET APPROXIMATELY 1" ABOVE ROAD SURFACE. ICE AND LIGHT SNOW ACCUMULATION ARE GENERALLY NOT AS PROBLEMATIC AS FOR STANDARD ASPHALT. SNOW WILL ACCUMULATE DURING HEAVIER STORMS AND SHOULD BE PLOWED.

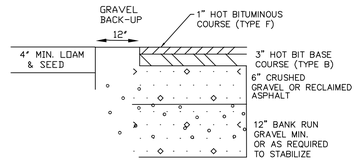
ROUTINE MAINTENANCE;

1. ASPHALT SEAL COATING MUST BE ABSOLUTELY FORBIDDEN. SURFACE SEAL COATING IS NOT REVERSIBLE.
2. THE PAVEMENT SURFACE SHOULD BE VACUUMED 1 OR 2 TIMES PER YEAR, AND AT ANY ADDITIONAL TIMES SEDIMENT IS SPILLED, ERODED, OR TRACKED ONTO THE SURFACE.
3. PLANTED AREAS ADJACENT TO PERVIOUS PAVEMENT SHOULD BE WELL MAINTAINED TO PREVENT SOIL WASHOUT ONTO THE PAVEMENT. IF ANY BARE SPOTS OR ERODED AREAS ARE OBSERVED WITHIN THE PLANTED AREAS, THEY SHOULD BE REPLANTED AND/OR STABILIZED AT ONCE.
4. IMMEDIATELY CLEAN ANY SOIL DEPOSITED ON PAVEMENT. SUPERFICIAL DIRT DOES NOT NECESSARILY CLOG THE PAVEMENT VOIDS. HOWEVER, DIRT THAT IS GROUND IN REPEATEDLY BY TIRES CAN LEAD TO CLOGGING. THEREFORE, TRUCKS OR OTHER HEAVY VEHICLES SHOULD BE PREVENTED FROM TRACKING OR SPILLING DIRT ONTO THE PAVEMENT.
5. DO NOT ALLOW CONSTRUCTION STAGING, SOIL/MULCH STORAGE, ETC. ON UNPROTECTED PAVEMENT SURFACE.
6. REPAIRS: POTHOLES OF LESS THAN 50 SQUARE FEET CAN BE PATCHED BY ANY MEANS SUITABLE WITH STANDARD PAVEMENT OR A PERVIOUS MIX IS PREFERRED. FOR AREAS GREATER THAN 50 SQ. FT. IN NEED OF REPAIR, APPROVAL OF PATCH TYPE SHOULD BE SOUGHT FROM A QUALIFIED ENGINEER. ANY REQUIRED REPAIR OF DRAINAGE STRUCTURES SHOULD BE DONE PROMPTLY TO ENSURE CONTINUED PROPER FUNCTIONING OF THE SYSTEM.
7. WRITTEN AND VERBAL COMMUNICATION TO THE POROUS PAVEMENT'S FUTURE OWNER SHOULD MAKE CLEAR THE PAVEMENT'S SPECIAL PURPOSE AND SPECIAL MAINTENANCE REQUIREMENTS SUCH AS THOSE LISTED HERE.
8. A PERMANENT SIGN SHOULD BE ADDED AT THE ENTRANCE AND END OF THE POROUS ASPHALT AREA TO INFORM RESIDENTS AND MAINTENANCE STAFF OF THE SPECIAL NATURE AND PURPOSE OF THE PAVEMENT, AND ITS SPECIAL MAINTENANCE REQUIREMENTS.



NOTES:
1. 4" FRICTION COARSE CONSISTS OF COARSER AGGREGATE AND STIFFER BINDER. SEE TABLE
2. A WORKING COURSE 4" THICK CONSISTS OF AASHTO NO. 57 STONE.
3. TOP COAT SHOULD BE VACUUMED A MINIMUM OF TWICE A YEAR.
4. ROOF RUNOFF CAN FLOW ONTO PAVEMENT OR INTO SUBBASE MATERIAL.

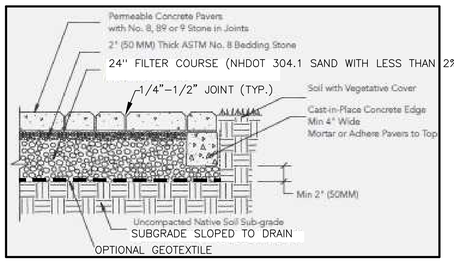
POROUS PAVEMENT
NOT TO SCALE



NOTES: * IN AREAS OF BEDROCK, MINIMUM 24" SEPARATION FROM BANK RUN GRAVEL
* PAVEMENT TRENCH PATCH SHALL MATCH EXISTING PAVEMENT DEPTHS.

TYPICAL PAVEMENT SECTION
NEW ASPHALT

1. THE DEVELOPER SHALL INSPECT THE CROSS–SECTION OF THE CURRENT DRIVEWAY FOR CONFORMANCE TO THE MUNICIPAL REQUIREMENTS. IF ADDITIONAL SELECT GRAVELS, ETC. ARE NEEDED, THE DRIVE SHALL BE BUILT TO TOWN SPECIFICATIONS.
2. IF ADDITIONAL CRUSHED OR BANK RUN GRAVEL IS NEEDED, THE DEVELOPER RESERVES THE RIGHT TO UTILIZED RECLAIMED GRAVEL PROCESSED FROM ON SITE MATERIALS.



ROUTINE MAINTENANCE: VISUAL INSPECTION OF THE PERVIOUS PAVERS TO ENSURE THAT THEY ARE CLEAN OF DEBRIS AND SEDIMENTS. ROUTINE CLEANING PROCEDURES WOULD INCLUDE BLOWING (WITH LEAF BLOWER OR SIMILAR) IN FALL, TRUCK–SWEEPING AND/OR DRY VACUUMING. ADD STONE TO REFILL JOINT SPACE AFTER SWEEPING/VACUUMING IF NEEDED.

TOWN NOTES

1. THE LANDOWNER IS RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL WETLANDS REGULATIONS, INCLUDING ANY PERMITTING AND SETBACK REQUIREMENTS REQUIRED UNDER THESE REGULATIONS.
2. THE APPLICANT HAS DESIGNED THIS SITE TO SAFELY ACCOMMODATE MAXIMUM SIZE VEHICLES AND TRUCKS, (DESIGN VEHICLE IS THE EXETER LADDER TRUCK OR 35' BOX TRUCK) EITHER DELIVERING TO, OR USING THE PROPERTY.
3. ALL SNOW SHALL BE STORED IN THE AREA(S) DEPICTED ON THIS PLAN AS SNOW STORAGE AREAS. IN THE EVENT THAT THE AREA(S) APPROVED FOR SNOW STORAGE BECOME FULL, THE OWNER SHALL REASONABLY REMOVE EXCESS SNOW FROM THE SITE, AND SHALL NOT ALLOW SNOW TO BE STORED WITHIN TRAVEL AISLES.
4. ALL WASTE MATERIALS AND RECYCLABLE SHALL BE CONTAINED WITHIN THE BUILDING(S) OR APPROVED STORAGE FACILITIES AND SHALL NOT BE OTHERWISE STORED ON THE PROPERTY. REFUSE COLLECTION WILL BE BY DUMPSTER AS NEEDED.
5. ALL WATER, SEWER, ROAD (INCLUDING PARKING LOT), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.5 GRADING, DRAINAGE, AND EROSION & SEDIMENT CONTROL AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE.

ZONING REQUIREMENTS:
ZONING DISTRICT – HIGHWAY COMMERCIAL (C2)
MINIMUM LOT SIZE – 20,000 S.F.
MINIMUM LOT WIDTH – 150 FT.
MINIMUM LOT DEPTH – 100 FT.

UNDERGROUND FACILITIES, UTILITIES AND STRUCTURES HAVE BEEN PLOTTED FROM FIELD OBSERVATION AND THEIR LOCATION MUST BE CONSIDERED APPROXIMATE ONLY. NEITHER BEALS ASSOCIATES, NOR ANY OF THEIR EMPLOYEES TAKE RESPONSIBILITY FOR THE LOCATION OF ANY UNDERGROUND STRUCTURES OR UTILITIES NOT SHOWN THAT MAY EXIST. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL UNDERGROUND STRUCTURES AND/OR UTILITIES LOCATED PRIOR TO EXCAVATION WORK BY CALLING 1–888–DIG–SAFE (1–888–344–7233) AND EXETER DPW (603) 773–6157.

CONSTRUCTION NOTES:

1. CONSTRUCTION OPERATIONS SHALL BE CARRIED OUT IN SUCH A MANNER SO THAT EROSION AND AIR AND WATER POLLUTION WILL BE MINIMIZED.
2. STRAW BALES SHALL BE ANCHORED INTO THE SOIL USING 2" X 2" STAKES DRIVEN THROUGH THE BALES AND AT LEAST 18 INCHES IN TO THE SOIL.
3. SEEDING, FERTILIZING, AND MULCHING SHALL CONFORM TO THE RECOMMENDATIONS IN THE APPROPRIATED VEGETATIVE BMP.
4. THROUGHOUT THE DURATION OF CONSTRUCTION ACTIVITIES THE CONTRACTOR SHALL TAKE PRECAUTIONS AND INSTRUCTIONS FROM THE PLANNING DEPARTMENT IN ORDER TO PREVENT, ABATE AND CONTROL THE EMISSION OF FUGITIVE DUST INCLUDING BUT NOT LIMITED TO WETTING, COVERING, SHIELDING, OR VACUUMING.
5. THE NH COMMISSIONER OF AGRICULTURE PROHIBITS THE COLLECTION, POSSESSION, IMPORTATION, TRANSPORTATION, SALE, PROPAGATION, TRANSPLANTATION, OR CULTIVATION OF PLANTS BANNED BY NH LAW RSA 430:53 AND NH CODE ADMINISTRATIVE RULES AGR 3800. THE PROJECT SHALL MEET ALL REQUIREMENTS AND THE INTENT OF RSA 430:53 AND AGR 3800 RELATIVE TO INVASIVE SPECIES.

NOTES

1. ALL EXISTING STRUCTURES IN THE CONSTRUCTION AREA SHALL BE REMOVED AND DISPOSED OF OFF–SITE IN ACCORDANCE WITH ALL LOCAL, STATE, AND FEDERAL REGULATIONS, UNLESS NOTED TO REMAIN ON THE SITE PLANS. ANY BURNING ON–SITE SHALL BE SUBJECT TO LOCAL ORDINANCES.
2. ALL EXISTING UTILITIES SHALL BE TERMINATED AT THE PROPERTY LINE, OR AS SHOWN ON THE DESIGN PLANS, IN CONFORMANCE WITH LOCAL, STATE, AND UTILITY COMPANY STANDARDS, SPECIFICATIONS, AND DETAILS. THE CONTRACTOR SHALL COORDINATE UTILITY SERVICE DISCONNECTS WITH THE UTILITY REPRESENTATIVES PRIOR TO THE START OF WORK.
3. EROSION AND SEDIMENTATION CONTROLS ARE TO BE INSTALLED PRIOR TO ANY EARTH MOVING ACTIVITIES.
4. THE CONTRACTOR SHALL INSTALL ORANGE CONSTRUCTION FENCING ALONG PROPERTY LINES IN ALL AREAS WHERE SILT FENCING IS NOT REQUIRED WHERE CONSTRUCTION IS PROPOSED ADJACENT TO ABUTTING PROPERTIES.
5. EXISTING SEWER SERVICE AND APPURTENANCES TO BE REMOVED AND DISPOSED OF PER TOWN AND STATE REQUIREMENTS. NEW SERVICES FOR EACH UNIT TO BE INSTALLED & CONNECTED PER TOWN SPECIFICATIONS. SEQUENCING AND SCHEDULING: (SEE DETAIL SHEETS FOR COMPLETE CONSTRUCTION SEQUENCE AND EROSION CONTROL SPECIFICATION.)
6. DEMOLITION REQUIREMENTS: CONDUCT DEMOLITION TO MINIMIZE INTERFERENCE WITH THE ADJACENT AND OCCUPIED BUILDING AREAS, IN COMPLIANCE WITH THE GOVERNING LAWS. PRIME CONSIDERATION SHALL BE GIVEN TO THE SAFETY, PROTECTION AND CONVENIENCE OF THE PUBLIC AND OWNER'S PERSONNEL.
7. LEAVE SITE IN CLEAN CONDITION.
8. TEMPORARY EARTH MATERIAL STOCKPILES TO BE IN UPLAND AREAS AND COMPLETELY IMPOUNDED BY SILT FENCE/HAYBALE EROSION CONTROLS.
9. THE LANDOWNER IS RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, STATE, AND FEDERAL REGULATIONS, INCLUDING ANY PERMITTING AND SETBACK REQUIREMENTS REQUIRED UNDER THESE REGULATIONS.
10. ALL WATER, SEWER, ROAD (INCLUDING DRIVEWAY), AND DRAINAGE WORK SHALL BE CONSTRUCTED IN ACCORDANCE WITH SECTION 9.3 STORMWATER MANAGEMENT STANDARDS, STORMWATER MANAGEMENT PLAN, STORMWATER POLLUTION PREVENTION PLAN, AND EROSION AND SEDIMENT CONTROL STANDARDS AND THE STANDARD SPECIFICATIONS FOR CONSTRUCTION OF PUBLIC UTILITIES IN EXETER, NEW HAMPSHIRE", SEE SECTION 9.14 ROADWAYS, ACCESS POINTS, AND FIRE LANES AND SECTION 9.13 PARKING AREAS FOR EXCEPTIONS.
11. THE CONTRACTOR MUST OBTAIN A VALID UTILITY PIPE INSTALLER'S LICENSE AND THE JOB SUPERVISOR OR FOREMAN MUST BE CERTIFIED BY THE TOWN PRIOR TO WORKING ON ANY WATER, SEWER, OR DRAINAGE PIPES THAT ARE IN A TOWN STREET OR RIGHT OF WAY, OR THAT WILL CONNECT OR MAY BE CONNECTED TO A TOWN WATER, SEWER, OR DRAINAGE SYSTEM. A LICENSED SUPERVISOR OR FOREMAN MUST BE PRESENT AT THE JOB SITE AT ALL TIMES DURING CONSTRUCTION OF THESE UTILITIES.

To: **Planning Board**

From: **Carol Ogilvie, MRI, Interim Planner**

Re: **PB Case #25-6 Exeter Presbyterian Church**

The Applicant is seeking approval of a site plan for the proposed construction of 5,400 square foot addition to the existing church building, along with a parking lot expansion and associated site improvements on the property located at 73 Winter Street. The subject property is 0.86 acres in area, located in C-1, Central Area Commercial zoning district and is identified as Tax Map Parcel #73-143.

Attached please find an application, plans and supporting documents, dated 7/15/25 for your review. A Technical Review Committee (TRC) was conducted on August 7, 2025. A copy of the UEI comment letter, 8/18/25 is enclosed for your review.

Revised plans and supporting documents, dated 8/28/25 were submitted following the TRC and are enclosed for your review. I have reviewed the letter from Jones & Beach responding to the TRC comments and found that all items have been addressed.

The Applicant is requesting waivers from the following two sections of the Board's Site Plan Review & Subdivision Regulations:

1. From Section 7.4.10 for the requirement to provide a High Intensity Soils Survey (HISS) of the entire site, or appropriate portion thereof. Please see the enclosed waiver request letter from Jones & Beach Engineers, Inc, dated 7/15/25.

2. Section 9.3.6 that prohibits grading within five (5) feet of a property line. Please see the attached waiver request letter from Jones & Beach Engineers, Inc., dated 8/28/25.

The waiver for Section 7.4.10 relates to a completed application. Before the Board votes on accepting the application for hearing, it should first vote on whether to grant this waiver (see motion below). Aside from this waiver request, I find the application to be otherwise complete and ready for public hearing. At this stage, the Board can also decide whether a site visit is in order.

Waiver motion:

High Intensity Soils Survey (HISS) waiver motion: After reviewing the criteria for granting waivers, I move that the request of Exeter Presbyterian Church for a waiver from Section 7.4.10 of the Site Plan Review and Subdivision Regulations to provide High Intensity Soil Survey information on the Site Plan be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

The second waiver request relates to the actual plan, and would be voted on during the Board's deliberations (see motion below).

Waiver motion:

Erosion and Sediment Control Standards waiver motion: After reviewing the criteria for granting waivers, I move that the request of Exeter Presbyterian Church for a waiver from Section 9.3.6 of the Site Plan Review and Subdivision Regulations to allow grading within five (5) feet of a property line be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Following is language for two motions, depending on how the Board proceeds: one to table the application in the event the Board elects to conduct a site visit; and one for the final decision on the application.

Planning Board motions:

Table Motion: I move that the application of Exeter Presbyterian Church, PB Case #25-6 be TABLED to the (date/time/place) Planning Board meeting and revised plans/documents shall be submitted to the Planning Office at least eight (8) days prior to the meeting or the application may remain on the table to a future meeting.

Site Plan Motion: I move that the request of Exeter Presbyterian Church, PB Case #25-6 for Site Plan approval be APPROVED / APPROVED WITH THE FOLLOWING CONDITIONS / TABLED / DENIED.

Thank You.

RE: Site Plan Application
73 Winter Street, Exeter, NH
Tax Map 73, Lot 143
JBE Project No. 05241.1

Dear Mr. Plumer,

On behalf of our client, Exeter Presbyterian Church, we respectfully submit a Site Plan Application for the above-mentioned property. The intent of this application is to propose a new building & associated site improvements located behind the existing church building. The proposed building consists of a new sanctuary as well as an entrance hall to connect the two buildings. The entrance hall will include restrooms and a handicap accessible entrance. The existing fire escape to the rear of the existing building will be modified and a new doorway installed to connect the existing structure to the proposed structure. Currently, the main floor of the church building is used both as a sanctuary as well as a multi-use fellowship hall, resulting in frequent rearranging of the space to accommodate these various uses. With a new, permanent sanctuary proposed to be constructed, the existing structure can be used as a permanent multi-use fellowship space. The new structure will make the uses safer and much more efficient & convenient. The new structure is proposed to be serviced by new water and sewer services, separate from the existing structure. This will accommodate the installation of a sprinkler system in the proposed building as required by code.

The new building results in additional parking needs which will be added to the rear of the site since some spaces will be eliminated where the proposed building will be constructed. Currently, there is an existing encroachment at the rear of the property from the abutting property, Tax Map 73 Lot 147 (Shooters Pub). The church has had a longstanding agreement allowing Shooters Pub use of this rear portion of the church property. The Site Plan regulations allow for alternative parking calculations as provided per Section 5.6.5(A). For the reason stated above, the proposed parking on site does not meet the required parking per the Site Plan regulations. However, utilizing the agreed upon parking easement with Shooters Pub for overflow parking, there is ample parking provided to meet those parking requirements. There is also public parking across Winter Street that is sometimes used during church services.

Some of the proposed parking spaces will be constructed with porous pavers with a filtration course in order to treat and infiltrate stormwater in accordance with Section 9.3.2 of the Site Plan Regulations. Additional lighting and landscaping will be added to the property for safety and to meet code.

Seven (7) copies of the following are included with this application:

1. Completed Site Plan Application.
2. Waiver Request

3. Draft Parking Easement Agreement.
4. Fee Check in the Amount of $711.42.
5. Signed Letter of Authorization.
6. Current Deed.
7. Abutters List & 3 Sets of Mailing Labels.
8. Tax Map.
9. Two (2) Drainage Analysis.
10. Architectural Plans.
11. Seven (7) Full Size Plan Sets.
12. Fifteen (15) Half Size Plan Sets.

We look forward to discussing this project with the Board. If you have any questions or need any additional information, please feel free to contact our office. Thank you very much for your time.

Very truly yours,
JONES & BEACH ENGINEERS, INC.

Paige Libbey, P.E.
Associate Principal

cc: Doug Greene, Port City Design (via email)
Skip Phelps, Exeter Presbyterian Church (via email)
Allison Rees, Underwood Engineers (via email & U.S. Mail)

Letter of Authorization

I, Exeter Presbyterian Church, 73 Winter Street, Exeter, NH 03833, owner of property located in Exeter, NH, known as Tax Map 73, Lot 143, do hereby authorize Jones & Beach Engineers, Inc., PO Box 219, Stratham, NH, to act on my behalf concerning the previously-mentioned property. The parcel is located on 73 Winter Street in Exeter, NH.

I hereby appoint Jones & Beach Engineers, Inc., as my agent to act on my behalf in the review process, to include any required signatures.

Carolyce D. Magee

Planning Board Application for Site Plan Review

October 2019

SITE PLAN REVIEW APPLICATION CHECKLIST

A COMPLETED APPLICATION FOR SITE PLAN REVIEW MUST CONTAIN THE FOLLOWING

1. Application for Hearing (x)
2. Abutter's List Keyed to Tax Map (x)
   (including the name and business address of every engineer, architect, land surveyor, or soils scientist whose professional seal appears on any plan submitted to the Board)
3. Completed- " Checklist for Site Plan Review" (x)
4. Letter of Explanation (x)
5. Written Request for Waiver (s) from " Site Plan Review and Subdivision Regulations" (if applicable) (x)
6. Completed "Preliminary Application to Connect and /or Discharge to Town of Exeter- Sewer, Water or Storm Water Drainage System(s)"(if applicable) (x)
7. Planning Board Fees (x)
8. Seven (7) full-sized copies of Site Plan (x)
9. Fifteen (15) 11"x17" copies of the final plan to be submitted **TEN DAYS PRIOR** to the public hearing date. (x)
10. Three (3) pre-printed 1"x 2 5/8" labels for each abutter, the applicant and all consultants. (x)

NOTES: All required submittals must be presented to the Planning Department office for distribution to other Town departments. Any material submitted directly to other departments will not be considered.

(Please note that any proposed demolition may require review by the Exeter Heritage Commission in accordance with Article 5, Section 5.3.5 of the Exeter Zoning Ordinance).

No

14. **WILL THE PROPOSED PROJECT REQUIRE A "NOTICE OF INTENT TO EXCAVATE" (State of NH Form PA-38)? IF YES, DESCRIBE BELOW.**

No

NOTICE: I CERTIFY THAT THIS APPLICATION AND THE ACCOMPANYING PLANS AND SUPPORTING INFORMATION HAVE BEEN PREPARED IN CONFORMANCE WITH ALL APPLICABLE REGULATIONS; INCLUDING BUT NOT LIMITED TO THE "SITE PLAN REVIEW AND SUBDIVISION REGULATIONS" AND THE ZONING ORDINANCE. FURTHERMORE, IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 15.2 OF THE "SITE PLAN REVIEW AND SUBDIVISION REGULATIONS", I AGREE TO PAY ALL COSTS ASSOCIATED WITH THE REVIEW OF THIS APPLICATION.

DATE 7/14/25 OWNER'S SIGNATURE (as agent)

ACCORDING TO RSA 676.4.I (c), THE PLANNING BOARD MUST DETERMINE WHETHER THE APPLICATION IS COMPLETE WITHIN 30 DAYS OF SUBMISSION. THE PLANNING BOARD MUST ACT TO APPROVE, CONDITIONALLY APPROVE, OR DENY AN APPLICATION WITHIN SIXTY FIVE (65) DAYS OF ITS ACCEPTANCE BY THE BOARD AS A COMPLETE APPLICATION. A SEPARATE FORM ALLOWING AN EXTENSION OR WAIVER TO THIS REQUIREMENT MAY BE SUBMITTED BY THE APPLICANT.

SITE PLAN REQUIREMENTS

7.4 Existing Site Conditions Plan

Submission of this plan will not be applicable in all cases. The applicability of such a plan will be considered by the TRC during its review process as outlined in Section 6.5 Technical Review Committee (TRC) of these regulations. The purpose of this plan is to provide general information on the site, its existing conditions, and to provide the base data from which the site plan or subdivision will be designed. The plan shall show the following:

APPLICANT	TRC	REQUIRED EXHIBITS
[x]	[ ]	7.4.1 Names, addresses, and telephone numbers of the owner, applicant, and person(s) or firm(s) preparing the plan.
[x]	[ ]	7.4.2 Location of the site under consideration, together with the current names and addresses of owners of record, of abutting properties and their existing land use.
[x]	[ ]	7.4.3 Title, date, north arrow, scale, and Planning Board Case Number.
[x]	[ ]	7.4.4 Tax map reference for the site under consideration, together with those of abutting properties.
[x]	[ ]	7.4.5 Zoning (including overlay) district references.
[x]	[ ]	7.4.6 A vicinity sketch or aerial photo showing the location of the land/site in relation to the surrounding public street system and other pertinent location features within a distance of 2,000-feet, or larger area if deemed necessary by the Town Planner.
[x]	[ ]	7.4.7 Natural features including watercourses and water bodies, tree lines, significant trees (20-inches or greater in diameter at breast height) and other significant vegetative cover, topographic features, and any other environmental features that are important to the site design process.
[x]	[ ]	7.4.8 Man-made features such as, but not limited to, existing roads, structures, and stonewalls. The plan shall also indicate which features are to be retained and which are to be removed or altered.
[x]	[ ]	7.4.9 Existing contours at intervals not to exceed 2-feet with spot elevations provided when the grade is less than 5%. All datum provided shall reference the latest applicable US Coast and Geodetic Survey datum and should be noted on the plan.
Waiver [ ]	[ ]	7.4.10 A High Intensity Soil Survey (HISS) of the entire site, or appropriate portion thereof. Such soil surveys shall be prepared by a certified soil scientist in accordance with the standards established by the Rockingham County Conservation District. Any cover letters or explanatory data provided by the certified soil scientist shall also be submitted.

N/A	☐	☐	7.4.11 State and Federally designated wetlands, setback information, total wetlands proposed to be filled, other pertinent information and the following wetlands note: "The landowner is responsible for complying with all applicable local, state, and federal wetlands regulations, including any permitting and setback requirements required under these regulations."
	☒	☐	7.4.12 Surveyed property lines including angles and bearings, distances, monument locations, and size of the entire parcel. A professional land surveyor licensed in New Hampshire must attest to said plan.
	☒	☐	7.4.13 The lines of existing abutting streets and driveway locations within 200-feet of the site.
	☒	☐	7.4.14 The location, elevation, and layout of existing catch basins and other surface drainage features.
	☒	☐	7.4.15 The shape, size, height, location, and use of all existing structures on the site and approximate location of structures within 200-feet of the site.
	☒	☐	7.4.16 The size and location of all existing public and private utilities, including off-site utilities to which connection is planned.
	☒	☐	7.4.17 The location of all existing easements, rights-of-way, and other encumbrances.
	☒	☐	7.4.18 All floodplain information, including the contours of the 100-year flood elevation, based upon the Flood Insurance Rate Map for Exeter, as prepared by the Federal Emergency Management Agency, dated May 17, 1982.
	☒	☐	7.4.19 All other features which would fully explain the existing conditions of the site.
	☒	☐	7.4.20 Name of the site plan or subdivision.

7.5 Proposed Site Conditions Plan (Pertains to Site Plans Only)

The purpose of this plan is to illustrate and fully explain the proposed changes taking place within the site. The proposed site conditions plan shall depict the following:

	APPLICANT	TRC	REQUIRED EXHIBITS
	X	☐	7.5.1 Proposed grades and topographic contours at intervals not to exceed 2-feet with spot elevations where grade is less than 5%. All datum provided shall reference the latest applicable US Coast and Geodetic Survey datum and should be noted on the plan.
	X	☐	7.5.2 The location and layout of proposed drainage systems and structures including elevations for catch basins.
	X	☐	7.5.3 The shape, size, height, and location of all proposed structures, including expansion of existing structures on the site and first floor elevation(s). Building elevation(s) and a rendering of the proposed structure(s).
Waiver	☐	☐	7.5.4 High Intensity Soil Survey (HISS) information for the site, including the total area of wetlands proposed to be filled.
N/A	☐	☐	7.5.5 State and Federally designated wetlands, setback information, total wetlands proposed to be filled, other pertinent information and the following wetlands note: "The landowner is responsible for complying with all applicable local, state, and federal wetlands regulations, including any permitting and setback requirements required under these regulations."
	X	☐	7.5.6 Location and timing patterns of proposed traffic control devices.
	X	☐	7.5.7 The location, width, curbing and paving of all existing and proposed streets, street rights-of-way, easements, alleys, driveways, sidewalks and other public ways. The plan shall indicate the direction of travel for one-way streets. See Section 9.14 – Roadways, Access Points, and Fire Lanes for further guidance.
	X	☐	7.5.8 The location, size and layout of off-street parking, including loading zones. The plan shall indicate the calculations used to determine the number of parking spaces required and provided. See Section 9.13 – Parking Areas for further guidance.
	X	☐	7.5.9 The size and location of all proposed public and private utilities, including but not limited to: water lines, sewage disposal facilities, gas lines, power lines, telephone lines, cable lines, fire alarm connection, and other utilities.
	X	☐	7.5.10 The location, type, and size of all proposed landscaping, screening, green space, and open space areas.
	X	☐	7.5.11 The location and type of all site lighting, including the cone(s) of illumination to a measurement of 0.5-foot-candle.
	X	☐	7.5.12 The location, size, and exterior design of all proposed signs to be located on the site.
	X	☐	7.5.13 The type and location of all solid waste disposal facilities and accompanying screening.

X	☐	7.5.14 Location of proposed on-site snow storage.
X	☐	7.5.15 Location and description of all existing and proposed easement(s) and/or right-of-way.
X	☐	7.5.16 A note indicating that: "All water, sewer, road (including parking lot), and drainage work shall be constructed in accordance with Section 9.5 Grading, Drainage, and Erosion & Sediment Control and the Standard Specifications for Construction of Public Utilities in Exeter, New Hampshire". See Section 9.14 Roadways, Access Points, and Fire Lanes and Section 9.13 Parking Areas for exceptions.
X	☐	7.5.17 Signature block for Board approval

TOWN OF EXETER PLANNING DEPARTMENT
PLANNING AND ZONING FEE SCHEDULE
EFFECTIVE JANUARY 2018

(changes adopted by the Select Board – January 2018)

PUBLICATIONS		
ZONING ORDINANCE	$ 15.00	
MASTER PLAN	$ 35.00	
CAPITAL IMPROVEMENTS PROGRAM	$ 15.00	
SUBDIVISION & SITE PLAN REVIEW REGS	$ 15.00	
PUBLIC WORKS SPECIFICATIONS (at DPW)	$ 20.00	
HDC PRESERVATION GUIDELILNES	$ 10.00	
POSTAGE	$ 5.00 (per publication)	
BOARD OF ADJUSTMENT		
VARIANCE APPLICATION	$ 100.00	
SPECIAL EXCEPTION APPLICATION	$ 100.00	
APPEAL FROM ADMINISTRATIVE DECISION	$ 100.00	
ABUTTER NOTICE	$ 10.00 (per abutter)	
LEGAL NOTICE FEE	$ 50.00	
PLANNING BOARD		
LOT LINE ADJUSTMENT	$ 60.00	
SUBDIVISION		
• APPLICATION (includes Open Space Dev.)	$ 125.00	
• PER LOT OR OPEN SPACE UNIT FEE	$ 50.00 per lot (up to 3 new lots) $ 100.00 per lot (for 4 or more new lots)	
NON-RESIDENTIAL SITE PLAN REVIEW		
• APPLICATION	Minor - $100.00 Major - $ 250.00	$250.00
• PLAN REVIEW	$ 60.00/1,000 s.f. of total building floor area (Example: 30,000 SF building = $ 1,800. review fee) With no building, $5./$1,000. on the cost of site improvements 5,357 S.F =	$321.42
MULTI-FAMILY SITE PLAN REVIEW	Same as N/R Site Plan Review	
LEGAL NOTICE	$ 50.00	$50.00
ABUTTER NOTICE	$ 10.00 (per abutter) x 9	$90.00

SITE INSPECTION SERVICE – Fee to be based upon a reasonable estimate of the cost of anticipated site inspections (typically 1-3% of the estimated construction costs for the project). Additional funds to be collected as needed; any unexpended fees to be returned to the Applicant upon completion of all site improvements.

HISTORIC DISTRICT COMMISSION	
APPLICATION & PLAN REVIEW	No fees
ABUTTER NOTICE	$ 10.00 (if applicable)
MISCELLANEOUS	
• SIGN PERMITS	$ 25.00 (per sign)
• HOME OCCUPATION USE PERMITS	$ 25.00
• COPIES	$ .50 (per page)
• TRAIL MAPS	$ 1.00/each
• WETLAND MARKERS	$ 1.00/each

TOTAL = $711.42

FROM: Planning & Building Department

RE: Preliminary Application to Connect and/or Discharge to Town of Exeter Sewer, Water and/or Storm Drainage System(s)

Attached is the "Preliminary Application to Connect and/or Discharge to Town of Exeter Sewer, Water or Storm Water Drainage System(s)". This Application form must be completed by the applicant or the applicant's authorized agent for projects that are subject to Planning Board approval or for a change of use. It is a prerequisite for submission of the "Applications for Sewer Service, Water Service and Storm Drainage Work." All of the application forms referenced above must be completed and approved prior to the issuance of a building permit. This application is intended to address a number of different scenarios and therefore, all sections may not be applicable to your particular situation. Please read the application carefully and fill out as completely as possible. If there are any questions, please feel free to contact the Planning and Building Department Offices. All forms must be submitted to the Planning and Building Department Office for review and distribution.

Please Note: Any approval(s) granted in conjunction with this application will be valid for a period of one (1) year from the date of such approvals(s).

TOWN OF EXETER - DEPARTMENT OF PUBLIC WORKS

PRELIMINARY APPLICATION TO CONNECT AND/OR DISCHARGE TO TOWN OF EXETER SEWER, WATER, AND/OR STORMWATER DRAINAGE SYSTEM(S)

Project Name	Exeter Presbyterian Church
Project Location	73 Winter Street
Applicant/Owner Name	Exeter Presbyterian Church, Attn. Skip Phelps
Mailing Address	73 Winter Street, Exeter, NH 03833
Phone Number	_____ email sphelps@hcna-llc.com
Project Engineer	Paige Libbey, P.E., Jones & Beach Engineers, Inc.
Mailing Address	PO Box 219, Stratham, NH 03885
Phone Number	603-772-4746 email plibbey@jonesandbeach.com

Type of Discharge/Connection ☐ Sewer ☐ Water ☐ Stormwater

Application completed by

Name Paige Libbey, P.E.

Signature _____ Date 7/14/25

Reviewed and verified by Planning & Building Department _____

DESIGN FLOWS

The water and sewer design flow shall be based upon the New Hampshire Code of Administrative Rules, Env-Wq 1000 Subdivisions; Individual Sewage Disposal Systems, Table 1008-1 Unit Design Flow Figures (current version) or other methodology which may be deemed acceptable by the Town of Exeter. The minimum fee for a single-family residential unit is based on the design flow for two (2) bedrooms. Existing water and sewer flows may be based on meter readings for the current use.

If the proposed discharge is non-residential or is residential but exceeds 5,000 gallons per day (gpd), Section C must be completed. Certain water and sewer discharges must be approved by the State of New Hampshire Department of Environmental Services by way of permit and plan submittals. It is the responsibility of the applicant to ensure submittals are made to the state through the town is necessary. Final town approval cannot be made without the state's approval if required.

Stormwater design flows are based on the drainage analysis prepared by the applicant using the most current published precipitation data available.

APPROVALS ARE VALID FOR PERIOD OF ONE (1) YEAR FROM DATE OF APPROVAL

SECTION A: PROPOSED NEW CONNECTIONS OR MODIFICATION OF EXISTING CONNECTIONS

SANITARY SEWER

Description of work: To construct a new building attached to the existing building

Title of plan: C4

Total design flow (gpd): 600 GPD

**For any non-residential discharge or residential discharge exceeding 5,000 GPS, or for a change of use, complete Section C of this form.*

Approved _____ Date _____

Water & Sewer Managing Engineer

WATER

Description of work: To construct a new building attached to the existing building

Title of plan: C4

Total design flow (gpd): 600 GPD

Approved _____ Date _____

Water & Sewer Managing Engineer

STORMWATER

Description of work: N/A

Title of plan: .

Total design flow (10-year storm, CFS): .

Approved _____ Date _____

Highway Superintendent

APPROVALS ARE VALID FOR PERIOD OF ONE (1) YEAR FROM DATE OF APPROVAL

SECTION B: IMPACT FEES

Provide the following information to determine if a water and/or sewer impact fee will be required for a new development or a change or increase in use.

Current/prior Use(s)

Describe current use(s) Church

Use	Unit Flow (gpd)	Total Existing Flow
Church	3gpd/per seat	600 gpd

Total existing flow 600 gpd

Proposed Use(s)

Describe proposed use(s) Church

Use	Unit Design Flow (gpd)	Total Design Flow
No new seats		0 gpd

Total proposed flow

Impact Fees (80% of the design flow)

Change in flow rate (gpd) ____ x 0.8 = Impact Fee flow rate (gpd) ____

If there is a decrease in flow rates, no water or sewer impact fee will be charged. If there is an increase in flow rates, a water and/or sewer impact fee will be charged using the following formula:

Sewer Impact Fee: Flow increase (gpd) ____ x $1.81= N/A

Water Impact Fee: Flow increase (gpd) ____ X $3.74 = N/A

Approved by Town of Exeter

Town Planner _____ Date _____

Water & Sewer Managing Engineer _____ Date _____

APPROVALS ARE VALID FOR PERIOD OF ONE (1) YEAR FROM DATE OF APPROVAL

SECTION C: SANITARY SEWER CLASSIFICATION AND BASELINE MONITORING

(NON-RESIDENTIAL DISCHARGES OR RESIDENTIAL DISCHARGE OVER 5,000 GPD)

In accordance with Title 40 of the Code of Federal Regulations, Part 403 Section 403.14, information provided herein shall be available to the public without restriction except as specified in 40 CFR Part 2. A discharge permit will be issued on the basis of the information provided in this section.

In accordance with all terms and conditions of the Town of Exeter, New Hampshire Ordinances Chapter 15, all persons discharging wastewater into the town's facilities shall comply with all applicable federal, state, and local Industrial Pre-treatment rules.

PART V - CERTIFICATION

I have personally examined and am familiar with the information submitted in this section for the above name use. The information provided is true, accurate and complete. I am aware that there are significant penalties from federal, state and/or town regulatory agencies for submitting false information, including the possibility of fine and/or imprisonment.

I acknowledge and agree to pay all charges incurred for monitoring, testing and subsequent analysis performed on the Town of Exeter sewer, water and/or stormwater drainage system(s), in the course of determining the town's ability to serve the project. Further, I acknowledge and agree that failure to accurately declare said flow requirements shall be sufficient cause to deny access to the Town of Exeter sewer, water and/or stormwater drainage system(s).

Signature of Applicant _____ Date 7/14/25

Name of Property Owner Exeter Presbyterian Church

APPROVALS ARE VALID FOR PERIOD OF ONE (1) YEAR FROM DATE OF APPROVAL

USER CLASSIFICATION SYSTEM FOR INDUSTRIAL DISCHARGE

CLASS 1: SIGNIFICANT INDUSTRIAL USER

Any industry and/or commercial establishment that:

- Is subject to National Pre-treatment standards as outlined in 40 CFR (Code of Federal Regulations) 403.5 (a) (b).
- Discharges a non-domestic waste stream of 5,000 GPD, or more.
- Contributes a non-domestic waste stream totaling 5% or more of the average dry weather hydraulic or organic (BOD<TSS< etc.) capacity of the Town of Exeter Sewer Treatment Facility.
- Has the reasonable potential, in the opinion of the POT Supervisor, to adversely affect the treatment plant, its workers, or the collection system by reason of inhibition, pass- through pollutants, or sludge contamination.

CLASS 2: MINOR INDUSTRIAL USERS

Small industries and commercial establishments (e.g. restaurants, auto repair shops, cleaners, etc.) whose individual discharges do not significantly impact the Town of Exeter Sewer Treatment Facility or systems, degrade receiving water quality or contaminate the sludge. Industries that have the potential to discharge a non-domestic or process waste stream, but at the present time discharge only sanitary waste, may also be included in this class. However, this class shall not include any categorical industries. Industries and commercial establishments in this classification will require a permit and be subject to all inspection, compliance monitoring, enforcement, and reporting requirements of the pretreatment program.

CLASS 3: INSIGNIFICANT INDUSTRIAL USERS

Users which will be eliminated from participation in Exeter's Pretreatment Program. These include industries and/or commercial establishments that discharge only domestic waste (toilets and sinks only) into the municipal sewer system or do not have any reasonable chance of discharging a non-domestic waste stream to the POTW. Class 3 users will be required to notify the Exeter Sewer Division of any change in discharge quantity or character.

CLASS 4: NON-SYSTEM USER

Any industry, business or commercial establishment identified in the Master List of Industrial Users that are not connected to the Exeter Sewer system or which has ceased to discharge to the system.

Industries and/or commercial establishments classified as Class 1 or Class 2 users will be regulated individually and have specific effluent limitations (including conventional pollutants, where necessary) in the discharge permit. All Class 1 and Class 2 users will require a State Discharge Permit, and be subject to all inspection, compliance monitoring, and enforcement and reporting requirements of the pretreatment program.

RE: Waiver Request Letter
73 Winter Street, Exeter, NH
Tax Map 73, Lot 143
JBE Project No. 05241.1

Dear Mr. Plumer,

On behalf of the owner, Exeter Presbyterian Church, Jones & Beach Engineers, Inc. respectfully requests a waiver from the Town of Exeter Site Plan Regulations for the following:

Site Plan Regulations – Section 7.4.10 - High Intensity Soil Survey (HISS) of the entire site, or appropriate portion thereof

Jones & Beach Engineers request a waiver from this section because Site Specific soil mapping is unnecessary for this design and application. The intention of Site Specific soil mapping is to determine Hydrologic Soil Group (HSG) for the purposes of drainage modeling, as well as depth to water table and infiltration capacity of the soils. In this case, the majority of the site is already covered by impervious surfaces, in which case the surface is modeled in the drainage analysis as the same Curve Number (CN) regardless of which HSG it is. Additionally, test pits were dug to get the seasonal high water table and infiltration capacity of the soils in the area where infiltration systems are proposed, and that data was used in the drainage analysis. Therefore, the Site Specific soil mapping would not change the results of the model or the design.

We look forward to discussing the Application and waiver request at the Planning Board Hearing. Thank you very much for your time.

Very truly yours,
JONES & BEACH ENGINEERS, INC.

Paige Libbey, P.E.

REAL ESTATE
PARKING EASEMENT AGREEMENT

THIS AGREEMENT is made by and between Exeter Presbyterian Church (hereinafter the "Church") and General Recreation Realty Trust (hereinafter the "Trust").

WHEREAS, the Church is the owner of certain real property located at 73 Winter Street, Exeter, NH 03833; and

WHEREAS, the Trust is the owner of certain real property located at 6 Columbus Avenue, Exeter, NH 03833; and

WHEREAS, the Church from time to time requires parking capacity beyond that provided on its property and desires to acquire certain easement rights in the Trust's property.

NOW, THEREFORE, in consideration of the mutual undertakings set forth herein, the parties hereto agree as follows:

1. Grant of Easement
The Trust hereby grants to the Church an easement to use a portion of the Trust's adjacent parking area shown on the plans attached hereto as Exhibit "A" for overflow parking during peak services attendance and special events defined as but not limited to: Sunday Worship Service, Christmas and Easter Services, special events i.e. scheduled meetings of the Northern New England Presbytery, etc. (the "Church's Easement").

2. Duration
The Church's Easement granted herein shall begin as of the date of substantial completion of the new sanctuary and will continue unless terminated under Paragraph 6 hereof.

3. Exclusivity
The Church's Easement and all rights and privileges granted hereunder are exclusive to the Church, and the Trust covenants not to use its property in any way or to convey any other easement or property rights that may conflict with the Church's rights hereunder.

4. Grantor's Rights
Each party shall continue to enjoy all rights in their respective property that do not interfere with or prevent the exercise of the Church's Easement granted hereunder.

5. Binding Effect
This Agreement shall be binding upon and inure to the benefit of and be enforceable by the parties hereto and their respective successors and assigns.

6. Termination
The Church's Easement granted hereunder may be terminated by a written agreement executed by the Church and the Trust. The Church's Easement may also be terminated if the purposes of

the Church's Easement cease to exist, are abandoned by the Church or become impossible to perform.

7. Notices

All notices and other communications hereunder shall be in writing and shall be deemed to have been duly given on the third business day after mailing by certified or registered mail with postage prepaid:

(a) If to the Church:

Exeter Presbyterian Church
73 Winter Street
Exeter, NH 03833
Attention: Stephen Leavitt, Clerk of Session

(b) If to the Trust

General Recreation Realty Trust
6 Columbus Avenue
Exeter, NH 03833
Attention: Robert M. Ficara, Trustee

8. Governing Law

This Agreement shall be governed by and construed and enforced in accordance with the laws of the State of New Hampshire.

9. Entire Agreement

This Agreement represents the entire agreement between the parties hereto, and there are no other agreements, contracts or understandings between the parties hereto with respect to the subject matter of this Agreement.

Executed this ____ day of ____, 2025.

WARRANTY DEED

KNOW ALL MEN BY THESE PRESENTS, that **The Roman Catholic Bishop of Manchester**, a Corporation Sole, for St. Michael Parish, with a principal address of 153 Ash Street, P.O. Box 310, Manchester, County of Hillsborough, New Hampshire 03104,

FOR CONSIDERATION PAID, grants to the **Exeter Presbyterian Church,** a non profit corporation organized under the laws of the State of New Hampshire, with a mailing address of PO Box 715, Exeter, County of Rockingham, New Hampshire 03833,

WITH WARRANTY COVENANTS, the following described premises:

A certain tract or parcel of land, with the buildings thereon, situated in Exeter, County of Rockingham, State of New Hampshire, on the Southerly side of Winter Street, so called, and being more particularly bounded and described as follows:

Commencing on said Winter Street at land now or formerly of William O. Beane and Ora T. Beane, and thence running Northerly by said Beane land about 300 feet to a point at land now or formerly of Fred A. Wentworth and Florence L. Wentworth; thence turning and running in an Easterly direction by said Wentworth land about 128 feet to a point at other land now or formerly of said land of Fred A. Wentworth; thence turning and running in a Southerly direction by said land of Fred A. Wentworth, land of the heirs of Frank E. Wentworth and land now or formerly of Deborah M. French to said Winter Street; thence turning and running in a Westerly direction by said Winter Street to said Beane land at the point of beginning.

Meaning and intending to convey the same premises conveyed to The Roman Catholic Bishop of Manchester, a Corporation Sole For St. Michael Parish by Warranty Deed of the

Casey Association dated September 30, 1997, and recorded in the Rockingham County Registry of Deeds at Book 3241, Page 795.

Subject to the terms of a Boundary Line Agreement by and between The General Recreation Realty Trust and the Roman Catholic Bishop of Manchester recorded in the Rockingham County Registry of Deeds on April 29, 2005, at Book 4472 Page 1490.

The above property is also conveyed subject to any and all easements, restrictions, covenants, conditions, limitations, rights, reservations, plans, encroachments and/or encumbrances of record or otherwise to the extent the same may be in force and applicable (if any).

This is not homestead property.

IN WITNESS WHEREOF, the undersigned has hereunto set their hands on this 28th day of June, 2006.

The Roman Catholic Bishop of Manchester,
A Corporation Sole

Witness

By: Most Reverend John B. McCormack,
Bishop

STATE OF NEW HAMPSHIRE
HILLSBOROUGH COUNTY

On this 28th day of June, 2006, personally appeared Most Reverend John B. McCormack, Roman Catholic Bishop of Manchester, known to me, or satisfactorily proven, to be the person whose name is subscribed to the foregoing instrument and acknowledged that he executed the foregoing instrument on behalf of The Roman Catholic Bishop of Manchester, A Corporation Sole, for St. Michael Parish, for the purposes therein contained, being duly authorized to do so, as his voluntary act and deed.

RE: Response Letter
73 Winter Street, Exeter, NH
Tax Map 73, Lot 143
JBE Project: 05241.1

Dear Mr. Plumer,

We are in receipt of comments from David Cedarholm, P.E., Underwood Engineers, dated August 18, 2025. Original comments are below with our responses in bold.
H
PROPOSED SITE PLANS

Demolition Plan (Sheet DM):

1. *Will there be any removal or trimming of vegetation along the west side of the property where fence replacement is proposed? It is unclear if the existing vegetation is to be protected, trimmed or removed, please clarify.*
   Response: Existing vegetation along the west side of the property will be trimmed back if deemed necessary. The existing treeline and a note has been added to Sheet DM.

2. *Add a note directing the Contractor to install a concrete washout pit prior to any concrete pours.*
   Response: The information has been provided under Note #17 on Sheet C3.

Site Plan (Sheet C2, Sheet 5 of 15):

3. *Please update the layout of the proposed building addition to match the architectural plans, or vice versa.*

   Response: The layout of the proposed building has been revised to match the architectural plans.

4. *Please clarify pedestrian flow/access to the wheelchair accessible lift/enclosure and stairs on the west side of the existing building.*
   Response: The wheelchair accessible lift/enclosure and stairs will remain on site but will no longer be used by the public for access at the completion of this development. The notes on Sheet DM and Sheet C2 have been revised to state this intent.

5. *Confirm the proposed location(s) for the stop sign(s). A stop sign detail is provided on Sheet D1.*
   Response: The proposed locations for the stop signs has been added to Sheet C2.

6. *There does not appear to be traffic circulation pattern defined anywhere on the Plan set, however the truck turning plan suggests that the proposed traffic pattern is one-way in and one-way out in a counterclockwise configuration. Please clarify and provide appropriate signage and/or pavement markings indicating the proposed traffic pattern, as appropriate.*
   Response: Pavement markings have been added to the site plan to clearly show the intended traffic circulation.

7. *It appears that only 1 handicapped accessible parking space is being proposed out of the 57 total parking spaces including the 19 parking spaces provided on the abutting bowling facility property. In accordance with ADA Standards, a minimum of 3 handicapped accessible parking spaces is required for between 51 and 75 total parking spaces and at least one of the 3 spaces shall be van accessible. Given the proposed use, additional ADA spaces may be prudent.*
   Response: Three accessible parking spaces are now proposed, 2 of which are van accessible.

8. *The areas identified for snow storage on the Site Plan are depicted as planting beds on the Landscaping plan. Coordination is needed.*
   Response: The snow storage locations have been revised to not interfere with proposed and existing landscaping.

9. *Is a truncated dome proposed for the sidewalk along Winter Street?*
   Response: Truncated domes have been added to the sidewalk along Winter Street.

10. *If applicable, show the location of the dumpster pad and enclosure.*
    Response: The dumpster is shared with the abutting parcel on which it is located and can now be seen on the plans. This is part of a current agreement with the abutting property owner.

11. *Move the first parking stall so it is completely out of the Town right-of-way.*
    Response: The parking lot has been revised so that it is completely out of the right-of-way.

Grading & Drainage Plan (Seet C3, 6 of 15):

12. *Please note grading is not allowed within 5' of a property line without a waiver.*
    Response: A waiver has been requested to allow grading within 5' of the property line.

13. *Show all existing and proposed drainage pipes from the building, including roof gutters, foundation drains, and sump pump lines.*
    Response: One gutter exists on the front face of the existing building that discharges above grade and into the existing landscaped area. This gutter is now shown on the plans. There are no known drainage pipes, sump pumps, or floor drains currently discharging from the building

14. *UE is concerned with the potential for run-off from the site to affect abutters. It does not appear that any form of curbing is proposed around the pavement perimeter to contain run-off within the subject parcel.*
    Response: Curbing is not needed as there is a man-made berms along the property line that will not allow stormwater generated onsite to flow onto abutting properties. Photos of the property line showing this berm has been attached to this letter. The paver sections have also been designed such that they slope to a low point where an overflow grate is located, further confirming that abutting properties will not be negatively impacted.

15. *Based on the information on Sheet C3 and the Permeable Concrete Paver Detail on Sheet D3, it appears the porous paver sections are proposed to have the maximum infiltration bed depth of between 10" and 22.5", excluding the pavers and 1.5" bedding coarse. This places the base elevation of the infiltration bed at 3' or more above the frost line. There are also no underdrains being proposed. This results in a high risk that the system could freeze in the winter causing stormwater to pond, freeze and/or flow off-site. How is the excess stormwater runoff proposed to be managed when the volume of the infiltration bed reservoir is exceeded? How is this system expected to function in the winter when the subsurface soils are frozen, and the infiltration bed has no outlet other than the parking lot surface?*
    Response: An overflow grate and underdrain have been added to each of the paver systems in the scenario that the parking lot freezes. In freezing conditions, runoff will now be able to enter into the overflow grate and infiltrate via the use of the perforated underdrain.

16. *Without an underdrain, the porous concrete paver sections are prone to clogging from the accumulation of particulate from the parking lot which will fill the voids in the infiltration bed and the receiving soils. This will result in reduced infiltration capacity overtime and eventually lead to system failure if not properly managed and maintained. What is the life expectancy of this system and what operational approaches are being proposed to avoid clogging of the infiltration beds and subsurface soils?*

Response: Maintenance and possible failure is always a concern with any stormwater BMP that goes unattended. Regular inspections and maintenance measures will take place in order to ensure the paver systems remain operational. An Operation & Maintenance Manual has been included within the drainage analysis.

17. *It is not clear from the Plans how the excess stormwater from the porous paver sections is to be managed. Based on the spot elevations provided, it appears the overflow from paver section 3 will flow towards paver section 2, the overflow from paver section 2 will flow towards paver section 1, and then the overflow from paver section 1 will flow towards abutting properties to the east or towards Winter Street. UE recommends providing additional spot elevation and an elevation profile running east and west through the 3 porous paver sections to clarify the intent with that an explanation be provided as to how stormwater in excess of the water quality volume will be managed to minimize impacts to abutters and Winter Street from site runoff will be prevented.*

Response: Additional spot elevations have been provided. Throughout all of the modeled storm events, none of the paver systems are overtopped and cause concern for negative impacts to abutting properties or Winter Street. A slight man-made berm exists along the property line and at the fence line where the leased portion of the lot is located, meaning that in the extreme event that the systems are overtopped, runoff would flow from paver section #3 to paver section #2 to paver section #1 and then eventually to the closed drainage system on Winter Street, but never happens according to the model.

18. *The spot elevations shown around the perimeter of the porous paver sections is variable across the individual paver sections suggesting the surface of the paver sections are not level, however this appears to be how the paver sections were modelled in the Drainage Analysis. The difference between the high and low spot elevations varies by 0.78' across paver section 1, 0.61' across paver section 2, and 0.38' across paver section 3. This degree of variability reduces the effective storage volume and may compromise the parking lot design. UE recommends a parking lot design configuration with level paver sections.*

Response: The recommended maximum slope for a porous paver system is 5%. The proposed systems are far less than that and the storage volume was modelled at a consistent depth but at the shallowest point of each section to ensure the systems were modelled conservatively, and to produce a model that wouldn't take into account any storage above the level where runoff would overflow during extreme events.

19. *Porous paver section 1 and 3 are shown immediately adjacent to the property lines on the east and west sides of the parcel. UE is concerned that the introduction of subsurface infiltration could negatively impact the abutters properties including but not limited to the building at 81 Winter Street (rear) being only 15' from this porous paver section #3. Porous paver section #2 is also shown to be only 6' from the foundation of the proposed addition. A Design guidance document from a leading manufacturer of porous interlocking paver systems (Cambridge Pavers) recommends at least 100 ft separation between the infiltrating concrete paver systems and the nearest building foundation when underdrains are not included. What preventative measures are proposed to prevent the infiltrated stormwater from impacting the abutting properties or the subject site's building?*
Response: Given the adequate infiltration capabilities of the soil unique to this property, the abutting properties will not be negatively impacted resultant of the construction of the paver systems. The proposed drainage system mimics the existing hydrology of the site given the existence of berms along the property lines.

Utility Plan (Sheet C4, 7 of 15):

20. *The separation between the proposed fire service and the gas service is minimal.*
Response: The location of the proposed gas service has been revised to achieve 5' of separation to the proposed fire service.

21. *Please note the Town requires the existing water service to be decommissioned at the main.*
Response: The existing water service will remain for domestic use. The new water line will only be used for sprinklers.

22. *We note the water main in Winter Street is labeled as 4" CI. Confirm that the existing main has adequate capacity with the Town Water and Sewer Department.*

Response: The capacity of the existing water main will be confirmed with the Town Water and Sewer Department.

23. *Show or note the location of the nearest inline water valves on the existing main east and west of the proposed tie-in point.*
Response: The nearest known inline water valves on the existing main east and west of the proposed tie-in point have been noted on Sheet C4 under Note #16.

24. *Confirm the existing water service size is adequate for the proposed additional flow. Although the capacity of the sanctuary will remain the same, there are 3 additional restrooms proposed. Provide a thorough explanation as to how the new addition will not increase water or sewer usage.*
Response: Although 3 additional restrooms are proposed, sewer flows are calculated based on number of seats. Since the number of seats are not changing, sewer flows will remain the same as in the pre-construction condition.

25. *Does the existing kitchen have a grease trap?*
Response: The existing kitchen is a warming kitchen only. Thus, a grease trap is not required.

26. *Add existing catch basin inverts with elevations to the upstream and downstream catch basins in Winter Street to assess crossing conflicts.*
Response: Existing catch basin inverts have been added and confirm that there are no crossing conflicts.

27. *Provide documentation that the building does not currently or in the future contribute to inflow and/or infiltration to the Town's sewer system from roof drains, sump pumps, floor drains, etc.*
Response: The existing building does not have any known floor drains or operational sump pumps. The only existing roof drain discharges above grade and into a landscaped area.

28. *We note there is a cemetery across the street. Per NH RSA 289.3:*

III. New construction, excavation, or building in the area of a known burial site or within the boundaries of an established burial ground or cemetery shall comply with local zoning regulations concerning burial sites, burial grounds or cemeteries, whether or not such burial site or burial ground was properly recorded in the deed to the property. In the absence of such regulations, no new construction, excavation, or building shall be conducted within 25 feet of a known burial site or within 25 feet of the boundaries of an established burial ground or cemetery, whether or not such burial site or burial ground was properly recorded in the deed to the property, except when such construction, excavation, or building is necessary for the construction of an essential service, as approved bythe governing body of a municipality in concurrence with the cemetery trustees, or in the case of a state highway, by the commissioner of the department of transportation in concurrence with the cemetery trustees.

The project proposes excavation approximately 25' from the boundary line to tie in the new water service. This work may fall under the category of an essential service. However, please add a note to the plans directing the Contractor to this RSA in the event some other unforeseen need for excavation near the cemetery comes up during construction.

Response: Note #17 has been added to Sheet C4 to include the aforementioned information.

Landscaping Plan (Sheet L2, 9 of 15):

29. *The landscaping plan indicates existing planting on the south side of the existing building and along the east side of the site, but the existing plantings/tree line along the west side of the property is not shown. UE recommends showing the existing plantings/tree line on the west side of the property and describing how this vegetation is impacted or altered by the proposed work.*
    Response: The existing treeline is now shown on the west side of the property with associated notes about how it will be impacted.

30. *A proposed tree is shown in the vicinity of the existing gas service and valve.*
    Response: The proposed tree will not interfere with the existing gas service and valve. Existing and proposed utilities can now be seen on Sheet L2 to confirm there will be no conflicts.

Detail Sheet (Sheet D3, 12 of 15):

31. *The permeable concrete paver detail includes what appears to be a section of vertical curb used for edge restraint that is not dimensioned. Is vertical curb restraint intended to be inside or outside the hatching for the porous paver sections? Please confirm the intent and dimension the curb section relative to the paver section hatching.*
    Response: The edge restraint is intended to be inside of the hatching for the porous paver sections. The hatching has been revised for clarity.
32. *Add the following details:*
    a. *Concrete washout pit*
    b. *Sidewalk tipdown*

    Response: The details have been added to the plans.

Truck Turning Plan (Sheet T1, 15 of 15):

33. *Sheet T1 indicates that the truck used in the turning analysis has a wheelbase of 19.75 feet and vehicle length of 34.9 feet, however Exeter's Ladder #1 is a 2014 KME Predator 2000/500/109' RMA ladder truck with a wheelbase of 21.7 feet and length of 40.75 feet. Please coordinate with Exeter Fire regarding the truck access needs for the project.*
    Response: We have coordinated with Exeter Fire Department to attain accurate fire truck dimensions. The fire truck plans from the fire department have been attached to this letter.

DRAINAGE ANALYSIS

34. *The section numbers in the Table of Contents are inconsistent with the section divider sheets.*
    Response: The section numbers have been revised to correspond with the section dividers.

35. *The narrative provided in the Drainage Analysis refers to redeveloping the +/- 0.86 acres property, however the portion of the site redevelopment area appears to be 0.76 acres and excludes +/- 0.1 acres of the northern portion of the lot that is said to be leased. What are the dimensions of the leased portion of the lot and what are conditions in the lease that justify it being excluded from the redevelopment area calculation? If the leased portion of the parcel is included as part of the redevelopment, the existing impervious area coverage (including the gravel parking area) is 53 percent of the entire 0.86-acre parcel which would disqualify it from being considered a redevelopment project. UE recommended providing a copy of the lease and other documentation as justification for excluding the leased portion of the lot from the drainage analysis.*
    Response: The leased portion of the lot is included in the existing impervious area coverage calculation seen on Sheet C2. The leased portion is made up entirely of gravel, resulting in an existing impervious coverage greater than 60% and meets the criteria for a redevelopment project. It is part of the property per the Zoning Ordinance so it counts towards impervious coverage which is how the redevelopment calculation is derived. Stormwater from the leased portion of the lot is not included due to the existence of a slight man-made berm along the existing fence line that separates the two areas and disables stormwater from flowing onto the subject area.

36. *It is not clear how the stormwater from the leased portion of the parcel is managed and whether it contributes to the stormwater on the site. Provide documentation supporting the argument that there is no contribution from the leased area to the portion of the site proposed for redevelopment.*
    Response: A slight man-made berm exists along the fence line that separates the leased portion from the rest of the lot and retains stormwater within the respective areas.

37. *Two test pit logs are included in the Drainage Analysis, however the test pit locations were not depicted. At a minimum, depict the test pit locations on the grading and drainage plan and the pre and post development plans.*
    Response: Test pit locations are now shown on the plans.

38. *The two test pit logs indicate that they were excavated to depths of 36" and 48" respectively and the soils at those depths were described as "firm fine sand with silty clay pockets".*

    a. *This description is inconsistent with the USDA-NRCS description for Urban Land Hoosick Complex soils which are described as "very graveling coarse sand" between 15" to 60" below the ground surface. This would suggest that using the published Ksat value of 2" per hour as a base value (prior to applying a safety factor) is likely an overestimation of the soil's infiltration capacity. UE recommends conducting in-situ infiltration test to confirm the infiltration capacity of the receiving soils.*
    Response: Infiltration testing was completed and the calculations have been added to the drainage analysis.

b. *The Standardized Test Pit/Boring Protocol in NH Stormwater Manual Vol. 1 page 12 indicate that "test pits and/or borings are required in the infiltration area to a minimum depth of 5' below the proposed bottom of the infiltration facility. UE recommends conducting new test pits within each of the paver sections and excavated to a depth of at least 5 feet below the bottom of the infiltration bed to adequately characterize the receiving soils and demonstrate that the infiltration capacity meets the requirements.*
Response: It is our understanding that this is not a requirement of Town of Exeter Stormwater Regulations. Given the scale of this project and proposed infrastructure, infiltration testing would the larger factor of concern which has now been completed.

39. *The NH Stormwater Manual Vol. 2 recommends that the bottom of the infiltration beds be at least 3' deep below the ground surface for infiltration practices. As mentioned above, UE is concerned about the shallow depth of the infiltration beds and recommends deepening the beds to below the frost line.*
Response: Three feet of depth is not practical in this scenario as the site is extremely flat and the seasonal high water table has been estimated to be 26" below existing grade at most. The porous paver systems are as deep as possible in order to provide the maximum extent of treatment while not conflicting with the seasonal high water table. The site is also extremely flat and the only area to daylight would be by connecting into the town drainage system. We have communicated with DPW and have been instructed that, in general, the town does allow discharge of as little runoff as possible into the system, but in this case tying into the system is off limits due to over capacity drain lines. The proposed design limits discharge to the town system to a minimum and is able to capture and infiltrate the entirety of runoff directed towards it, resulting in benefits to the town and the subject parcel. Given the unique circumstances and site properties, the shallow depth of the paver systems will be adequate and result in multiple benefits.

40. *The NH Stormwater Manual Vol. 2 states that pretreatment must be provided if the infiltration BMP receives stormwater other than roof runoff. What is being proposed as pretreatment for the paver sections? UE recommend providing an Operation and Maintenance Manual for the porous paver sections.*
Response: The purpose of pretreatment is to filter out larger debris and sediment prior to treatment of the stormwater. In this scenario, the gaps in the pavers are small enough to accomplish this task. According to the 2025 stormwater manual, if typical pretreatment for porous paver systems is not practical, frequent inspections and maintenance of the systems are required instead. An Operation & Maintenance Manual has been included within the drainage analysis.

41. *The maximum storage volume used in the Drainage Analysis is calculated assuming the top of the storage volume to coincide with the top of concrete pavers but does not consider the volume occupied by the pavers or the volume of the vertical curbing used as perimeter restraint.*
Response: The storage volume for the paver sections has been revised to include the volume occupied by the pavers and the volume of the vertical curbing.

42. *Explain why the area north of the parcel, which is under lease, is not included in the analysis? What site elements prevent stormwater from the leased area to not currently or in the future contribute run-on to the site?*
Response: A slight man-made berm exists along the fence line that separates the leased portion of the lot from the subject parcel. This berm restrains stormwater from flowing onto the subject parcel from the leased portion. If this berm were to be removed in the future and runoff directed towards the proposed development, the pavers will be able to handle this increase without overtopping.

43. *An area of 1,021 sf was used for paver section #1 in the analysis; the surface area of paver section #1 measures at 927 sf on Sheet C3. The calculation also describes the depth of paver section #3 as 1.22' (14.64"), however the elevation table on Sheet D3 describes the depth below the bottom of the bedding course to be 10". It appears to UE that the analysis should be revised to only include the depth below the bedding course and utilize the correct infiltration area.*
Response: The infiltration area and volume have been revised.

Included with this Response Letter:

1. Revised Plan Set.
2. Revised Drainage Analysis.
3. Waiver Request Letter.
4. Photo Log.
5. Exeter Fire Truck Plans.

Exeter Planning Board
Attn. Langdon Plumer, Chair
Exeter, NH 03833

RE: Request for Waiver
73 Winter Street, Exeter, NH
Tax Map 73, Lot 143
JBE Project No. 05241.1

Dear Members of the Board:

On behalf of our client, Exeter Presbyterian Church, Jones & Beach Engineers, Inc., respectfully requests the following waiver from the Town of Exeter Site Plan Regulations in regards to the proposed site plan mentioned above:

- Section 9.3.6. – Erosion and Sediment Control Standards (Grading Within 5' of the Property Line)

We request a waiver from the aforementioned requirement in order to adequately grade the proposed site to capture and treat the most of amount of stormwater practicable. The site in its existing condition is extremely flat and requires fine grading near the property line in order to capture runoff from the edges of the proposed pavement and to properly construct stormwater management practices that are able to manage the runoff that is directed towards them. The site currently has no formal stormwater management system and the approval of this project will result in a benefit to the client, town, and overall well being.

Waiver Criteria

1. **The granting of the waiver will not be detrimental to the public safety, health, or welfare or injurious to other property.**
   RESPONSE: The granting of this waiver will not negatively impact any of the aforementioned parties as the grading will be minimal and will not significantly impact abutters or the public. The grading is needed to meet aisle width, parking, and stormwater regulations.

2. **The conditions upon which the request for a waiver is based are unique to the property for which the waiver is sought and are not applicable generally to other property.**
   RESPONSE: The property is unique in the manner that the existing topography is extremely flat and grading within 5' of the property line is required to capture and treat the most amount of runoff practicable.

3. **Because of the particular physical surroundings, shape or topographical conditions of the specific property involved, a particular hardship to the owner would result, as distinguished from a mere inconvenience, if the strict letter of these regulations are carried out.**
   RESPONSE: As previously explained, the site is extremely flat and if the strict letter of these regulations were to be carried out, stormwater would not be able to be treated to a level that is currently proposed.

4. **The granting of the waiver will not be contrary to the spirit and intent of the regulations; and,**
   RESPONSE: The intent of the regulation is to create a smooth and safe transition between newly graded areas and the surrounding abutters. Since the grading will be minimal, a smooth and safe transition will still occur, meeting the intent of the regulations.

5. **The waiver will not, in any manner, vary the provisions of the Zoning Ordinance or Master Plan.**
   RESPONSE: The provisions of the Zoning Ordinance and the Master Plan will not be conflicted with the granting of this waiver.

Thank you very much for consideration of this waiver request.

Very truly yours,
JONES & BEACH ENGINEERS, INC.

DEMOLITION NOTES:

1. THROUGHOUT THE CONSTRUCTION PROCESS, THE CONTRACTOR SHALL INFORM THE ENGINEER IMMEDIATELY OF ANY FIELD DISCREPANCIES FROM DATA AS SHOWN ON DESIGN PLANS. THIS INCLUDES ANY UNFORESEEN CONDITIONS, SUBSURFACE OR OTHERWISE FOR EVALUATION AND RECOMMENDATIONS. ANY CONTRADICTION BETWEEN ITEMS OF THIS PLAN/PLAN SET, OR BETWEEN THE PLANS AND ON-SITE CONDITIONS MUST BE RESOLVED BEFORE RELATED CONSTRUCTION HAS BEEN INITIATED.
2. ALL EXISTING PAVED SURFACES WITHIN THE LIMITS OF WORK THAT ARE TO REMAIN SHALL BE RECLAIMED TO MINIMUM DEPTH OF 12" AND REGRADED AS SHOWN ON THE GRADING AND DRAINAGE PLAN. RECLAIMED ASPHALT SHALL CONFORM TO STATE SPECIFICATIONS. PRIOR TO REMOVAL, PAVEMENT SHALL BE SAWCUT AT ALL ENTRANCES AND LIMITS OF REMOVAL.
3. ALL CURBING, CONCRETE, PAVEMENT, BUILDINGS AND SUBBASE MATERIALS LOCATED WITHIN PROPOSED LANDSCAPED AREAS SHALL BE REMOVED AND REPLACED WITH LOAM MATERIALS SUITABLE FOR LANDSCAPING IN ACCORDANCE WITH TECHNICAL SPECIFICATIONS. (SEE ALSO LANDSCAPE PLAN).
4. IN AREAS WHERE CONSTRUCTION IS PROPOSED ADJACENT TO ABUTTING PROPERTIES, THE CONTRACTOR SHALL INSTALL ORANGE CONSTRUCTION FENCING ALONG PROPERTY LINES IN ALL AREAS WHERE SILT FENCING IS NOT REQUIRED.
5. EROSION AND SEDIMENTATION CONTROL MEASURES SHALL BE INSTALLED PRIOR TO CONSTRUCTION AND ANY EARTH MOVING OPERATIONS. SILT FENCE SHALL BE INSTALLED AT THE LIMITS OF IMPACT AREAS ACCORDING TO THE DETAILS SHOWN ON SHEET E1.
6. EXCAVATED MATERIALS WILL BE PLACED WITHIN UPLAND AREAS AS FILL MATERIAL OR HAULED OFF-SITE FOR DISPOSAL IN AN APPROPRIATE UPLAND LOCATION.

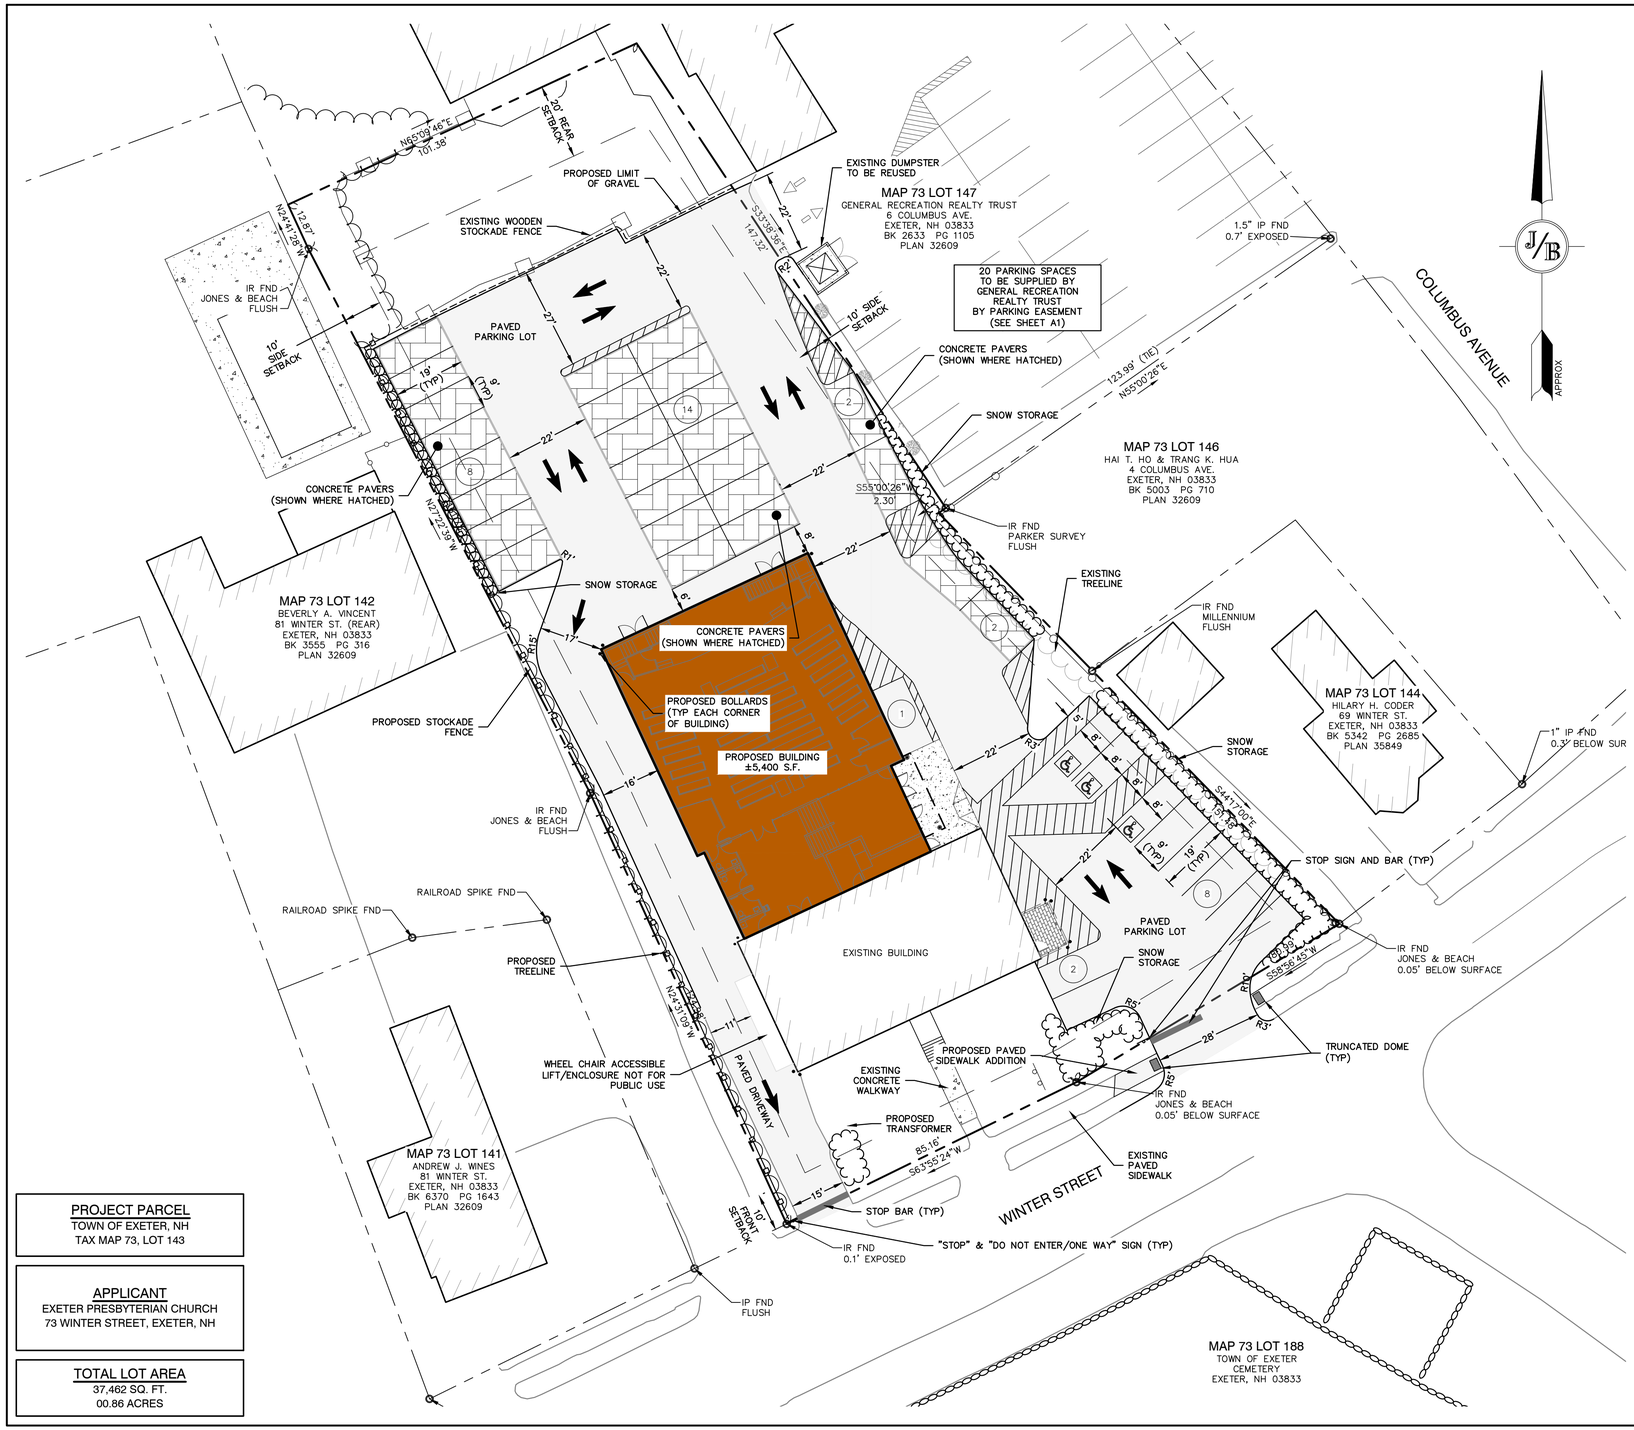
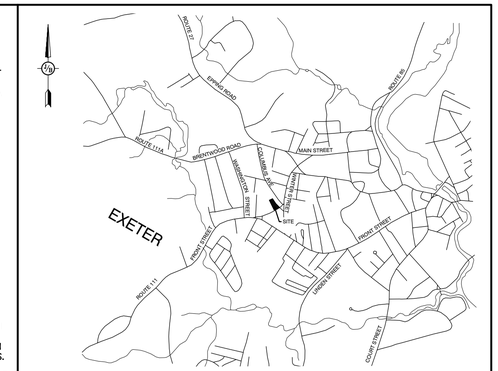
SHEET 4 OF 13

JBE PROJECT NO. 05241.1





LOCUS SCALE: 1"=2000'

SITE NOTES:

1. THE INTENT OF THIS PLAN IS TO DEPICT THE ADDITION OF A NEW BUILDING SECTION TO BE CONNECTED TO THE EXISTING BUILDING. THE DEVELOPMENT WILL CONSIST OF A NEW SANCTUARY SPACE FOR THE EXISTING CHURCH WITH ASSOCIATED PARKING AND DRIVEWAY.
2. ZONING DISTRICT: CENTRAL AREA COMMERCIAL (C-1)
   LOT AREA MINIMUM = 5,000 S.F.
   BUILDING SETBACKS (MINIMUM):
   FRONT SETBACK = 10'
   SIDE SETBACK = 10'
   REAR SETBACK = 20'
   MAX. BUILDING HEIGHT = 35'
   MAX. IMPERVIOUS COVER = 75%
   MIN. REQUIRED OPEN SPACE = 5%
3. PARKING CALCULATIONS:
   (1 SPACE/3.5 SEATS) * 200 SEATS = 57 SPACES REQUIRED

   37 SPACES PROVIDED ON SITE. 20 REMAINING PARKING SPACES TO BE PROVIDED BY ACCESS/PARKING EASEMENT WITH ABUTTING BOWLING ALLEY/RESTAURANT.
4. THIS PLAN SET HAS BEEN PREPARED BY JONES & BEACH ENGINEERS, INC., FOR MUNICIPAL AND STATE APPROVALS AND FOR CONSTRUCTION BASED ON DATA OBTAINED FROM ON-SITE FIELD SURVEY AND EXISTING MUNICIPAL RECORDS. THROUGHOUT THE CONSTRUCTION PROCESS, THE CONTRACTOR SHALL INFORM THE ENGINEER IMMEDIATELY OF ANY FIELD DISCREPANCY FROM DATA AS SHOWN ON THE DESIGN PLANS, INCLUDING ANY UNFORESEEN CONDITIONS, SUBSURFACE OR OTHERWISE, FOR EVALUATION AND RECOMMENDATIONS. ANY CONTRADICTION BETWEEN ITEMS ON THIS PLAN/PLAN SET, OR BETWEEN THE PLANS AND ON-SITE CONDITIONS, MUST BE RESOLVED BEFORE RELATED CONSTRUCTION HAS BEEN INITIATED.
5. THE SUBJECT PARCEL IS LOCATED WITHIN AN AREA HAVING A ZONE "X" DESIGNATION BY THE FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA), ON FLOOD INSURANCE RATE MAP NO. 33015C0402E, WITH EFFECTIVE DATE OF 05/17/2005 IN ROCKINGHAM COUNTY, STATE OF NEW HAMPSHIRE, WHICH IS THE CURRENT FLOOD INSURANCE RATE MAP FOR COMMUNITY IN WHICH SAID PREMISES IS SITUATED.
6. LANDOWNERS ARE RESPONSIBLE FOR COMPLYING WITH ALL APPLICABLE LOCAL, STATE AND FEDERAL WETLAND REGULATIONS, INCLUDING PERMITTING REQUIRED UNDER THESE REGULATIONS.
7. PRIOR TO THE START OF CONSTRUCTION, THE CONTRACTOR SHALL COORDINATE WITH THE ENGINEER, ARCHITECT AND/OR OWNER, IN ORDER TO OBTAIN AND/OR PAY ALL THE NECESSARY LOCAL PERMITS, FEES AND BONDS.
8. ALL CONSTRUCTION WILL CONFORM TO TOWN STANDARDS AND REGULATIONS, AND NHDOT STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, WHICHEVER IS MORE STRINGENT.
9. ALL CONSTRUCTION ACTIVITIES SHALL CONFORM TO LABOR OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) RULES AND REGULATIONS.
10. ALL PARKING STALLS SHALL BE SEPARATED USING 4" WIDE SOLID STRIPES. STRIPING SHALL BE 100% ACRYLIC TYPE, LOW VOC, FAST DRYING, IN A COLOR OF WHITE.
11. ALL STOP BARS SHALL BE 18" IN WIDTH IN A COLOR OF WHITE; ALL TRAFFIC ARROWS SHALL BE PAINTED IN A COLOR OF WHITE.
12. ALL BUILDING DIMENSIONS SHALL BE VERIFIED WITH THE ARCHITECTURAL AND STRUCTURAL PLANS PROVIDED BY THE OWNER. ANY DISCREPANCIES SHOULD BE BROUGHT TO THE ATTENTION OF THE ENGINEER AND OWNER PRIOR TO THE START OF CONSTRUCTION.
13. SNOW TO BE STORED AT EDGE OF PAVEMENT AND IN AREAS SHOWN ON THE PLANS, OR TRUCKED OFFSITE TO AN APPROVED SNOW DUMPING LOCATION.

IMPERVIOUS COVER CALCULATIONS

STRUCTURE DESCRIPTION	PRE-CONSTRUCTION IMPERVIOUS AREAS	POST-CONSTRUCTION IMPERVIOUS AREAS
BUILDING	2,961 S.F.	8,285 S.F.
PAVEMENT	11,867 S.F.	14,820 S.F.
GRAVEL	8,663 S.F.	3,888 S.F.
STAIRWAY/WALKWAY	276 S.F.	187 S.F.
TOTAL:	23,767 S.F.	27,180 S.F.
PERCENT COVERAGE, PRE-CONSTRUCTION:		63%
PERCENT COVERAGE, POST-CONSTRUCTION:		73%

GRADING AND DRAINAGE NOTES:

1. UNDERGROUND FACILITIES, UTILITIES AND STRUCTURES HAVE BEEN PLOTTED FROM FIELD OBSERVATION AND THEIR LOCATION MUST BE CONSIDERED APPROXIMATE ONLY. NEITHER JONES & BEACH ENGINEERS, INC., NOR ANY OF THEIR EMPLOYEES TAKE RESPONSIBILITY FOR THE LOCATION OF ANY UNDERGROUND STRUCTURES AND/OR UTILITIES NOT SHOWN THAT MAY EXIST. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO HAVE ALL UNDERGROUND STRUCTURES AND/OR UTILITIES LOCATED PRIOR TO EXCAVATION WORK BY CALLING 888-DIG-SAFE (888-344-7233).
2. VERTICAL DATUM: NH STATE PLANE. HORIZONTAL DATUM: NAVD88.
3. ALL BENCHMARKS AND TOPOGRAPHY SHOULD BE FIELD VERIFIED BY THE CONTRACTOR.
4. SITE GRADING SHALL NOT PROCEED UNTIL EROSION CONTROL MEASURES HAVE BEEN INSTALLED. SEE CONSTRUCTION SEQUENCE ON SHEET E1.
5. IMMEDIATELY APPLY AND COMPACT STONE BASE FOR BUILDING PAD TO +/-½" PRIOR TO EXCAVATING INTERIOR AND PERIMETER FOOTINGS.
6. IN AREAS WHERE CONSTRUCTION IS PROPOSED ADJACENT TO ABUTTING PROPERTIES, THE CONTRACTOR SHALL INSTALL ORANGE CONSTRUCTION FENCING ALONG PROPERTY LINES IN ALL AREAS WHERE SILT FENCING IS NOT REQUIRED.
7. INLET PROTECTION SHALL BE PLACED AT ALL CATCH BASINS. SEE DETAIL WITHIN THE DETAIL SHEETS.
8. LAND DISTURBING ACTIVITIES SHALL NOT COMMENCE UNTIL APPROVAL TO DO SO HAS BEEN RECEIVED BY ALL GOVERNING AUTHORITIES.
9. NO GRADING SHALL BEGIN UNTIL ALL EROSION CONTROL MEASURES HAVE BEEN INSTALLED.
10. ALL EXPOSED AREAS SHALL BE SEEDED AS SPECIFIED WITHIN 3 DAYS OF FINAL GRADING.
11. SHOULD CONSTRUCTION STOP FOR LONGER THAN 3 DAYS, THE SITE SHALL BE SEEDED AS SPECIFIED.
12. MAINTAIN EROSION CONTROL MEASURES AFTER EACH RAIN EVENT OF 0.5" OR GREATER IN A 24 HOUR PERIOD AND AT LEAST ONCE A WEEK.
13. THIS PLAN SHALL NOT BE CONSIDERED ALL INCLUSIVE, AS THE GENERAL CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO PREVENT SEDIMENT FROM LEAVING THE SITE.
14. CONSTRUCTION VEHICLES SHALL UTILIZE THE STABILIZED CONSTRUCTION ENTRANCE TO THE EXTENT POSSIBLE THROUGHOUT CONSTRUCTION.
15. THE GENERAL CONTRACTOR SHALL BE RESPONSIBLE TO TAKE WHATEVER MEANS NECESSARY TO ESTABLISH PERMANENT SOIL STABILIZATION.
16. SEE ALSO EROSION AND SEDIMENT CONTROL SPECIFICATIONS ON SHEET E1.
17. CONCRETE WASHOUT PIT TO BE INSTALLED PRIOR TO ANY CONCRETE POURS.

UTILITY NOTES:

1. PRIOR TO THE START OF CONSTRUCTION, THE CONTRACTOR SHALL COORDINATE WITH THE ENGINEER, ARCHITECT AND/OR OWNER, IN ORDER TO OBTAIN AND/OR PAY ALL THE NECESSARY LOCAL PERMITS, CONNECTION FEES AND BONDS.
2. THE CONTRACTOR SHALL PROVIDE A MINIMUM NOTICE OF FOURTEEN (14) DAYS TO ALL CORPORATIONS, COMPANIES AND/OR LOCAL AUTHORITIES OWNING OR HAVING A JURISDICTION OVER UTILITIES RUNNING TO, THROUGH OR ACROSS PROJECT AREAS PRIOR TO DEMOLITION AND/OR CONSTRUCTION ACTIVITIES.
3. THE LOCATION, SIZE, DEPTH AND SPECIFICATIONS FOR CONSTRUCTION OF PROPOSED PRIVATE UTILITY SERVICES SHALL BE TO THE STANDARDS AND REQUIREMENTS OF THE RESPECTIVE UTILITY COMPANY (ELECTRIC, TELEPHONE, CABLE TELEVISION, FIRE ALARM, GAS, WATER, AND SEWER).
4. ALL CONSTRUCTION SHALL CONFORM TO THE TOWN STANDARDS AND REGULATIONS, AND NHDES STANDARDS AND SPECIFICATIONS, WHICHEVER ARE MORE STRINGENT, UNLESS OTHERWISE SPECIFIED.
5. ALL CONSTRUCTION ACTIVITIES SHALL CONFORM TO LABOR OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA) RULES AND REGULATIONS.
6. BUILDING TO BE SERVICED BY UNDERGROUND UTILITIES UNLESS OTHERWISE NOTED.
7. THE CONTRACTOR IS TO VERIFY LOCATION AND DEPTH OF ALL EXISTING UTILITY STUBS PRIOR TO CONSTRUCTION.
8. IF THE BUILDING IS REQUIRED TO HAVE A SPRINKLER SYSTEM, A PRECONSTRUCTION MEETING SHALL BE HELD BETWEEN THE CONTRACTOR, OWNER, ARCHITECT AND THE LOCAL FIRE DEPARTMENT PRIOR TO THE INSTALLATION.
9. DIMENSIONS ARE SHOWN TO CENTERLINE OF PIPE OR FITTING.
10. THE CONTRACTOR SHALL HAVE THE APPROVAL OF ALL GOVERNING AGENCIES HAVING JURISDICTION OVER FIRE PROTECTION SYSTEM PRIOR TO INSTALLATION.
11. EXISTING UTILITIES SHALL BE DIGSAFED BEFORE CONSTRUCTION.
12. ALL WATER LINES SHOULD HAVE TESTABLE BACKFLOW PREVENTERS AT THE ENTRANCE TO EACH BUILDING.
13. SEWERS SHALL BE BURIED TO A MINIMUM DEPTH OF 6 FEET BELOW GRADE IN ALL ROADWAY LOCATIONS, AND TO A MINIMUM DEPTH OF 4 FEET BELOW GRADE IN ALL CROSS-COUNTRY LOCATIONS. PROVIDE TWO-INCHES OF R-10 FOAM BOARD INSULATION 2-FOOT WIDE TO BE INSTALLED 6-INCHES OVER SEWER PIPE IN AREAS WHERE DEPTH IS NOT ACHIEVED. A WAIVER FROM THE DEPARTMENT OF ENVIRONMENTAL SERVICES WASTEWATER ENGINEERING BUREAU IS REQUIRED PRIOR TO INSTALLING SEWER AT LESS THAN MINIMUM COVER.
14. ALL TRENCHING, PIPE LAYING, AND BACKFILLING SHALL BE IN ACCORDANCE WITH FEDERAL OSHA REGULATIONS.
15. SEWER FLOW CALCULATIONS

    CHURCH SANCTUARY (3 GPD / SEAT)
    PROPOSED NUMBER OF SEATS = 200
    FLOW = (200)(3) = 600 GPD
16. NEAREST INLINE WATER VALVES ON EXISTING WATER MAIN EAST AND WEST OF THE TIE-IN POINT ARE AS FOLLOWS:
    EAST: INTERSECTION OF WINTER ST & RAILROAD AVE
    WEST: INTERSECTION OF FRONT ST, MORROW ST, AND WINTER ST
17. PER NH RSA 289.3: NEW CONSTRUCTION, EXCAVATION, OR BUILDING IN THE AREA OF A KNOWN BURIAL SITE OR WITHIN THE BOUNDARIES OF AN ESTABLISHED BURIAL GROUND OR CEMETARY SHALL COMPLY WITH LOCAL ZONING REGULATIONS CONCERNING BURIAL SITES, BURIAL GROUNDS OR CEMETARIES, WHETHER OR NOT SUCH BURIAL SITE OR BURIAL GROUND WAS PROPERLY RECORDED IN THE DEED TO THE PROPERTY. IN THE ABSENCE OF SUCH REGULATIONS, NO NEW CONSTRUCTION, EXCAVATION, OR BUILDING SHALL BE CONDUCTED WITHIN 25 FEET OF A KNOWN BURIAL SITE OR WITHIN 25 FEET OF THE BOUNDARIES OF AN ESTABLISHED BURIAL GROUND OR CEMETARY, WHTHER OR NOT SUCH BURIAL SITE OR BURIAL GROUND WAS PROPERLY RECORDED IN THE DEED TO THE PROPERTY, EXCEPT WHEN SUCH CONSTRUCTION, EXCAVATION, OR BUILDING IS NECESSARY FOR THE CONSTRUCTION OF AN ESSENTIAL SERVICE, AS APPROVED BY THE GOVERNING BODY OF A MUNICIPALITY IN CONCURRENCE WITH THE CEMETARY TRUSTEES, OR IN THE CASE OF A STATE HIGHWAY, BY THE COMMISSIONER OF THE DEPARTMENT OF TRANSPORTATION IN CONCURRENCE WITH THE CEMETARY TRUSTEES.

LANDSCAPE NOTES:

1. THE CONTRACTOR SHALL LOCATE AND VERIFY THE EXISTENCE OF ALL UTILITIES PRIOR TO STARTING WORK.
2. THE CONTRACTOR SHALL SUPPLY ALL PLANT MATERIALS IN QUANTITIES SUFFICIENT TO COMPLETE THE PLANTINGS SHOWN ON THE DRAWINGS.
3. ALL MATERIAL SHALL CONFORM TO THE GUIDELINES ESTABLISHED BY THE CURRENT AMERICAN STANDARD FOR NURSERY STOCK PUBLISHED BY THE AMERICAN ASSOCIATION OF NURSERYMEN.
4. NO PLANT SHALL BE PUT IN THE GROUND BEFORE GRADING HAS BEEN FINISHED.
5. ALL PLANTS SHALL BE WATERED THOROUGHLY TWICE DURING THE FIRST 24–HOUR PERIOD AFTER PLANTING. ALL PLANTS SHALL BE WATERED WEEKLY, OR MORE OFTEN IF NECESSARY, DURING THE FIRST GROWING SEASON.
6. ALL LANDSCAPE AREAS TO BE GRASS COMMON TO REGION, EXCEPT FOR INTERIOR LANDSCAPED ISLANDS OR WHERE OTHER PLANT MATERIAL IS SPECIFIED.
7. ALL TREES AND SHRUBS SHALL BE PLANTED IN MULCH BEDS WITH EDGE STRIPS TO SEPARATE TURF GRASS AREAS.
8. THE CONTRACTOR SHALL REMOVE WEEDS, ROCKS, CONSTRUCTION ITEMS, ETC. FROM ANY LANDSCAPE AREA SO DESIGNATED TO REMAIN, WHETHER ON OR OFF–SITE. GRASS SEED OR PINE BARK MULCH SHALL BE APPLIED AS DEPICTED ON PLANS.
9. FINISHED GRADES IN LANDSCAPED ISLANDS SHALL BE INSTALLED SO THAT THEY ARE 1" HIGHER THAN THE TOP OF THE SURROUNDING CURB.
10. ALL LANDSCAPING SHALL MEET THE TOWN STANDARDS AND REGULATIONS.
11. ALL LANDSCAPED AREAS SHALL HAVE SELECT MATERIALS REMOVED TO A DEPTH OF AT LEAST 9" BELOW FINISH GRADE. THE RESULTING VOID IS TO BE FILLED WITH A MINIMUM OF 9" HIGH–QUALITY SCREENED LOAM AMENDED WITH 3" OF AGED ORGANIC COMPOST.
12. THIS PLAN IS INTENDED FOR LANDSCAPING PURPOSES ONLY. REFER TO CIVIL/SITE DRAWINGS FOR OTHER SITE CONSTRUCTION INFORMATION.

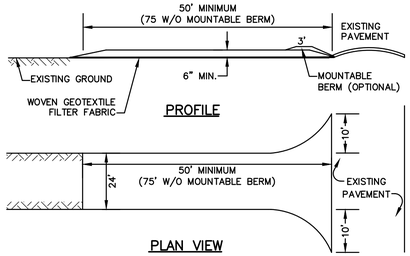
SHEET NO. 12 OF 15
JBE PROJECT NO. 05241.1

TEMPORARY EROSION CONTROL NOTES

1. THE SMALLEST PRACTICAL AREA OF LAND SHALL BE EXPOSED AT ANY ONE TIME. AT NO TIME SHALL AN AREA IN EXCESS OF 5 ACRES BE EXPOSED AT ANY ONE TIME BEFORE DISTURBED AREAS ARE STABILIZED.
2. EROSION, SEDIMENT AND DETENTION MEASURES SHALL BE INSTALLED AS SHOWN ON THE PLANS AND AT LOCATIONS AS REQUIRED, DIRECTED BY THE ENGINEER.
3. ALL DISTURBED AREAS (INCLUDING POND AREAS BELOW THE PROPOSED WATERLINE) SHALL BE RETURNED TO PROPOSED GRADES AND ELEVATIONS. DISTURBED AREAS SHALL BE LOAMED WITH A MINIMUM OF 6" OF SCREENED ORGANIC LOAM AND SEEDED WITH SEED MIXTURE 'C' AT A RATE NOT LESS THAN 1.10 POUNDS OF SEED PER 1,000 S.F. OF AREA (48 LBS. / ACRE).
4. SILT FENCES AND OTHER BARRIERS SHALL BE INSPECTED EVERY SEVEN CALENDAR DAYS AND WITHIN 24 HOURS OF A RAINFALL OF 0.5" OR GREATER. ALL DAMAGED AREAS SHALL BE REPAIRED, AND SEDIMENT DEPOSITS SHALL PERIODICALLY BE REMOVED AND DISPOSED OF.
5. AFTER ALL DISTURBED AREAS HAVE BEEN STABILIZED, THE TEMPORARY EROSION CONTROL MEASURES SHALL BE REMOVED AND THE AREA DISTURBED BY THE REMOVAL SMOOTHED AND RE-VEGETATED.
6. AREAS MUST BE SEEDED AND MULCHED OR OTHERWISE PERMANENTLY STABILIZED WITHIN 3 DAYS OF FINAL GRADING, OR TEMPORARILY STABILIZED WITHIN 14 DAYS OF THE INITIAL DISTURBANCE OF SOIL. ALL AREAS SHALL BE STABILIZED WITHIN 45 DAYS OF INITIAL DISTURBANCE.
7. ALL PROPOSED VEGETATED AREAS THAT DO NOT EXHIBIT A MINIMUM OF 85 PERCENT VEGETATIVE GROWTH BY OCTOBER 15, OR WHICH ARE DISTURBED AFTER OCTOBER 15, SHALL BE STABILIZED BY SEEDING AND INSTALLING NORTH AMERICAN GREEN S75 EROSION CONTROL BLANKETS (OR AN EQUIVALENT APPROVED IN WRITING BY THE ENGINEER) ON SLOPES GREATER THAN 3:1, AND SEEDING AND PLACING 3 TO 4 TONS OF MULCH PER ACRE, SECURED WITH ANCHORED NETTING, ELSEWHERE. THE INSTALLATION OF EROSION CONTROL BLANKETS OR MULCH AND NETTING SHALL NOT OCCUR OVER ACCUMULATED SNOW OR ON FROZEN GROUND AND SHALL BE COMPLETED IN ADVANCE OF THAW OR SPRING MELT EVENTS.
8. ALL DITCHES OR SWALES WHICH DO NOT EXHIBIT A MINIMUM OF 85 PERCENT VEGETATIVE GROWTH BY OCTOBER 15, OR WHICH ARE DISTURBED AFTER OCTOBER 15, SHALL BE STABILIZED TEMPORARILY WITH STONE OR EROSION CONTROL BLANKETS APPROPRIATE FOR THE DESIGN FLOW CONDITIONS.
9. AFTER OCTOBER 15th, INCOMPLETE ROAD OR PARKING SURFACES, WHERE WORK HAS STOPPED FOR THE WINTER SEASON, SHALL BE PROTECTED WITH A MINIMUM OF 3" OF CRUSHED GRAVEL PER NHDOT ITEM 304.3.
10. AN AREA SHALL BE CONSIDERED STABLE IF ONE OF THE FOLLOWING HAS OCCURRED:
    a. BASE COURSE GRAVELS HAVE BEEN INSTALLED IN AREAS TO BE PAVED;
    b. A MINIMUM OF 85% VEGETATED GROWTH HAS BEEN ESTABLISHED;
    c. A MINIMUM OF 3" OF NON-EROSIVE MATERIAL SUCH STONE OR RIPRAP HAS BEEN INSTALLED; OR
    d. EROSION CONTROL BLANKETS HAVE BEEN PROPERLY INSTALLED.

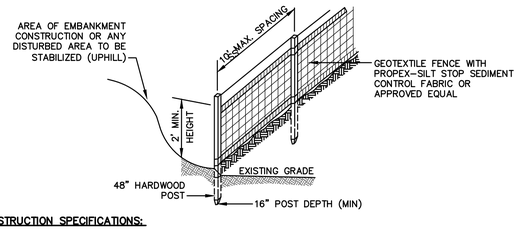


NOTES:

1. STONE FOR STABILIZED CONSTRUCTION ENTRANCE SHALL BE 3 INCH STONE, RECLAIMED STONE, OR RECYCLED CONCRETE EQUIVALENT.
2. THE LENGTH OF THE STABILIZED ENTRANCE SHALL NOT BE LESS THAN 50 FEET, 75' WITHOUT A MOUNTABLE BERM, AND EXCEPT FOR A SINGLE RESIDENTIAL LOT WHERE A 30 FOOT MINIMUM LENGTH WOULD APPLY.
3. THICKNESS OF THE STONE FOR THE STABILIZED ENTRANCE SHALL NOT BE LESS THAN 6 INCHES.
4. THE WIDTH OF THE ENTRANCE SHALL NOT BE LESS THAN THE FULL WIDTH OF THE ENTRANCE WHERE INGRESS OR EGRESS OCCURS, OR 10 FEET, WHICHEVER IS GREATER.
5. GEOTEXTILE FILTER FABRIC SHALL BE PLACED OVER THE ENTIRE AREA PRIOR TO PLACING THE STONE. FILTER FABRIC IS NOT REQUIRED FOR A SINGLE FAMILY RESIDENTIAL LOT.
6. ALL SURFACE WATER THAT IS FLOWING TO OR DIVERTED TOWARD THE CONSTRUCTION ENTRANCE SHALL BE PIPED BENEATH THE ENTRANCE. IF PIPING IS IMPRACTICAL, A STONE BERM WITH 5:1 SLOPES THAT CAN BE CROSSED BY VEHICLES MAY BE SUBSTITUTED FOR THE PIPE.
7. THE ENTRANCE SHALL BE MAINTAINED IN A CONDITION THAT WILL PREVENT TRACKING OR FLOWING OF SEDIMENT ONTO THE PUBLIC RIGHT-OF-WAY. THIS MAY REQUIRE PERIODIC TOP DRESSING WITH ADDITIONAL STONE AS CONDITIONS DEMAND AND REPAIR AND/OR CLEAN OUT OF ANY MEASURES USED TO TRAP SEDIMENT. ALL SEDIMENT SPILLED, WASHED, OR TRACKED ONTO THE PUBLIC RIGHT-OF-WAY MUST BE REMOVED PROMPTLY.

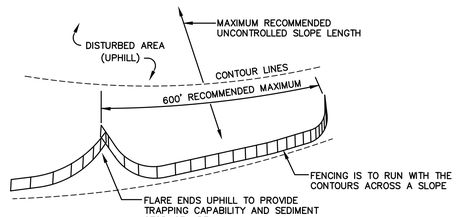
STABILIZED CONSTRUCTION ENTRANCE

NOT TO SCALE



CONSTRUCTION SPECIFICATIONS:

1. WOVEN FABRIC FENCE TO BE FASTENED SECURELY TO FENCE POSTS WITH WIRE TIES OR STAPLES. FILTER CLOTH SHALL BE FASTENED TO WOVEN WIRE EVERY 24" AT TOP, MID AND BOTTOM AND EMBEDDED IN THE GROUND A MINIMUM OF 8" AND THEN COVERED WITH SOIL.
2. THE FENCE POSTS SHALL BE A MINIMUM OF 48" LONG, SPACED A MAXIMUM 10' APART, AND DRIVEN A MINIMUM OF 16" INTO THE GROUND.
3. WHEN TWO SECTIONS OF FILTER CLOTH ADJOIN EACH OTHER, THE ENDS OF THE FABRIC SHALL BE OVERLAPPED 6", FOLDED AND STAPLED TO PREVENT SEDIMENT FROM BY-PASSING.
4. MAINTENANCE SHALL BE PERFORMED AS NEEDED AND SEDIMENT REMOVED AND PROPERLY DISPOSED OF WHEN IT IS 6" DEEP OR VISIBLE 'BULGES' DEVELOP IN THE SILT FENCE.
5. PLACE THE ENDS OF THE SILT FENCE UP CONTOUR TO PROVIDE FOR SEDIMENT STORAGE.
6. SILT FENCE SHALL REMAIN IN PLACE FOR 24 MONTHS.



7. SILT FENCES SHALL BE REMOVED WHEN NO LONGER NEEDED AND THE SEDIMENT COLLECTED SHALL BE DISPOSED AS DIRECTED BY THE ENGINEER. THE AREA DISTURBED BY THE REMOVAL SHALL BE SMOOTHED AND REVEGETATED.

MAINTENANCE:

1. SILT FENCES SHALL BE INSPECTED IMMEDIATELY AFTER EACH RAINFALL AND AT LEAST DAILY DURING PROLONGED RAINFALL. ANY REPAIRS THAT ARE REQUIRED SHALL BE DONE IMMEDIATELY.
2. IF THE FABRIC ON A SILT FENCE SHOULD DECOMPOSE OR BECOME INEFFECTIVE DURING THE EXPECTED LIFE OF THE FENCE, THE FABRIC SHALL BE REPLACED PROMPTLY.
3. SEDIMENT DEPOSITS SHOULD BE INSPECTED AFTER EVERY STORM EVENT. THE DEPOSITS SHOULD BE REMOVED WHEN THEY REACH APPROXIMATELY ONE HALF THE HEIGHT OF THE BARRIER.
4. SEDIMENT DEPOSITS THAT ARE REMOVED, OR LEFT IN PLACE AFTER THE FABRIC HAS BEEN REMOVED, SHALL BE GRADED TO CONFORM WITH THE EXISTING TOPOGRAPHY AND VEGETATED.

SEEDING SPECIFICATIONS

1. GRADING AND SHAPING
   A. SLOPES SHALL NOT BE STEEPER THAN 2:1 WITHOUT APPROPRIATE EROSION CONTROL MEASURES AS SPECIFIED ON THE PLANS (3:1 SLOPES OR FLATTER ARE PREFERRED).
   B. WHERE MOWING WILL BE DONE, 3:1 SLOPES OR FLATTER ARE RECOMMENDED.
2. SEEDBED PREPARATION
   A. SURFACE AND SEEPAGE WATER SHOULD BE DRAINED OR DIVERTED FROM THE SITE TO PREVENT DROWNING OR WINTER KILLING OF THE PLANTS.
   B. STONES LARGER THAN 4 INCHES AND TRASH SHOULD BE REMOVED BECAUSE THEY INTERFERE WITH SEEDING AND FUTURE MAINTENANCE OF THE AREA. WHERE FEASIBLE, THE SOIL SHOULD BE TILLED TO A DEPTH OF ABOUT 4 INCHES TO PREPARE A SEEDBED AND FERTILIZER AND LIME MIXED INTO THE SOIL. THE SEEDBED SHOULD BE LEFT IN A REASONABLY FIRM AND SMOOTH CONDITION. THE LAST TILLAGE OPERATION SHOULD BE PERFORMED ACROSS THE SLOPE WHEREVER PRACTICAL.
3. ESTABLISHING A STAND
   A. LIME AND FERTILIZER SHOULD BE APPLIED PRIOR TO OR AT THE TIME OF SEEDING AND INCORPORATED INTO THE SOIL. TYPES AND AMOUNTS OF LIME AND FERTILIZER SHOULD BE BASED ON AN EVALUATION OF SOIL TESTS. WHEN A SOIL TEST IS NOT AVAILABLE, THE FOLLOWING MINIMUM AMOUNTS SHOULD BE APPLIED:
      AGRICULTURAL LIMESTONE, 2 TONS PER ACRE OR 100 LBS. PER 1,000 SQ.FT.
      NITROGEN(N), 50 LBS. PER ACRE OR 1.1 LBS. PER 1,000 SQ.FT.
      PHOSPHATE(P2O5), 100 LBS. PER ACRE OR 2.2 LBS. PER 1,000 SQ.FT.
      POTASH(K2O), 100 LBS. PER ACRE OR 2.2 LBS. PER 1,000 SQ.FT.
      (NOTE: THIS IS THE EQUIVALENT OF 500 LBS. PER ACRE OF 10-20-20 FERTILIZER OR 1,000 LBS. PER ACRE OF 5-10-10.)
   B. SEED SHOULD BE SPREAD UNIFORMLY BY THE METHOD MOST APPROPRIATE FOR THE SITE. METHODS INCLUDE BROADCASTING, DRILLING AND HYDROSEEDING. WHERE BROADCASTING IS USED, COVER SEED WITH .25 INCH OF SOIL OR LESS, BY CULTIPACKING OR RAKING.
   C. REFER TO THE 'SEEDING GUIDE' AND 'SEEDING RATES' TABLES ON THIS SHEET FOR APPROPRIATE SEED MIXTURES AND RATES OF SEEDING. ALL LEGUMES (CROWNVETCH, BIRDSFOOT, TREFOIL AND FLATPEA) MUST BE INOCULATED WITH THEIR SPECIFIC INOCULANT PRIOR TO THEIR INTRODUCTION TO THE SITE.
   D. WHEN SEEDED AREAS ARE MULCHED, PLANTINGS MAY BE MADE FROM EARLY SPRING TO EARLY OCTOBER. WHEN SEEDED AREAS ARE NOT MULCHED, PLANTINGS SHOULD BE MADE FROM EARLY SPRING TO MAY 20th OR FROM AUGUST 10th TO SEPTEMBER 1st.
4. MULCH
   A. HAY, STRAW, OR OTHER MULCH, WHEN NEEDED, SHOULD BE APPLIED IMMEDIATELY AFTER SEEDING.
   B. MULCH WILL BE HELD IN PLACE USING APPROPRIATE TECHNIQUES FROM THE BEST MANAGEMENT PRACTICE FOR MULCHING. HAY OR STRAW MULCH SHALL BE PLACED AT A RATE OF 90 LBS PER 1000 S.F.
5. MAINTENANCE TO ESTABLISH A STAND
   A. PLANTED AREAS SHOULD BE PROTECTED FROM DAMAGE BY FIRE, GRAZING, TRAFFIC, AND DENSE WEED GROWTH.
   B. FERTILIZATION NEEDS SHOULD BE DETERMINED BY ONSITE INSPECTIONS. SUPPLEMENTAL FERTILIZER IS USUALLY THE KEY TO FULLY COMPLETE THE ESTABLISHMENT OF THE STAND BECAUSE MOST PERENNIALS TAKE 2 TO 3 YEARS TO BECOME FULLY ESTABLISHED.
   C. IN WATERWAYS, CHANNELS, OR SWALES WHERE UNIFORM FLOW CONDITIONS ARE ANTICIPATED, ANNUAL MOWING MAY BE NECESSARY TO CONTROL GROWTH OF WOODY VEGETATION.

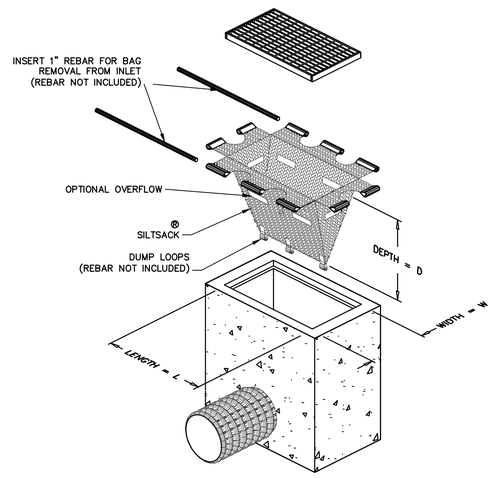
1/ FOR HEAVY USE ATHLETIC FIELDS CONSULT THE UNIVERSITY OF NEW HAMPSHIRE COOPERATIVE EXTENSION TURF SPECIALIST FOR CURRENT VARIETIES AND SEEDING RATES.

SEEDING RATES



NOTES:

1. TO INSTALL SILTSACK IN THE CATCH BASIN, REMOVE THE GRATE AND PLACE THE SACK IN THE OPENING. HOLD APPROXIMATELY SIX INCHES OF THE SACK OUTSIDE THE FRAME. THIS IS THE AREA OF THE LIFTING STRAPS. REPLACE THE GRATE TO HOLD THE SACK IN PLACE.
2. THE SILTSACK IS FULL AND SHOULD BE EMPTIED WHEN THE RESTRAINT CORD IS NO LONGER VISIBLE.
3. TO REMOVE SILTSACK, TAKE TWO PIECES OF 1" DIAMETER REBAR AND PLACE THROUGH THE LIFTING LOOPS ON EACH SIDE OF THE SACK TO FACILITATE THE LIFTING OF SILTSACK.
4. TO EMPTY SILTSACK, PLACE UNIT WHERE THE CONTENTS WILL BE COLLECTED. PLACE THE REBAR THROUGH THE LIFT STRAPS (CONNECTED TO THE BOTTOM OF THE SACK) AND LIFT. THIS WILL TURN THE SILTSACK INSIDE OUT AND EMPTY THE CONTENTS. CLEAN OUT AND RINSE. RETURN SILTSACK TO ITS ORIGINAL SHAPE AND PLACE BACK IN THE BASIN.
5. SILTSACK IS REUSABLE. ONCE THE CONSTRUCTION CYCLE IS COMPLETE, REMOVE SILTSACK FROM THE BASIN AND CLEAN. SILTSACK SHOULD BE STORED OUT OF THE SUNLIGHT UNTIL NEEDED ON ANOTHER PROJECT.

SILTSACK INLET SEDIMENT CONTROL DEVICE TYPE B - WITHOUT CURB DEFLECTOR

NOT TO SCALE

CONSTRUCTION SEQUENCE

1. CUT AND REMOVE TREES IN CONSTRUCTION AREA AS REQUIRED OR DIRECTED.
2. INSTALL SILT FENCING, SILTSACK, AND CONSTRUCTION ENTRANCE PRIOR TO THE START OF CONSTRUCTION. THESE ARE TO BE MAINTAINED UNTIL THE FINAL PAVEMENT SURFACING AND LANDSCAPING AREAS ARE ESTABLISHED.
3. CLEAR, CUT, GRUB AND DISPOSE OF DEBRIS IN APPROVED FACILITIES.
4. STRIP LOAM AND PAVEMENT OR RECLAIM EXISTING PAVEMENT WITHIN LIMITS OF WORK PER THE RECOMMENDATIONS OF THE PROJECT ENGINEER.
5. PERFORM PRELIMINARY SITE GRADING IN ACCORDANCE WITH THE PLANS.
6. PREPARE BUILDING PAD(S) TO ENABLE BUILDING CONSTRUCTION TO BEGIN.
7. INSTALL THE DRAINAGE SYSTEM FIRST, THEN ANY OTHER UTILITIES IN ACCORDANCE WITH THE PLAN AND DETAILS. ANY CONFLICTS BETWEEN UTILITIES ARE TO BE RESOLVED WITH THE INVOLVEMENT AND APPROVAL OF THE ENGINEER.
8. DAILY, OR AS REQUIRED, CONSTRUCT TEMPORARY BERMS, DRAINAGE DITCHES, CHECK DAMS, SEDIMENT TRAPS, ETC., TO PREVENT EROSION ON THE SITE AND PREVENT ANY SILTATION OF ABUTTING WATERS AND/OR PROPERTY.
9. PERFORM FINAL FINE GRADING, INCLUDING PLACEMENT OF 'SELECT' SUBGRADE MATERIALS.
10. PAVE PARKING LOT AND DRIVEWAY WITH INITIAL 'BASE COURSE'.
11. PERFORM ALL REMAINING SITE CONSTRUCTION (i.e. BUILDING, UTILITY CONNECTIONS, ETC.).
12. LOAM AND SEED ALL DISTURBED AREAS.
13. FINISH PAVING PARKING AREAS AND DRIVEWAY WITH 'FINISH' COURSE.
14. DRIVEWAY AND PARKING LOT SHALL BE STABILIZED WITHIN 72 HOURS OF ACHIEVING FINISHED GRADE.
15. ALL CUT AND FILL SLOPES SHALL BE SEEDED/LOAMED WITHIN 72 HOURS OF ACHIEVING FINISHED GRADE.
16. COMPLETE PERMANENT SEEDING AND LANDSCAPING.
17. REMOVE TEMPORARY EROSION CONTROL MEASURES AFTER SEEDING AREAS HAVE BEEN 75%-85% ESTABLISHED AND SITE IMPROVEMENTS ARE COMPLETE. SMOOTH AND RE-VEGETATE ALL DISTURBED AREAS.
18. CLEAN SITE OF ALL SILT AND DEBRIS.
19. INSTALL ALL PAINTED PAVEMENT MARKINGS AND SIGNAGE PER THE PLANS AND DETAILS.
20. ALL EROSION CONTROLS SHALL BE INSPECTED WEEKLY AND AFTER EVERY HALF-INCH OF RAINFALL.
21. UPON COMPLETION OF CONSTRUCTION, IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO NOTIFY ANY RELEVANT PERMITTING AGENCIES THAT THE CONSTRUCTION HAS BEEN FINISHED IN A SATISFACTORY MANNER.

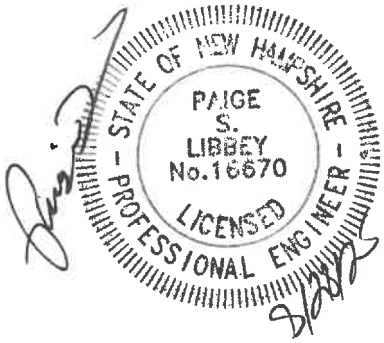
DRAINAGE ANALYSIS

SEDIMENT AND EROSION CONTROL PLAN

Exeter Presbyterian Church
73 Winter Street
Exeter, NH

Prepared for:

Exeter Presbyterian Church
73 Winter Street
Exeter, NH



July 15, 2025
JBE Project No. 05241.1
Rev. #1 – 08/28/2025

1. EXECUTIVE SUMMARY

Our client, Exeter Presbyterian Church, proposes to redevelop their property to include a 5,400 S.F. building addition with associated parking and driveway on a ±0.86-acre parcel of land located on the north side of Winter Street in Exeter, NH. A drainage analysis of the entire site and its offsite contributing watershed areas was conducted for the purpose of estimating the peak rate of stormwater runoff and to subsequently design adequate drainage structures. Two models were compiled, one for the area in its existing (pre-construction) condition, and a second for its proposed (post-construction) condition. A summary of the existing and proposed conditions peak rates of runoff is as follows:

COMPONENT	PEAK DISCHARGE COMPARISON (C.F.S.)							
	2 Year		10 Year		25 Year		50 Year	
	Pre	Post	Pre	Post	Pre	Post	Pre	Post
Analysis Point #1	0.26	0.23	0.58	0.56	0.80	0.78	0.96	0.95
Analysis Point #2	0.67	0.01	1.68	0.03	2.37	0.04	2.89	0.05

COMPONENT	PEAK VOLUME COMPARISON (C.F.)							
	2 Year		10 Year		25 Year		50 Year	
	Pre	Post	Pre	Post	Pre	Post	Pre	Post
Analysis Point #1	0.019	0.017	0.042	0.041	0.058	0.057	0.070	0.069
Analysis Point #2	0.044	0.001	0.115	0.002	0.165	0.003	0.202	0.004

The drainage design intent for this site is to maintain or decrease the post-development peak flow compared to the pre-development peak flow conditions to the extent practicable and to effectively treat stormwater from the development of this site. This has been accomplished through the use of three porous paver sections to maintain the peak discharge and effectively treat and infiltrate stormwater from the developed site.

Section 9.3.2: Stormwater Management for Redevelopment within the Site Plan Review and Subdivision Regulations for the Town of Exeter New Hampshire lists the stormwater regulations of redeveloped sites. Item 4 of this section states as follows:

For sites meeting the definition of a redevelopment project and having more than 60% existing impervious surface area, stormwater shall be managed for water quality in accordance with one or more of the following techniques, listed in order of preference:

A) Implement measures onsite that result in disconnection or treatment of 100% of the additional proposed impervious surface area and at least 30% of the existing impervious area and pavement areas, preferably using filtration and/or infiltration practices.
B) If resulting in greater overall water quality improvement on the site, implement LID practices to the maximum extent practicable to provide treatment of runoff generated from at least 60% of the entire developed site area.

Since this site in the existing condition is over 60% impervious, this project qualifies to meet this requirement. The pre-construction site contains 23,767 S.F. of impervious area, and the proposed development will result in the addition of 3,413 S.F. of impervious surfaces. The required amount of impervious surface area to be captured and treated is thus equal to 10,543 S.F.. The proposed

stormwater management practices have been designed to capture and treat 18,357 S.F. of impervious surface area, almost doubling the required amount.

The proposed stormwater management practices have also been designed to treat the entirety of the calculated water quality volume while achieving at least 80% removal of Total Suspended Solids (TSS) and at least 60% of both Total Nitrogen and Total Phosphorus. Additionally, Groundwater Recharge requirements are met through the use of three infiltrating porous paver systems and can be found in the appendix of this report.

Channel Protection Requirements are met due to the fact that the 2-Year 24-Hour post-development peak flow rate generated from the proposed disturbance is less than the 2-Year 24-Hour pre-development peak flow rate and the 2-Year 24-Hour post-development peak volume has not increased over the 2-Year 24-Hour pre-development volume. Additionally, the 2-Year 24-Hour post-development peak flow rate is less than 2 C.F.S..

Peak Runoff Control Requirements are met due to the fact that throughout all modeled storm events (2-, 10-, 25-, and 50-Year 24-Hour), the peak flow rate has not increased in the post-development condition compared to the pre-development condition.

2. DRAINAGE ANALYSIS

2.1 METHODOLOGY

This drainage report includes an existing conditions analysis of the area involved in the proposed development, as well as a proposed condition, or post-construction analysis, of the same location. These analyses were accomplished using the USDA SCS TR-20 Method within the HydroCAD Stormwater Modeling System. The curve numbers were developed using the SCS TR-55 Runoff Curve numbers for Urban Areas. A Type III SCS 24-hour rainfall distribution was utilized in analyzing the data for the 2 Year – 24 Hour (3.31"), 10 Year – 24 Hour (5.27"), 25 Year – 24 Hour (6.50"), and 50 Year – 24 Hour (7.40") storm events.

2.2 EXISTING CONDITIONS ANALYSIS

The study area consists entirely of the subject property, containing ±0.756 acres. The existing site is currently developed and is an operating church. There are stormwater management practices located onsite currently. The existing site is extremely flat and contains a subtle high point, dividing the area into two (2) subcatchments that flow towards two (2) separate analysis points described below.

The entirety of the soil on this site is Urban Land – Hoosic Complex, described as Hydrologic Soil Group (HSG) "A". Infiltration testing was performed in the areas of each of the three porous paver systems. The Ksat value resultant of the infiltration testing and utilized in the stormwater model utilizes a factor of safety of two in order to obtain a conservative model when studying the impacts of the development. Infiltration testing data and results can be found in the appendix of this report.

Analysis Point #1 (AP1) represents Winter Street, where existing stormwater infrastructure is in place to capture and convey runoff.

Analysis Point #2 (AP2) represents the parking lot of the abutting parcel.

Subcatchment 100 represents the area of land that flows directly to Winter Street (AP1)

Subcatchment 200 represents the area of land that flows to a low point (Pond P10), before reaching Analysis Point #2.

2.3 PROPOSED CONDITIONS ANALYSIS

The proposed site includes the construction of a new 5,400 S.F. building with associated parking and driveway.

Subcatchment 200 represents the area of land that flows directly to Analysis Point #1, similarly to Subcatchment 100 in the pre-construction model.

Subcatchment 201 represents the area of land that flows to one of the porous paver sections (Pond P20).

Subcatchment 202 represents the area of land that flows to another porous paver section (Pond P21).

Subcatchment 203 represents the area of land that flows to the final porous paver section (Pond P22).

Subcatchment 204 represents the small area of land that flows directly to Analysis Point #2, similarly to Subcatchment 101 in the pre-construction model.

2.4 CONCLUSION

This proposed site development will have minimal effect on abutting infrastructures or properties by way of stormwater runoff or siltation. Peak runoff and volume from the proposed site has been decreased compared to the existing conditions to the extent practicable. Required treatment levels have been obtained through the use of three porous paver systems.

Respectfully Submitted,
JONES & BEACH ENGINEERS, INC.

Nicholas Lorenz
Project Engineer

[1] Precipitation frequency (PF) estimates in this table are based on frequency analysis of partial duration series (PDS).

Numbers in parenthesis are PF estimates at lower and upper bounds of the 90% confidence interval. The probability that precipitation frequency estimates (for a given duration and average recurrence interval) will be greater than the upper bound (or less than the lower bound) is 5%. Estimates at upper bounds are not checked against probable maximum precipitation (PMP) estimates and may be higher than currently valid PMP values.

Please refer to NOAA Atlas 14 document for more information.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:24,000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Rockingham County, New Hampshire
Survey Area Data: Version 27, Sep 3, 2024

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: May 22, 2022—Jun 5, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
599	Urban land-Hoosic complex, 3 to 15 percent slopes	4.6	100.0%
Totals for Area of Interest		**4.6**	**100.0%**

Map Unit Descriptions

The map units delineated on the detailed soil maps in a soil survey represent the soils or miscellaneous areas in the survey area. The map unit descriptions, along with the maps, can be used to determine the composition and properties of a unit.

A map unit delineation on a soil map represents an area dominated by one or more major kinds of soil or miscellaneous areas. A map unit is identified and named according to the taxonomic classification of the dominant soils. Within a taxonomic class there are precisely defined limits for the properties of the soils. On the landscape, however, the soils are natural phenomena, and they have the characteristic variability of all natural phenomena. Thus, the range of some observed properties may extend beyond the limits defined for a taxonomic class. Areas of soils of a single taxonomic class rarely, if ever, can be mapped without including areas of other taxonomic classes. Consequently, every map unit is made up of the soils or miscellaneous areas for which it is named and some minor components that belong to taxonomic classes other than those of the major soils.

Most minor soils have properties similar to those of the dominant soil or soils in the map unit, and thus they do not affect use and management. These are called noncontrasting, or similar, components. They may or may not be mentioned in a particular map unit description. Other minor components, however, have properties and behavioral characteristics divergent enough to affect use or to require different management. These are called contrasting, or dissimilar, components. They generally are in small areas and could not be mapped separately because of the scale used. Some small areas of strongly contrasting soils or miscellaneous areas are identified by a special symbol on the maps. If included in the database for a given area, the contrasting minor components are identified in the map unit descriptions along with some characteristics of each. A few areas of minor components may not have been observed, and consequently they are not mentioned in the descriptions, especially where the pattern was so complex that it was impractical to make enough observations to identify all the soils and miscellaneous areas on the landscape.

The presence of minor components in a map unit in no way diminishes the usefulness or accuracy of the data. The objective of mapping is not to delineate pure taxonomic classes but rather to separate the landscape into landforms or landform segments that have similar use and management requirements. The delineation of such segments on the map provides sufficient information for the development of resource plans. If intensive use of small areas is planned, however, onsite investigation is needed to define and locate the soils and miscellaneous areas.

An identifying symbol precedes the map unit name in the map unit descriptions. Each description includes general facts about the unit and gives important soil properties and qualities.

Soils that have profiles that are almost alike make up a *soil series*. Except for differences in texture of the surface layer, all the soils of a series have major horizons that are similar in composition, thickness, and arrangement.

Soils of one series can differ in texture of the surface layer, slope, stoniness, salinity, degree of erosion, and other characteristics that affect their use. On the basis of such differences, a soil series is divided into *soil phases*. Most of the areas shown on the detailed soil maps are phases of soil series. The name of a soil phase commonly indicates a feature that affects use or management. For example, Alpha silt loam, 0 to 2 percent slopes, is a phase of the Alpha series.

Some map units are made up of two or more major soils or miscellaneous areas. These map units are complexes, associations, or undifferentiated groups.

A *complex* consists of two or more soils or miscellaneous areas in such an intricate pattern or in such small areas that they cannot be shown separately on the maps. The pattern and proportion of the soils or miscellaneous areas are somewhat similar in all areas. Alpha-Beta complex, 0 to 6 percent slopes, is an example.

An *association* is made up of two or more geographically associated soils or miscellaneous areas that are shown as one unit on the maps. Because of present or anticipated uses of the map units in the survey area, it was not considered practical or necessary to map the soils or miscellaneous areas separately. The pattern and relative proportion of the soils or miscellaneous areas are somewhat similar. Alpha-Beta association, 0 to 2 percent slopes, is an example.

An *undifferentiated group* is made up of two or more soils or miscellaneous areas that could be mapped individually but are mapped as one unit because similar interpretations can be made for use and management. The pattern and proportion of the soils or miscellaneous areas in a mapped area are not uniform. An area can be made up of only one of the major soils or miscellaneous areas, or it can be made up of all of them. Alpha and Beta soils, 0 to 2 percent slopes, is an example.

Some surveys include *miscellaneous areas*. Such areas have little or no soil material and support little or no vegetation. Rock outcrop is an example.

5 EPA PERFORMANCE CURVES FOR SOIL INFILTRATION RATE: INFILTRATION TRENCH

According to the 2025 New Hampshire Stormwater Manual, the pollutant removal efficiencies of infiltration trenches is to be determined by EPA Performance Curves and varies depending on the infiltration rate and depth of runoff from impervious areas. In this case, where the sub-grade of the porous paver systems acts exactly like a typical infiltration trench, the EPA Performance curve for infiltration trenches with an infiltration rate corresponding with the Ksat value obtained from testing was utilized to determine the pollutant removal efficiency of the porous paver systems.

As seen from the following Performance Curves, all porous paver systems provide more than the required amount of pollutant removal efficiencies listed within the Site Plan Review and Subdivision Regulations for the Town of Exeter New Hampshire.

BMP Performance Curves for Soil Infiltration Rate: Infiltration Trench

POROUS PAVER SYSTEM #1 (POND P20)

DESIGN INFILTRATION RATE = 6.2 IN/HR

CURVE CLOSEST TO, BUT NOT MORE THAN DESIGN RATE = 2.41 IN/HR

INFILTRATION PRACTICE CRITERIA
(Env-Wq 1508.07)

Type/Node Name: **POROUS PAVER SYSTEM #1 (POND P20)**

Enter the type of infiltration practice (such as basin, trench) and the node name in the drainage analysis, if applicable.

		Have you reviewed Env-Wq 1508.07(a) to ensure that infiltration is allowed?	← yes
0.56	ac	A = Area draining to the practice	
0.53	ac	A_I = Impervious area draining to the practice	
0.95	decimal	I = Percent impervious area draining to the practice, in decimal form	
0.90	unitless	Rv = Runoff coefficient = 0.05 + (0.9 x I)	
0.51	ac-in	WQV= 1" x Rv x A	
1,833	cf	WQV conversion (ac-in x 43,560 sf/ac x 1ft/12")	
458	cf	25% x WQV (check calc for sediment forebay volume)	
N/A		Method of pretreatment? (not required for clean or roof runoff)	
	cf	V_{SED} = Sediment forebay volume, if used for pretreatment	≥ 25%WQV
265	cf	V = Volume[1] (attach a stage-storage table)	≥ WQV
904	sf	A_{SA} = Surface area of the bottom of the pond	
6.20	iph	$Ksat_{DESIGN}$ = Design infiltration rate[2]	
3.9	hours	T_{DRAIN} = Drain time = V / (A_{SA} * I_{DESIGN})	≤ 72-hrs
60.89	feet	E_{BTM} = Elevation of the bottom of the basin	
60.88	feet	E_{SHWT} = Elevation of SHWT (if none found, enter the lowest elevation of the test pit)	
60.88	feet	E_{ROCK} = Elevation of bedrock (if none found, enter the lowest elevation of the test pit)	
0.01	feet	D_{SHWT} = Separation from SHWT	≥ *[3]
0.0	feet	D_{ROCK} = Separation from bedrock	≥ *[3]
	ft	D_{amend} = Depth of amended soil, if applicable due high infiltation rate	≥ 24"
	ft	D_T = Depth of trench, if trench proposed	4 - 10 ft
	Yes/No	If a trench or underground system is proposed, has observation well been provided?	←yes
		If a trench is proposed, does material meet Env-Wq 1508.07(k)(2) requirements.[4]	← yes
	Yes/No	If a basin is proposed, Is the perimeter curvilinear, and basin floor flat?	← yes
	:1	If a basin is proposed, pond side slopes.	≥3:1
60.99	ft	Peak elevation of the 10-year storm event (infiltration can be used in analysis)	
61.04	ft	Peak elevation of the 50-year storm event (infiltration can be used in analysis)	
62.11	ft	Elevation of the top of the practice (if a basin, this is the elevation of the berm)	
YES		10 peak elevation ≤ Elevation of the top of the trench?[5]	← yes
YES		If a basin is proposed, 50-year peak elevation ≤ Elevation of berm?	← yes

1. Volume below the lowest invert of the outlet structure and excludes forebay volume
2. $Ksat_{DESIGN}$ includes a factor of safety. See Env-Wq 1504.14 for requirements for determining the infiltr. rate
3. 1' separation if treatment not required; 4' for treatment in GPAs & WSIPAs; & 3' in all other areas.
4. Clean, washed well graded diameter of 1.5 to 3 inches above the in-situ soil.
5. If 50-year peak elevation exceeds top of trench, the overflow must be routed in HydroCAD as secondary discharge.

Designer's Notes: ALTHOUGH THE ENTIRETY OF THE WQV IS NOT PROVIDED WITHIN THE SYSTEM, THE PRACTICE NEVER OVERTOPS. THIS SHOWS THAT EVEN THOUGH THE ENTIRETY OF THE WQV CANNOT BE STORED IN THE SYSTEM, THE ENTIRETY OF THE WQV IS STILL TREATED THROUGH THIS PRACTICE. FOR THE SAME REASONING, POLLUTANT REMOVAL REQUIREMENTS ARE EXCEEDED.

60.59	feet	E_{BTM} = Elevation of the bottom of the basin	
60.58	feet	E_{SHWT} = Elevation of SHWT (if none found, enter the lowest elevation of the test pit)	
60.58	feet	E_{ROCK} = Elevation of bedrock (if none found, enter the lowest elevation of the test pit)	
0.01	feet	D_{SHWT} = Separation from SHWT	≥ *[3]
0.0	feet	D_{ROCK} = Separation from bedrock	≥ *[3]
	ft	D_{amend} = Depth of amended soil, if applicable due high infiltation rate	≥ 24"
	ft	D_T = Depth of trench, if trench proposed	4 - 10 ft
	Yes/No	If a trench or underground system is proposed, has observation well been provided?	←yes
		If a trench is proposed, does material meet Env-Wq 1508.07(k)(2) requirements.[4]	← yes
	Yes/No	If a basin is proposed, Is the perimeter curvilinear, and basin floor flat?	← yes
	:1	If a basin is proposed, pond side slopes.	≥3:1
60.64	ft	Peak elevation of the 10-year storm event (infiltration can be used in analysis)	
60.65	ft	Peak elevation of the 50-year storm event (infiltration can be used in analysis)	
62.69	ft	Elevation of the top of the practice (if a basin, this is the elevation of the berm)	
YES		10 peak elevation ≤ Elevation of the top of the trench?[5]	← yes
YES		If a basin is proposed, 50-year peak elevation ≤ Elevation of berm?	← yes

1. Volume below the lowest invert of the outlet structure and excludes forebay volume
2. $Ksat_{DESIGN}$ includes a factor of safety. See Env-Wq 1504.14 for requirements for determining the infiltr. rate
3. 1' separation if treatment not required; 4' for treatment in GPAs & WSIPAs; & 3' in all other areas.
4. Clean, washed well graded diameter of 1.5 to 3 inches above the in-situ soil.
5. If 50-year peak elevation exceeds top of trench, the overflow must be routed in HydroCAD as secondary discharge.

Designer's Notes:

7 GROUNDWATER RECHARGE CALCULATION

GROUNDWATER RECHARGE VOLUME (GRV)
(Env-Wq 1504.12)

0.08	ac	Area of HSG A soil that was replaced by impervious cover	0.40"
	ac	Area of HSG B soil that was replaced by impervious cover	0.25"
	ac	Area of HSG C soil that was replaced by impervious cover	0.10"
	ac	Area of HSG D soil or impervious cover that was replaced by impervious cover	0.0"
0.40	inches	Rd = Weighted groundwater recharge depth	
0.032	ac-in	GRV = AI * Rd	
116	cf	GRV conversion (ac-in x 43,560 sf/ac x 1ft/12")	
←	Y/N	Is a stage-storage table attached showing that the GRV can be stored below the lowest invert of the outlet structure (if applicable)? Multiple stormwater control measures may be used to meet the GRV requirements.	

Provide calculations/discussion below showing that the project meets the groundwater recharge requirements (Env-Wq 1507.04):

STORAGE BELOW THE LOWEST INVERT:

POROUS PAVER SYSTEM #1 = 265 C.F.

POROUS PAVER SYSTEM #2 = 1,422 C.F.

POROUS PAVER SYSTEM #3 = 484 C.F.

GRV PROVIDED = 2,171 C.F.

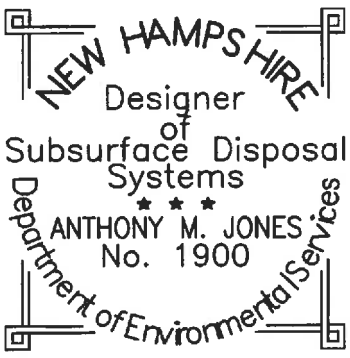
TEST PITS
FOR
73 WINTER STREET
EXETER, NEW HAMPSHIRE
June 19, 2025
JBE Project No. 05241.1

Performed by: Anthony Jones, Jones & Beach Engineers, Inc., SSD #1900

Test Pit #1

0"- 8"	10YR 3/3	dark brown fine sandy loam granular, very friable many roots
8" – 24"	10YR 4/6	dark yellowish brown sand granular, very friable many faint redox few roots
24" – 36"	2.5Y 5/4	grayish brown fine sand, with silty clay pockets Massive, firm many faint redox

SHWT = 24"
Roots: 24"
No H_2O observed
No Refusal observed



Test Pit #2

0"- 14"	10YR 3/3	dark brown fine sandy loam granular, friable common roots
14" – 26"	10YR 5/6	yellowish brown fine sandy loam granular, very friable few roots
26" – 48"	2.5Y 5/4	light olive brown fine sand, with silty clay pockets massive, friable many faint redox

SHWT = 26"
Roots: 26"
No H_2O observed
No Refusal observed

Tax Map 73 / Lot 143
Exeter, NH 03833

Prepared for:

Exeter Presbyterian Church
73 Winter Street
Exeter, NH 03833

August 28, 2025
JBE Project No. 05241.1

Inspection and Maintenance of Facilities and Property

A. Maintenance of Common Facilities or Property

1. The property owner, future owners and assigns are responsible to perform the maintenance obligations or hire a Professional Engineer to review the site on an annual basis for maintenance and certification of the stormwater system. The property owner shall keep receipts and records of all maintenance companies hired throughout the year.

B. General Inspection and Maintenance Requirements

1. Permanent stormwater and sediment and erosion control facilities to be maintained on the site include, but are not limited to, the following:

    a. Parking Lot and Roadway
    b. Vegetation and Landscaping
    c. Porous Pavers

2. Maintenance of permanent measures shall follow the following schedule:

    a. Normal winter roadway and parking lot maintenance including plowing and snow removal. Road and parking lot sweeping at the end of every winter, preferably at the start of the spring rain season.

    b. **Annual inspection** of the site for erosion, destabilization, settling, and sloughing. Any needed repairs are to be conducted immediately. **Annual inspection** of site's vegetation and landscaping. Any areas that are bare shall be reseeded and mulched with hay or, if the case is extreme, loamed and seeded or sodded to ensure adequate vegetative cover. Landscape specimens shall be replaced in kind, if they are found to be dead or dying.

    c. Porous Pavers:

    The following recommendations will help assure that the pavers are maintained to preserve its hydrologic effectiveness.

    Winter maintenance:

    - Sanding for winter traction is prohibited. Deicing is permitted (NaCl, $MgCl_2$, or equivalent). Reduced salt application is possible and can be a cost savings for winter maintenance. Nontoxic, organic deicers, applied either as blended, magnesium chloride-based liquid products or as pretreated salt, are preferable.

- Plowing is allowed, blade should be set approximately 1" above road surface. Ice and light snow accumulation are generally not as problematic as for standard asphalt. Snow will accumulate during heavier storms and should be plowed. (more than usual, about an inch).

Routine maintenance:

- Surface seal coating is absolutely forbidden. Surface seal coating is not reversible.
- The paver surface shall be cleaned 2 or 3 times per year, and at any additional times sediment is spilled, eroded, or tracked onto the surface.
- Planted areas adjacent to porous pavers shall be well maintained to prevent soil washout onto the pavement. If any bare spots or eroded areas are observed within the planted areas, they shall be replanted and/or stabilized at once.
- Immediately clean any soil deposited on pavers. Superficial dirt does not necessarily clog the voids. However, dirt that is ground in repeatedly by tires can lead to clogging. Therefore, trucks or other heavy vehicles should be prevented from tracking or spilling dirt onto the pavement.
- Do not allow construction staging, soil/mulch storage, etc. on unprotected paver surface. Contractor to laydown tarps, plywood or removable item and take care not to track material onto unprotected pavers.
- Written and verbal communication to the porous pavers' future owner should make clear the pavement's special purpose and special maintenance requirements such as those listed here.
- A permanent sign should be added at the entrance and end of the porous asphalt area to inform residents and maintenance staff of the special nature and purpose of the pavement, and its special maintenance requirements.

See attached sample forms as a guideline.

Any inquiries in regards to the design, function, and/or maintenance of any one of the above mentioned facilities or tasks shall be directed to the project engineer:

Jones & Beach Engineers, Inc.
85 Portsmouth Avenue
P.O. Box 219
Stratham, NH 03885

T#: (603) 772-4746
F#: (603) 772-0227

Commitment to maintenance requirements

I agree to complete and/or observe all of the required maintenance practices and their respective schedules as outlined above.

Annual Operations and Maintenance Report

The owner, future owners and assigns are responsible to perform the maintenance obligations or hire a Professional Engineer to review the site on an annual basis for maintenance and certification of the stormwater system. The owner shall keep receipts and records of all maintenance companies hired throughout the year along with the following form.

Construction Activity	Date of Inspection	Who Inspected	Findings of Inspector
Parking Lot and Roadway			
Vegetation and Landscaping			
Porous Pavers			

CHECKLIST FOR INSPECTION OF POROUS PAVERS

Location: Inspector:

Date: Time: Site Conditions:

Date Since Last Rain Event:

Inspection Items	Satisfactory (S) or Unsatisfactory (U)		Comments/Corrective Action
1. Salt / Deicing			
Use salt only for ice management	S	U	
2. Debris Cleanup (2-4 times a year minimum, Spring & Fall)			
Clean porous pavers to remove sediment and organic debris on the surface	S	U	
Clean overflow grate	S	U	
3. Controlling Run-On (2-4 times a year)			
Adjacent vegetated areas show no signs of erosion and run-on to porous pavement	S	U	
4. Outlet / Catch Basin Inspection (if available) (2 times a year, After large storm events)			
No evidence of blockage	S	U	
Good condition, no need for cleaning/repair	S	U	
5. Poorly Drainage Pavement (2-4 times a year)			
Pavers has been pressure washed	S	U	
6. Pavement Condition (2-4 times a year minimum, Spring & Fall)			
No evidence of deterioration	S	U	
No cuts from utilities visible	S	U	
No evidence of improper design load applied	S	U	
7. Signage / Stockpiling (As Needed)			
Proper signage posted indicating usage for traffic load	S	U	
No stockpiling of materials and no seal coating	S	U	

Corrective Action Needed	Due Date
1.	
2.
